TRUSTED SINCE 1926
BONIDE®

BONIDE LIQUID ORCHID FOOD 9-7-9

DIRECTIONS FOR USE

Apply only as directed. SHAKE WELL BEFORE USING. Do not store diluted product. Ideal for feeding all of your orchids each time you water. Mix $\frac{1}{6}$ tsp. into one quart of water. Approximately 10 drops (or 1 brief squirt). If you feed your Orchids once or twice a month, use $\frac{1}{4}$ tsp. per quart of water.

ORCHID FERTILIZING TIPS

- Do not use water that has passed through water-softening units on your orchids. Such water may contain high amounts of sodium that can be harmful to orchids.
- When orchids are actively growing, fertilize them.
- Very dark green leaves that are succulent and floppy can be a sign of overfertilizing.
- If the orchids are diseased or in poor condition, stop fertilizing.
- Drench the potting material, several times in a row, every few weeks or so with fresh water that contains no nutrients to wash out any excess fertilizer salts.

Guaranteed Analysis 9-7-9

Total Nitrogen (N).....	9%
2% Ammoniacal Nitrogen	
7% Urea Nitrogen	
Available Phosphate (P ₂ O ₅).....	7%
Soluble Potash (K ₂ O).....	9%

Derived from Urea, Ammonium Polyphosphate and Muriate of Potash.
