

# MONTY'S® LIQUID CARBON™

## Concentrate

### GUARANTEED ANALYSIS

Soil Amending Active Ingredients:

Organic Carbon ..... 2.3%

Humic Acid ..... 4.3%

*Derived from Activated Leonardite*

Total Other Inert Ingredients ..... 93.4%

**Organic Product**

MADE IN USA

### PRODUCT DESCRIPTION

Monty's Liquid Carbon soil conditioner is designed to aid in the breakdown of organic matter. It can improve moisture management in your soil. This product contains Monty's activated humic, which is processed using our proprietary technology. Humic acid may enhance micronutrient uptake.

### DIRECTIONS FOR USE

For general soil conditioning apply 2-4 liters per hectare in a suggested minimum 150 liters of water directly to soil pre-plant, at planting, or after harvest. Apply 1 liter per hectare when foliar applying with liquid nitrogen or other fertility products. Always conduct soil tests to determine nutrient levels and make needed amendments to assure good fertility levels in your soil. Monty's Liquid Carbon is a supplement to your fertilizer program.
