EVERY GARDEN DESERVES THE BEST!

2026 CATALOG

HEIRLOOM, OPEN-POLLINATED & HYBRID SEEDS
NO GENETICALLY ENGINEERED SEEDS

Dear Gardeners,

Every season begins with a moment of hope. You hold a seed, light as a whisper, and decide to give it a place in the world. You cover it with soil, offer it a drink, and trust that something good will happen. It is a small gesture, but it makes a large difference. A seed does not ask for perfection. It asks for a chance. And somehow, year after year, it responds.

Sometimes it grows exactly as you hoped, filling baskets and countertops with color and flavor. Sometimes it takes its own path, teaching patience, wisdom, or humor along the way. A stubborn pepper plant that insists on fruiting in October, a tomato vine that climbs far beyond the trellis, or a volunteer squash that shows up where you are sure you never planted one. These moments remind us that gardens follow their own rhythm, and they often reward us in ways we could not have planned.

We believe that real food begins with real soil, nurtured by people who want to make a difference.

I want to take a moment to introduce you to a few exciting new additions in this catalog.

Parisian Carrots

A charming 19th century French heirloom that grows small and perfectly round. These bright orange, nearly coreless carrots which offer a sweet, crisp bite with rich flavor are ideal for small gardens.

Luffa Gourds

Harvest young for a tender, mild vegetable, or let the vines dry to reveal the natural sponge inside. One plant offers both food and a useful household scrubber. It is simple, practical, and wonderfully versatile.

Pathfinder Serrano Pepper

A bold, high pungency serrano with rich green color and thick walls. Pathfinders grow long and flavorful, perfect for salsas, sauces, and anyone who enjoys real heat. Strong plants make this variety a dependable producer.

Radius Tools

Designed for strength, comfort, and durability, Radius Tools bring dependable ease to everyday gardening and help make each task smoother and more enjoyable.

Potomac Snapdragon

These Potomac Snapdragons are bred for elegant, extra long sturdy stems that stand tall in the garden and shine in bouquets. Plumblossom and Ivory offer soft, timeless color that is perfect for cut flower growers.

Vanity Verbena

Vanity Verbena blooms in rich violet clusters that butterflies and bees cannot resist. Its long, airy stems and steady summer color bring both beauty and pollinators into your garden.

From all of us at Berlin Seeds, thank you for growing with us. Thank you for believing that good food is worth the work. And thank you for planting with the purpose of adding value to your community.

May your 2026 season be abundant, flavorful, and full of the quiet surprises only a garden can offer.

Keep growing. It is time to bring forth life.

Brenton Wengerd

Brenton Wengerd

"Beloved, I pray that all may go well with you and that you may be in good health, as it goes well with your soul." (III John 1:2)

**HIGH SCORE
Wildlife Food Plots**

See page 88

High Score wildlife food plots are made for landowners and hunters who want dependable, no-nonsense results. Built on Berlin Seeds' commitment to non-GMO, high-quality seed, these blends are crafted to grow well, stay nutritious, and keep wildlife coming back. Whether you're planting your very first plot or fine-tuning land you've managed for years, High Score mixes are designed to establish easily and thrive in a wide range of soils and conditions.

From no-till mixes for tougher spots to favorites like Wallhanger, Fall Magnet, and Sweet & Cold, the High Score lineup gives you options for every season and every goal. Each blend is made with purpose—to attract game, hold them on your land, and provide real nutritional value when natural food sources start to fade. If you're looking to improve your habitat, support healthier wildlife, or simply get more out of your hunting ground, High Score offers a straightforward, dependable way to grow something that makes a difference.

garden seeds

HEIRLOOM, OPEN-POLLINATED & HYBRID SEEDS

Organic Seeds 🌱

Certified organic seed

Emerge+ Organically Treated Seeds

Emerge+ Seed Treatment is all-natural and works as an immune system booster, which helps the seedling emerge stronger, and fight off disease and decay. Emerge+ seed treatment contains non-food grade ingredients and seed should not be used for food, feed or oil. Emerge+ does not effect the color of your seed. We recommend planting after the soil temperature as reached 65° F.

Untreated Seeds

Untreated Seeds have been cleaned and have not been treated using any chemical, biological, or physical method. Untreated Seeds should only be planted when soil conditions are ideal to ensure quick germination. The longer that untreated seed is in the soil before it germinates the more likely it is that the seed will spoil or become compromised by disease.

CERTIFIED ORGANIC GROWERS: Untreated seeds may be allowed in Certified Organic production, provided that a comparable variety is not available in Certified Organic seed. Check with your certifying agency for approval. Some Pelleted Untreated Seeds are not approved for use in Certified Organic production.

Pelleted Seeds 🌱

The white pelleting material has no adverse effect on seed or soil. Just plant them shallow in the spacing you desire and keep them moist for good germination.

Treated Seeds

Treated Seed has been treated to protect it from specific seed/soil-borne pathogens and thus improve its performance. The treatment may be hot water, chemical, or biological, depending on the pathogen involved.

seed types

Absolutely no genetically engineered seeds.

🌱 Hybrid

Seed from carefully cross-bred varieties selected for desirable traits. Seed saving not recommended.

🌱 Open Pollinated

Seed, plant and vegetable/fruit stability. Seed saving potential.

🌱 Heirloom

Seed, plant and vegetable/fruit stability for over 20 years. Seed saving potential.

🌱 Edible Pumpkins

🌱 Indeterminate Plant Habit

This means that the plant will continue growth during fruit bearing.

🌱 Determinate Plant Habit

This means that the plant has a set plant size, usually smaller than Indeterminate varieties.

Beans

CULTURE: Plant in well-drained soil with a pH of 6.5–6.8. A ½ pound plants a 100 ft. row. After danger of frost, sow seeds in rows 20–24" apart. Make 2" deep furrows and space seeds 3–4" apart, covering with fine soil that is lightly firmed. Average 1,400 seeds per lb. All beans are open-pollinated. For best germination, plant when daytime soil temperatures reach at least 60°F; optimum germination occurs at 70–90°F. Inoculants can increase yields. For a continuous harvest, make successive sowings every 2–3 weeks through midsummer. Beans dislike acidic soil—add lime or wood ashes if needed.

DISEASES: Remove or plow under bean compost bean straw in the fall to speed breakdown of disease organisms. For white mold (Sclerotinia), use wider row spacing to improve air flow and leaf drying.

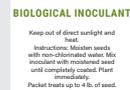

HARVEST: Pick regularly to encourage continued pod production.

STORAGE: Store beans at 40°F and 90% relative humidity for 7–10 days.

INOCULATING SEED: Moisten seeds lightly (a small amount of molasses helps inoculant stick), then shake in a bag with inoculant powder before planting.

Beans dislike acidic soil, so add lime if necessary, or wood ashes.

BIOLOGICAL INOCULANT

Legumes, such as bean and peas, enrich the soil through the process of nitrogen fixation. Rhizobium bacteria are able to capture atmospheric nitrogen and transform it into a plant usable form.

Bush Beans

Antiqua 54 DAYS

☼ An excellent bush bean that replaces Advantage. From the same breeder and highly recommended. Dark green, tender, and productive on strong plants. Great for home gardens.

untreated

10044 500 sds\$4.40 10046 2,000 sds \$11.10
10045 1,000 sds \$7.10 10047 10,000 sds \$49.50

TOP PICK

Blue Lake Bush 55 DAYS

☼ ☼ Combines the exceptional flavor of the famous Blue Lake Pole with a bush habit. Straight, dark, green pods average 6" long and fill slowly with plump tender white seeds. Heavy yielding, good for canning and freezing. Heirloom 1961

untreated

10144 ¼ lb.\$3.50 10146 1 lb. \$7.00

10394 ¼ lb.\$5.00 10396 1 lb.\$13.70
10395 ½ lb.\$8.40 10397 5 lb.\$58.10

Dark Horse 58 DAYS

☼ One of the best green beans we've found in recent trials. This new variety is checking all the right boxes for gardeners. Plants are sturdy and upright, holding beans well off the ground. Pods are a beautiful dark green and straight with an almost glossy look. Seeds are very slow to develop making for a longer harvest window. Flavor is superb with virtually no fiber. Try Dark Horse for a look at what green beans really can be.

untreated

11584 1,000 sds\$8.70

Derby 58 DAYS

☼ Derby green beans have long straight, round stringless pods that remain tender with excellent eating quality up to 7" in length. While harvesting the gardener will notice how easily the pods slip from the plant without the stem. Widely known for its flavor and above average yields. Due to the holding quality, gardeners can be assured of a successful harvest time and again. AAS Winner that is hard to find.

untreated

11504 ¼ lb.\$5.70 11506 1 lb.\$16.60
11505 ½ lb.\$9.70 11507 5 lb.\$78.20

Gold Mine 55 DAYS

☼ Great taste and high quality, ultra-sweet wax beans are borne on compact and unusually upright plants. The attractive, long pods are smooth and straight. Yield is high. Flavor and pod color are excellent. Rated as one of the best overall wax beans on the market. The beans grow together in clusters that make harvest a snap. Beans are 5-5 ½" long. Plants yield early and need no support.

untreated

11543 500 sds\$6.60 11545 2,000 sds\$17.70

10595 ½ lb.\$7.50 10597 5 lb.\$54.80

TOP PICK**Jade** **60 DAYS**

🌱 Our Favorite! Jade is a round-podded bush bean that growers rely on to produce long, straight 6-7" pods with the distinctive dark green color, tender texture, and sweet flavor consumers demand. Its upright bush holds the pods above the ground, which protects them from splashing dirt and disease. It is widely adapted to most bean growing areas.

untreated

10644 ¼ lb.\$3.60 10646 1 lb.\$7.80

10645 ½ lb.\$5.40 10647 5 lb.\$31.50

11155 ½ lb.\$5.40 11157 5 lb.\$33.50

**Roma II** **59 DAYS**

🌱 A bush version of the popular Italian/Romano pole bean. Pods are 5-6" long with remarkable flavor and tenderness. Bushy 18" plants are very productive with flat-podded beans. Its distinctive flavor is equally good when used as a snap or a green shell bean. Highly recommended for freezing. Great for frenching.

untreated

10974 ¼ lb.\$3.30 10976 1 lb.\$6.40

10975 ½ lb.\$4.70 10977 5 lb.\$25.80

11185 ½ lb.\$4.90 11187 5 lb.\$26.60

**Royal Burgundy** **55 DAYS**

🌱 The sturdy, vigorous plants, 15-18" tall, bear an abundant crop of round, stringless, and meaty pods, 5 - 5 ½" long. When ready to pick, pods are purple, but turn to rich green when boiled. Excellent for home freezing. Germinates in cool soil and resists beetles. Performs exceptionally well in cool weather.

untreated

Pole Beans

CULTURE: Grow pole beans on trellises or large mesh fencing, 4-pole tepees, or single poles. Sow seeds 1" deep, spaced 3" apart in rows 4' apart after soil temperature exceeds 60°F (16°C). If using poles, plant 4 seeds at the base of each pole.

LARGE PLANTINGS: Sow a single row of seeds on open ground or through black plastic mulch. Sow 3 seeds/hole, 8" between holes. For large trellised plantings, place fence posts 8-10' apart, and support a 9-gauge galvanized wire at the top. With twine, lash trellis netting to the wire.

AVERAGE SEEDING RATE: 50 seeds/12' or 7 poles; 250 seeds/60' or 35 poles; 500 seeds/120' or 70 poles; 1M/ 250' or 140 poles

Blue Lake Stringless Pole 64 DAYS

☞ ☞ Pods are round, slightly curved, tender, fleshy, stringless and fiberless, medium green - perfect for freezing and canning. Heavy yielding, will bear tasty stringless beans all summer long. Blue Lake beans are noted for their fresh, sweet, "beany" taste.

Beets

CULTURE: Crops grow quickly in light or loamy soils with a pH over 6.0. Cool temperatures produce the best flesh color. Acute weather fluctuations will cause zoning (white rings) in the roots.

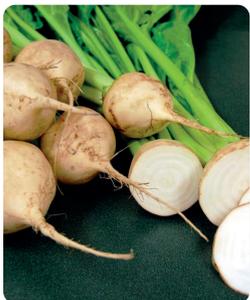

DIRECT SEEDING: Begin sowings when soil has warmed to 45°F. Sow 15 seeds/ft. ½" deep, rows 12-18" apart. Thin to 1 plant per 2". For a continuous supply of greens and small beets, sow seed at 2-week intervals until 8 weeks before regular heavy frosts are expected. Needs warm soil to germinate.

DISEASES: Keep beets well-irrigated to prevent scab, which causes raised brown rough spots on the mature roots. Internal breakdown or browning is most likely to occur in alkaline soils after prolonged hot, dry periods.

HARVEST AND STORAGE: Lift plants, wash and cool, and store bunches up to 10 days at 32°F and 95% relative humidity.

WINTER STORAGE OF ROOTS: Sow about 10 weeks before heavy freeze is expected. Cut tops, wash, and store up to 6 months at 32°F and 95% humidity.

NOTES: Avg. 2000 seeds/ oz. 1 oz. will sow a 100 ft. row.

Avalanche 55 DAYS

☼ These AAS award-winning, snow-white roots have all the sweetness of ordinary beets plus rich, sweet flavor, free of earthy notes. At 2-3" in diameter, the roots are sized nicely for slicing and roasting, can be grated raw into salad, or for a delicious gourmet surprise, roast these beauties: cut into wedges, add oil, bake till fork-tender, and sprinkle with salt. Avalanche is here to convert even the pickiest eater into a beet enthusiast!

Broccoli

CULTURE: Broccoli prefers a well drained, fertile soil that is high in organic matter with a pH of 6.0-7.5. A consistent supply of moisture throughout the growing season is important; irrigate regularly for best results. While more heat-tolerant varieties are now on the market, broccoli does not generally do well in hot weather. The best success is with spring and fall crops.

HARVEST: Before flower buds open, cut center head. Hydrocool or ice as soon as possible. Harvest secondary side shoots regularly to encourage continued production.

STORAGE: Store at 32°F, 95-98% relative humidity, with good air circulation for 10-14 days.

DAYS TO MATURITY: From date of transplanting; add about 20 days if direct seeding.

NOTES: 1/4 oz. sows 100' row; sow seed 1/4" deep. Plants should be spaced 12-16" apart in rows that are 24-30" apart. Plant in April and May. For an early crop, sow seed in cold frame about a month before planting time and transplant to growing area when plants are large enough for transplanting.

Protecting young broccoli plants from temperature extremes is critical for a successful crop. A prolonged period of nights around 30°F and days in the 50° and 60°F range can produce tiny immature heads called buttons. To prevent this, protect plants with frost guards or row covers during cool weather.

Artwork (baby sized) 55 DAYS

☞ A gourmet treat! Yields tender, dark green side shoots with bite-size heads and long, edible stems instead of producing one large broccoli head, perfect for stir fries and sautéing. Pinch the main head when it reaches 1- 1 1/2" to trigger side shoot formation. Harvest the smaller heads that follow when stems are 6-7" long. Yields many side shoots through the growing season. A 2015 All-America Selections winner.

18741 pkt (70 sds)\$2.40

Brussel Sprouts

Plant in May, 1/4" deep, in containers indoors or directly outdoors. Leave 18-24" between plants when transplanting. Harvest after frost or when sprouts are 1" in diameter. Start at bottom of stem to harvest.

TOP PICK**Gustus** _____ **99 DAYS**

Gustus has a mild & sweet-tasting dark green sprout. In-garden plant stability combined with high yields and a good shelf life make this sprout a desirable choice.

untreated _____

19081 pkt (50 sds) \$4.10

**Jade Cross** _____ **90 DAYS**

Early variety with sturdy stalks that fill up with tender, tasty 1" diameter sprouts. Best taste after frost. Widely adapted, heat tolerant and freezes well.

untreated _____

19021 pkt (70 sds)\$3.60

**Long Island Improved** _____ **90 DAYS**

Plant is compact, stem is well covered with cabbage-like sprouts. Excellent flavor!

untreated _____

19041 pkt (70 sds)\$2.60

**Redarling** _____ **102 DAYS**

Distinctive, vivid, red-purple, 1" sprouts have a slightly sweeter flavor than most green varieties. The high-yielding plants stand up to cool nights and frost. These mild-flavored Brussels sprouts will be popular at the dinner table late into the season.

untreated _____

19061 pkt (30 sds)\$4.70

Cabbage

Avg. 8,000 seeds/oz. Plant seed about 1/4" deep in hotbed or cold frame one month before transplanting. Early varieties should be transplanted in March or April, late varieties in May or June. Space plants 12 - 18" apart in rows 24 -30" wide. (Maturity dates are from time of transplanting.)

**All Seasons Blend** _____ **65-115 DAYS**

A mixture of different cabbages in one packet. A special blend of different high-yielding varieties that produce heads of various sizes, densities and weights over an extended growing season.

untreated _____

19201 pkt (90 sds)\$3.60

**NEW****Blue Vantage** _____ **80 DAYS**

Ideal for both fresh eating and coleslaw, the mid-season Blue Vantage Cabbage produces large, dense 4-5 lb heads with short cores. This variety is a great choice for market producers, boasting excellent field holding ability, resistance to Fusarium yellows (race 1), and tolerance to tipburn and excess moisture.

untreated _____

19621 pkt (50 sds)\$3.00

**Bravo** _____ **85 DAYS**

Outstanding field performance. Very large head, good for early and late plantings. Good keeper.

untreated _____

19261 pkt (70 sds)\$3.30

**Copenhagen Market** _____ **68 DAYS**

A Danish heirloom introduced in 1909. Recommended for late June harvests. Uniform, good storage variety suitable for market or home garden.

untreated _____

19301 pkt (90 sds)\$2.40

**Fast Vantage** _____ **60 DAYS**

A great-tasting, early variety that produces high yields of uniform, 2-3 lb heads up to six weeks earlier than other varieties! Has a mild, sweet flavor and is good for eating fresh, in coleslaw, cooked, frozen, or made into sauerkraut.

untreated _____

19321 pkt (70 sds)\$2.90

**Golden Cross** _____ **40 DAYS**

Neat plants have small outer leaves for closer spacing. Extra-early hybrid of the highest quality, with tight 6" sweet heads, creamy-white center and small core.

Sweet Corn

¼ pound / 500 seeds per 100 ft row . 8-10 pounds an acre . (6 ears/quart.)

Seed depth: 1" . 8-10" apart .

Sweet Corn Tips: • plant SH2 varieties in soil that is 60°F or warmer to improve germination.

- When planting smaller plots of corn, plant in square blocks rather than longer rows to improve pollination.
- When planting untreated sweet corn make sure the soil conditions are ideal for germination or start indoors since untreated sweet corn seeds break down easily when soil is too cold or wet. Ideal soil for sweet corn is 65°.
- Produce a continuous supply of garden-fresh sweet corn by doing smaller plantings 2 weeks apart.
- Sweet corn is wind-pollinated, and cross-pollination with other corn types can make the kernels tough and less sweet, ruining the taste and texture gardeners expect. To maintain true flavor and quality, keep different corn varieties separate or stagger planting dates so each type stays distinct.

Allure 74 DAYS

BICOLOR (SYN) Allure is a variety that you will not find at the supermarket. It has a wonderful balance between sweetness and tenderness. Has very attractive 8 to 8 ½" ears, filled with shiny yellow and white kernels all the way to the tip. Allure has a very tender kernel texture and good holding ability on the stalk. Excellent seed vigor for early planting.

Ambrosia 72 DAYS

BICOLOR (SE) Ambrosia displays unmatched early vigor and uniformity of plant growth in spite of adverse conditions. Bicolor ears are comparable to Bodacious at 8" and 16 rows although we find it blockier and even better quality. We highly recommend Ambrosia for its early vigor, quality and Stewarts Wilt tolerance.

Cross-Pollination

Cross-pollination is not an issue within a genotype group.

Isolation Methods:

- » Plant 2-3 weeks earlier/later than neighboring corn so that tasseling/pollination occurs at a different time. Make sure you consider maturity days/tasseling days so that you don't plant a shorter maturity corn 2 weeks after a longer maturity corn and end up with tasseling happening at the same time. (If cross-pollination occurs, both varieties will have tough, starchy kernels.)
- » Plant 600-1000 feet away from other corn.

Notes:

- » When saving seed, cross-pollination is an issue even within a genotype group.
- » Separate all varieties of popcorn, field corn, and dent corn.

Cucumbers

Start seed indoors 3 weeks before planting out. Or plant directly in soil 1 week after last frost date as cucumbers will not tolerate frost.

Armenian 50-75 DAYS

🌱 Best when eaten 12-18" long. Looks and tastes like a cucumber, but botanically a melon. Crunchy flesh is burpless, never bitter, and prized for their sweet flavor. Prolific output, performs especially well in hot climates. Light green ribbed fruits grow up to 2' long; they grow straight when trellised but tend to twist when grown on the ground. Can be sliced and pickled!

untreated
20701 pkt (30 sds)\$2.70

Burpless Bush (Early Spring) 58 DAYS

🌱 Our only burpless cucumber of bush habit. Vines 3' or less. Fruits are straight, smooth, crisp, white spined and 10" long. Nearly seedless if picked young.

Eggplant

Space 10-12" apart. Eggplant needs to be started indoors 8 weeks before the last frost date. Plant it outside when soil temperatures are 70 ° and night air temperature 60 ° and above. It loves heat. Cover it with row cover to retain heat and to keep flea beetles, potato bugs, hornworms, aphids and more from your plants. Start harvesting as soon as the skins turn glossy. Snip eggplants from the plants with shears. Keeping the plants picked stimulates more production. Fun and colorful to grow.

Asian Delite 53 DAYS

Upright semi-spineless plants make it easy to harvest the slender, elongated fruit that sets on early. Glossy, bright purple fruits stay tender and non-bitter no matter the size. They have a tender skin that does not require peeling, making them great for dicing into stir-fry or slicing lengthwise for grilling. Harvest at 5-7" long for baby size or 9-12" long for full fruit size. Plants perform well in-ground or in container plantings.

Harvest Wings 95 DAYS

🍂 The Harvest Wings Bush F1 is a semi-bush gourd growing 20-30 inches tall with a spread of 18-24 inches. Perfect for gardeners with limited space, it produces a prolific harvest of small gourds in a kaleidoscope of colors and shapes for vibrant and festive fall decorations and displays.

untreated
22101 pkt (20 sds)\$3.40 22104 XL pkt (1/4 oz)\$5.40

Luffa 130 DAYS

🍂 🍂 When the fruit is a vibrant green and less than six inches long, use as a mild-tasting vegetable enjoyed much like a summer squash. As the vine dies back and the gourd turns a brittle, yellowish-brown, its soft flesh gives way to a fibrous skeleton. Once harvested, the dried gourd can be peeled to reveal its sponge, ready to scrub and exfoliate. Artisans and soap makers take this a step further, slicing the sponge to embed it within a bar of soap for a cleansing bar that offers both rich lather and invigorating exfoliation.

untreated
22141 pkt (20 sds)\$2.80

Martinhouse 105 DAYS

🍂 This is the real deal if you want to grow your own birdhouses. Bigger size will work in vertical or horizontal position for nesting cavities. Sprawling vigorous plants need some room, but are very easy to grow.

Sandy 50 DAYS

A lovely, dark green oakleaf lettuce with beautiful, extra frilly leaves and great taste. The first lettuce since 1985 to become an AAS winner. Only 10-12" high and wide, it's compact enough to grow in a flowerpot on the patio, yet you'll get a long season of yields by picking just what you need and letting new leaves grow in. Or, if you prefer, let the entire head mature, then slice it away at the base and enjoy scrumptious salads for the whole family. Very slow to bolt, it will keep its texture and flavor in the garden even in unseasonable heat. Not a trace of bitterness affects these leaves. It is also very resistant to powdery mildew, as well as downy mildew and tip burn. If you live in a climate with long, hot summers, Sandy is the one to grow.

Onions

Onion bulbing is triggered by day length, and maximum day length increases from south to north. Short-day onions are suited to lower southern latitudes, while day-neutral (intermediate) and long-day onions perform best at higher northern latitudes.

Day-neutral onions bulb about 110 days after planting rather than responding to day length.

Long-day onions bulb when days reach 14 hours or more of sunlight, and they typically store better.

Start onion seeds indoors in January or February. Fill a seed-starting tray with about 2 inches of moist Black Gold Seedling Mix or another fine potting soil. Sprinkle seeds roughly 1/2 inch apart and cover them lightly with soil. Mist until evenly damp but not soggy, then cover with a humidity dome and keep the soil at 70-75°F. Check daily, watering as needed, and add 1/2 teaspoon of liquid fish fertilizer per quart of water once a week.

After two months, the seedlings will be tall enough that their tops begin to fall over. Trim the tops to about 4 inches, then allow them to grow for another month before transplanting outdoors. This trimming encourages thicker, sturdier regrowth and better bulb formation. Total indoor growing time before transplant is usually about three months.

After transplanting, sprinkle with bone meal and water with fish fertilizer once or twice per month.

Avg. 9,000 sds/oz.

(Onion sets and onions plants available in Garden Ready Plants section)

Peanuts

Shelled Peanuts - Plant 12" apart, 1 1/4" deep. When plants are about 12" tall, they should be hilled or mulched with straw. Harvest when leaves turn yellow.

Harvesting Peanuts: The best way to harvest peanuts is by slowly prying up the whole plant with a fork. Lift the plant out of the ground, and gently shake off the loose soil. The peanuts will need some drying in a shaded, warm, airy spot. Dry peanuts for 2-3 weeks to allow the moisture content of the peanuts to drop. When the plant leaves become dry and crumbly, pull the nuts off the plants. They should be ready for roasting and storing.

Jumbo Virginia 120 DAYS

LaBomba II 56 DAYS

🌶️ Our best tasting jalapeño! These 3 1/2" long by 2 1/2" wide, early peppers have extra thick, 1/4" walls. They have a hint of sweet followed by a mild flavor with no bitterness and finish with a medium burst of true jalapeño heat. Disease-resistant plants have a strong, upright habit and good leaf coverage to protect the fruit from sunscald. Use these large, dark green, medium-hot peppers in all your favorite dishes.

untreated

28261 pkt (15 sds)\$4.20

Mad Hatter 70 DAYS

🌶️ Uniquely shaped specialty pepper with a delicate fruity scent and rich flavor. Technically a sweet pepper, if growing conditions are hot and dry, seed cavity may have a little heat. Excellent fresh, stuffed or pickled. High yields and awesome taste earned this a 2017 AAS Award.

untreated

28321 pkt (15 sds)\$4.30

Megatron 65 DAYS

🌶️ Despite their generous size, deep green fruits mature early, have mega flavor and disease resistance! An exciting, new jalapeno that boasts extra-large, fruits that average a whopping 4 1/2" long! Smooth fruits are firm, mature to deep red and have a good shelf life. With a Scoville rating of 5,000 to 8,000 units, they have the perfect amount of heat for jalapeno poppers. Strong, compact plants produce high yields and are highly resistant to Bacterial Spot Races 0-3, 7 and 8.

untreated

28601 pkt (15 sds)\$3.90

NEW

Pathfinder 60-75 DAYS

🌶️ The Pathfinder is a superb new serrano pepper prized for its striking dark green color, thick walls, and high pungency. These robust peppers grow to an impressive 4.5-5 inches long. Hotter than a jalapeño, they deliver a delicious spicy kick perfect for making fresh salsas and hot sauces, and are wonderful as a garnish or relish. Beyond their culinary appeal, Pathfinders boast excellent shelf life, outstanding disease resistance, and a strong plant for a reliable yield.

untreated

28721 pkt (15 sds)\$3.50

Poblano 75 DAYS

🌶️ Heart-shaped elongated pepper called Ancho in its dried form where it lends its distinctive aroma and taste to chili powder. In its fresh green form it is often peeled and stuffed for a roasting pepper. Mildly spicy.

untreated

28441 pkt (35 sds)\$2.30

Primero Red 78 DAYS

🌶️ As early as bell peppers! This Habanero is also one of the biggest, measuring 3 1/2" long by 1 1/2" wide. With only about one-third the heat of a traditional habanero, "Primero" lets you appreciate its rich, citrusy flavor without extreme heat. Ripening green to bright red on plants reaching 18-24" tall.

untreated

28461 pkt (15 sds)\$4.00

Super Chili 75 DAYS

🌶️ The 2 1/2" cone-shaped peppers have thin, hot flesh. As they mature, they turn from green to orange and red. Can be used fresh or dried.

untreated

Rio Grande 80 DAYS

The tomatillo of choice for homemade salsa verde with its sweet, bright flavor of green pepper mixed with tomato. Plants produce heavy yields of small husk-covered fruits that fall to the ground at full ripeness and don't require staking. Tomatillos thrive in growing conditions similar to tomatoes (because they are related) but will handle a lot more heat. Grow two or more plants to ensure good pollination.

untreated

Tomatoes

Seeds should be sown in a cold frame, hothouse, or greenhouse for 6 weeks before transplanting. The plants can be set outside as soon as the ground is warm and danger of frost is past. Tomatoes are heavy feeders and should be well fertilized for best results. Approximately 9,000 seeds per oz.

* **Tomato maturity dates are from day of transplanting.**

- I** = Indeterminate plant habit means that plant growth continues during fruit bearing.
- D** = Determinate plant habit means that plant has a set plant size, usually smaller than Indeterminate.

Beefsteak Tomatoes

Aunt Ruby's German Green 80 DAYS

I An heirloom brought from Germany. Large 12-16 oz. Beefsteak fruits blush lightly yellow and develop an amber-pink tinge on the blossom end when ripe. The green flesh that is faintly marbled in pink has a sweet, tart, rich, and spicy flavor. Ready to harvest when soft to the touch.

Magic Carpet

SI "Walk on me Thyme." Brilliant rose, aromatic flowers form a carpet of ground cover. **Perennial**
45391 pkt (50 sds)\$2.60

flower seeds

INTRODUCTION:

We are eager to offer you a wide array of flower seeds to enhance your landscape. A row of flowers in the garden can be a feast for your eyes, provide bouquets all summer, and attract bees and butterflies for pollination. Give your children the pleasure of freely cutting and arranging flowers to share. Plan your flowerbeds and baskets and enjoy watching your seeds germinate and grow.

Flowers that should be started early indoors are indicated with **SI** start indoors, after the name. Order early to allow for this.

We have suggested direct seeding, indicated with **DS** with some of the varieties that do not transplant as well. If no recommendation is given, you may choose to start indoors for earlier blooms or plant directly outdoors.

DAMPING OFF PREVENTION TIPS:

Add Actinovate to the seedling mix when planting seeds. Captan is also labeled to use when watering. Good lighting is essential, use grow lights if sunlight is not adequate. Good air circulation is helpful. DO NOT OVERWATER, allow soil surface to become dry and plants to show signs of needing water. If damping off has been a big issue, try using dry soil mix to cover seeds rather than starting with a wet surface.

DIRECT SEEDING OUTDOORS:

Work up and rake the soil to achieve a fine, level surface. Distribute the seeds, and tamp down lightly. Large seeds with a hard shell may benefit from being nicked and soaked for several hours before planting. If your garden soil is hard, try covering the seeds with potting soil for easier emergence. Keep soil moist, and use row cover. After germination occurs, leave row cover on another week or two till plants are established. Direct seeding may also be done in a block under a hotcap and transplanted when plants are ready.

FLOWER SEED ORDERING INFO:

The height of each variety is listed directly behind the name followed by description, ex:10-12".

 = Cut Flower

ACROLINIUM

Large Flowered ✂

SI 20" A type of strawflower in a brilliant mix of pink, carmine, and white shades with yellow or dark centers. **Annual**

SI 12" With its vibrant color and bursting blooms these flowers will look fantastic in any basket or mixed container. Whether in sun or shade the large flowers will bloom above the foliage. Excellent border plant. **Annual**

46196 pkt (25 sds)..... \$3.10

Nonstop Mocca Mix

SI 8-10" Large flowers with dark bronze foliage that contrasts well with the bright, double 2 1/2" blooms. Spreads 12-15". Must be started early. **Annual**

46176 pkt (25 sds)..... \$3.10

BUPLEURUM

Germ 14-21 days @ 55-60°. Start 6-8 weeks before the last frost. Can also be direct seeded in early spring.

Green Gold ✂

SI 36-40" This graceful bouquet filler will add some sparkle and shine to your bouquet. Produces beautiful lime green florets with blue-green foliage that can also be used for dried flowers. Adaptable to a wide range of climates and easy to grow. Branching plants do not require pinching. **Annual**

46717 pkt (50 sds).....\$2.70

BURNING BUSH

Germ 7-14 days @ 68-70°. Pre-chill 3-5 days before sowing. Cover seeds lightly, needs darkness to germ. 10-12 weeks before transplanting.

Burning Bush

SI 18-20" A pretty lime green lacy shrub that makes a beautiful hedge or background for other annuals. Grows taller if spaced close together. Turns a deep maroon red in late fall. An old-time annual that is hard to locate. Easy to save seeds from. **Annual**

46241 pkt (50 sds).....\$2.30

BUTTERFLY PEA

NEW

Blue Butterfly

SI DS A favorite among garden cooks and tea lovers, these brilliant blue flowers aren't just beautiful—they're edible, too. Steep them for a naturally vibrant tea or stir the petals into rice for a splash of color. Add lemon and watch the deep blue hue shift to purple like magic. Fast-growing and eye-catching, they're a joy to grow and even more fun to use. **Annual**

49184 pkt (25 sds)..... \$3.10

CALENDULA

Germ 10 days @ 70°. Cover seeds lightly. Darkness will help germ.

Bon Bon Mix

SI DS 10-12" Cheery double 3" flowers on sturdy plants. Blooms early, can be used as an edible garnish. Mix of soft and bright yellow, orange and apricot. **Annual**

46261 pkt (40 sds).....\$2.40

Kinglet Formula Mix ✂

SI DS 24" Easy to grow and rewarding; every flower bed should have calendula! A wonderful variety that produces double crested flowers in shades of orange apricot, golden yellow, and cream. Plant in flower beds and along fence rows for a splash of color. **Annual**

46266 pkt (40 sds)\$3.40

Lemonade

SI DS 10-12" Cheery double 3" flowers on sturdy plants. Blooms early, can be used as an edible garnish. Mix of soft and bright yellow, orange and apricot. **Annual**

46271 pkt (50 sds).....\$3.40

Oopsy Daisy

SI DS 12" This easy to grow flower has a delightful mix of bicolored petals in gorgeous shades of pale orange and gold. The single and semi-double daisy-like flowers bloom all summer long and also thrive in cooler weather. Stunning in flower beds as mass plantings or in a row as borders. **Annual**

46281 pkt (30 sds).....\$2.80

Orange Flash

SI DS 18-24" A compact, bushy plant with rose and copper hues surrounded by green foliage. An enticing cut flower that is easy to grow. **Annual**

46284 pkt (40 sds)\$2.80

CASTOR BEAN

Direct seed as soon as frost is past.

Castor Bean

80 DAYS

Need a privacy fence or accent plant with an exotic tropical look? Easy to grow, these plants will amaze you with a height of 8-13' and leaves up to 42" across. Ornamental mix has tinges of red and purple among the green. Strong stems do not need staking. Plant it today and wait for inquires about this giant from by-passers. Great for children to observe- a growing experience! Soak seeds 24-48 hours. Plant 1 week after last frost, 1" deep and 3-4' apart. (Note: Castor bean plants are poisonous if eaten.)

46291 pkt (15 sds)\$2.70

46295 XL pkt (45 sds)\$3.40

CELOSIA

Germ 8 days @ 70-75°. Cover seeds lightly, maintain even soil temp. Use lukewarm water at all times when watering and keep soil moist. 6-8 weeks before transplanting.

Act Mix ✂

SI DS 50" This one grows fast and delivers striking color with a bold, tropical vibe—perfect for eye-catching bouquets. The tall, straight stems are clean and strong, with solid resistance to common diseases. Ready to cut in just a couple of months, and it keeps producing over time for an extended harvest. **Annual**

46392 pkt (15 sds).....\$3.30

Asian Garden ✂️

🌱 **SI** 2-3' Add texture to your flower bed with this beautiful celosia. Bushy habit plant with attractive green foliage. Produces bright pink spikes all summer long lasting even through some of the first frosts of the season. A pollinator favorite! **Annual**
46321 pkt (35 sds).....\$2.70

Bombay Mix ✂️

🌱 **SI** 28-40" Large color range, spectacular cockscomb shaped flowers with strong round stems. Early to bloom. **Annual**
46326 pkt (15 sds).....\$3.90

SERIES

Chief Gold

🌱 **SI** 36-40" Will produce one big plant with great foliage and very large uniform globe shaped flower heads. Flowers make a great addition to fresh cut bouquets. Withstands high temperatures. **Annual**
46378 pkt (40 sds).....\$2.50

Chief Mix ✂️

46331 pkt (40 sds).....\$2.40

Dracula

🌱 **SI** 8-16" With its unusual shape and eye catching color Dracula will add drama to your landscapes, gardens and containers. The first of its kind with one 6-7" beautiful "flower" on top of each plant. Once you transplant it outside the foliage will get darker and change to purple tones. **Annual**
46341 pkt (15 sds).....\$4.30

SERIES

First Flame Purple

🌱 **SI** 14-25" Very showy, taller than average, likes heat. Will not perform well in cool conditions. **Annual**
46351 pkt (40 sds).....\$2.70

First Flame Red

46356 pkt (40 sds).....\$2.60

First Flame Yellow

46361 pkt (40 sds).....\$2.60

Flamingo Feather ✂️

🌱 **SI** 18-26" This plume celosia is a favorite to grow as both a fresh and dried flower. The fluffy, spiked texture adds interest to any bouquet. Shades of pink to white in slender feathery plumes. Great accent to use in bouquets. **Annual**
46366 pkt (50 sds).....\$2.40

SERIES

Flamma Mix

🌱 **SI** 8-10" This dwarf-type celosia does well in hot and humid conditions. A compact variety with numerous branches, and vibrant colors that won't fade. Grow in beds or containers. **Annual**
46311 pkt (40 sds).....\$2.80

Flamma Orange

46316 pkt (40 sds).....\$2.80

Flamma Pink

46376 pkt (35 sds).....\$2.70

Fresh Look Mix

🌱 **SI** 14" Vigorous plants with plumes up to 12". New leaves cover old plumes so plants keep their "fresh look" all season. Mix of red, yellow, gold, and orange. **Annual**
46371 pkt (40 sds).....\$2.60

COLEUS

Germ 10 days @ 70-75°. Do not cover seeds, needs light to germ. 8-12 weeks before transplanting.

Kong Empire Mix

🌱 **SI** 18-20" Big, bold, bright and beautiful. Terrific accent plant for large containers and landscapes. Huge leaved, well branched, colors are more intense in shade. Mix of vibrant reds, pinks, and scarlet. **Annual**
46391 pkt (15 sds).....\$4.60

Premium Sun Mix

🌱 **SI** 24-28" Vigorous, slow bolting, plant with multi-patterned leaves create showy planters and mass landscapes. Plant colors brighten and evolve throughout the season. Thrives in full sun, but also does well in part shade. Mix is a blend of 5 different colors, gold, lime green, tricolor, and watermelon pink. **Annual**
46401 pkt (15 sds).....\$5.00

Wizard Mix

🌱 **SI** 12-14" Compact and uniform plants are easy to care for. Popular choice for gardens, baskets and planters. **Annual**
46406 pkt (40 sds).....\$2.60

COREOPSIS

Germ 18 days @ 65-70°. Cover seeds lightly with soil. Needs light to germ. 8-10 weeks before transplanting.

Early Sunrise

SI 18" Double flowers are continuously produced with strong stems for cutting. Plant in borders for a mass color show of red, triumph, white, scarlet, yellow. Hardy, early flowering plant. **Perennial**

48536 pkt (35 sds)\$2.70

Incredible Swirl

DS 3' This dizzying explosion of bold little blooms will brighten any landscape. Attracts butterflies and bees. Generously cutting flowers for bouquets will encourage more blooms to develop throughout the season. **Annual**

48548 pkt (50 sds)\$2.70

COSMOS

Cupcake Blush

DS 40" Beautiful new variety with cup-shaped blooms. Fused petals form a goblet shape flower resembling a poppy, rather than having separate daisy-like petals. Watch as the bloom color shifts from white to blush pink. Unique flower for specialty cut flowers, landscapes, and borders. Simply sow 'em where you want to grow 'em. **Annual**

46446 pkt (20 sds)\$3.20

Double Click Mix

DS 24-30" Full, double, & semi double mum like cosmos on strong stems. Long flowering period. Mix of bicolor pink, cranberry, rose bonbon, and snow puff. **Annual**

46451 pkt (20 sds)\$3.20

SERIES

Fizzy Rose Picotee

DS 40-54" Large 2-4" blooms have overlapping petals with unique tufted centers. Drought resistant plants thrive in full sun and will keep blooming till last frost if cut regularly. Looks lovely as a border in a cut flower garden. **Annual**

46475 pkt (40 sds)\$3.00

Fizzy White

46472 pkt (40 sds)\$3.00

Mandarin Orange

DS 10-12" These flower gems are a new favorite in the garden. Strong upright stems yield blooms that are more petite than other cosmos varieties. Excellent back of the border plant. Grows well in full sun. **Annual**

46461 pkt (35 sds)\$2.60

Xanthos

DS 20-25" The first true yellow cosmos! Large round flowers are soft-yellow with golden centers making a stunning display wherever planted. Compact plant has a 12-20" spread making it an ideal plant for tight spaces and landscapes. Early flowering. **Annual**

46466 pkt (20 sds)\$3.50

CRASPEDIA

Drumstick

SI 24" Bright golden yellow globe flowers on a long stem. Tough and durable heads make exceptional everlasting flowers. May also be used in fresh bouquets. Drying Time: Air dry 2-3 weeks. **Annual**

46626 pkt (25 sds)\$3.30

DAHLIA

Germ 7 days @ 70°. Cover seeds lightly. Keep soil moist but don't overwater. Branch freely but not recommended to pinch. 8-10 weeks before transplanting.

48641 pkt (15 sds).....\$6.00

SERIES

Pow Wow White ✂
ⓈⓂ 16-24" Drought tolerant, with loads of dazzling petals that surround a large cone. Truly a winner! **Perennial**
48658 pkt (15 sds).....\$4.40

Pow Wow Wildberry ✂
48651 pkt (15 sds).....\$4.40

EUCALYPTUS

Germ 10-21 days @ 75-80°. Soak for 24 hours to help soften the seed coat and encourage germination. Cover seeds lightly. 10-12 weeks before transplanting.

Moon Lagoon ✂
ⓈⓂ 21-30" Produces attractive, silvery blue-green foliage on well-branched, florist-quality stems. The colors of this variety are outstanding and take on a fresh look of traditional eucalyptus. Easy to grow, drought tolerant and deer-resistant. **Annual**
46713 pkt (20 sds).....\$3.30

flowers

Murray ✂

SI 28" Introducing another unique style of eucalyptus one of the most popular fillers for bouquets. An eye-catching display of large, oval-shaped, green-blue leaves. Does well in containers because of its compact growing habit. Do not cover seed. Light is required for germination. **Annual**

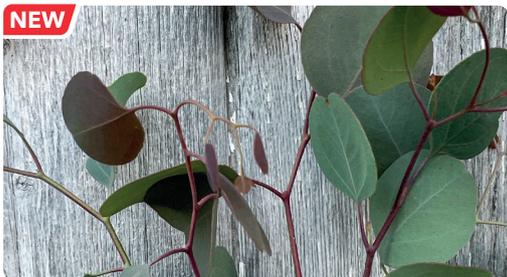

46709 pkt (20 sds) \$3.10

Silver Dollar ✂

SI 24-36" This tall plant has stiff, rounded, silvery green foliage known for its use in fresh or dried floral arrangements. Can be pruned to shape during the season. **Annual**

46581 pkt (15 sds) \$3.00

Silver Plate ✂

SI 24-40" Produces striking, round, silvery-blue leaves on reddish-green stems, perfect for fresh or dried arrangements. It thrives in full sun with well-drained soil. **Annual**

46721 pkt (15 sds) \$3.80

Small Leaved Gum ✂

SI 20-36" Wispy, cranberry stems covered with dark blue-green leaves are a must-have in bouquets! Each shrub provides loads of stems that can also be dried and used for winter décor. **Annual**

46706 pkt (15 sds) \$3.60

EUPHORBIA

Germ 10-14 days @ 65-75° For best germ, soak seeds in warm water for 8 hours or nick the seed to speed up germination. 6-8 weeks before transplanting.

Snow on the Mountain ✂

SI DS 12-36" Productive, elegant filler for bouquets. Grown as much for its foliage as for its flowers, the leaves may be light green, variegated or entirely white. Prefers full sun, but can tolerate some shade. Cover Seed. Can also be direct seeded after last frost. Self-sowing annual. Wear gloves when handling, as the sap may cause dermatitis. **Annual**

46769 pkt (35 sds) \$2.60

EVENING PRIMROSE

Start indoors 8-10 weeks before planting outdoors.

Evening Primrose Dwarf

DS 8-12" Large lemon yellow flowers unfold while you watch. Great attraction for everyone on a summer eve. **Perennial**

46781 pkt (20 sds) \$2.60

47334 pkt (50 sds)\$4.50

Garuda Yellow ✂

47338 pkt (50 sds)\$4.50

flowers

Guardian Yellow

NEW **SI DS** 24" Bright golden blooms on sturdy plants that attract pests like thrips away from veggies. Great for garden borders and natural pest control.

How to use Guardian marigolds as thrip traps:

Guardian marigolds act as trap plants, intercepting thrips before they reach your main crop.

When combined with predatory mites and fungal agents, they form a self-sustaining ecological control system.

Start marigold seeds 4-6 weeks before planting vegetables like tomatoes or peppers.

Place marigolds in clusters (2-3 per spot) every 6-10 feet in rows or garden bed or plant 1 row of marigolds for every 3 to 5 rows of the main crop, especially near young plants.

Since thrips are highly attracted to marigolds and often appear on them up to 2 weeks earlier than on sticky traps, makes marigolds an excellent early-warning system and keeping them off your main crops.

If a marigold shows heavy thrip damage, pull and compost it, then replant. **Annual**

47297 pkt (50 sds)\$4.30

SERIES

Janie Bright Yellow

SI DS 8-10" Early and uniform plants with 2" double crested flowers. Very showy in borders, excellent vigor in warm temp. These French marigolds may be used for insect repellent. **Annual**

SI 6" Vigorous growth with masses of flowers that cover the plant. Freely blooms all season long. 24-48" spread, with its trailing habit it is an excellent choice for landscapes and gardens. **Annual**
47796 pkt (15 sds) \$4.50

PHLOX

Germ 10 days @ 60-65°. Cover seeds lightly. Needs darkness to germ. Maintain even soil temp. Can also be direct seeded outdoors in early spring. 6-8 weeks before transplanting.

Blushing Bride

SI 16-20" Clusters of super-soft blush-colored blooms with a slightly darker eye combine to create an antique appearance, reminiscent of the Victorian era. An old-fashioned cottage garden favorite with abundant, highly fragrant flowers. The scent resembles lilac combined with melon. **Annual**
47818 pkt (50 sds) \$2.40

Popstar Mix

SI 10-12" Naturally dwarf plant delivers a fantastic show of unique, star-shaped single and bicolor blooms. Quickly transform a border into a galaxy of tiny star-like blooms in bright colors. Easy to grow and perfect for containers, bed, borders, and rock gardens. Mix includes red, white, purple, rose with eye, and blue. **Annual**
47811 pkt (20 sds) \$3.30

POPPY

Germ 10 days @ 65°. Do not cover seeds. Maintain even soil temp. 6-8 weeks before transplanting. Direct seed outdoors early spring.

Angel Choir

SI DS 24-30" If you have a hard time choosing only one poppy to grow, this mix is a wonderful option. Popping out of lush green foliage, the flowers bloom in soft colors ranging from whites to pastels. Easy to grow in borders or large containers. **Annual**
47841 pkt (50 sds) \$2.50

SERIES

Champagne Bubbles Pink

SI DS 12-20" Lovely 3-5" blooms are borne on sturdy, straight stems. Productive plants produce uniform, crinkled, cup-shaped blooms that sparkle and float above clumps of soft, gray-green foliage. **Annual**
47864 pkt (40 sds) \$2.90

Champagne Bubbles Scarlet

47859 pkt (40 sds) \$2.90

Supreme

SI DS 24-30" This mix of white, scarlet, soft pink, and watermelon-orange blooms are sure to steal the show. Flowers bloom on top of fuzzy stems. As soon as one flower fades, another comes up for continuing blooms all summer long. Pollinators love them too. **Annual**
47851 pkt (35 sds) \$2.90

PORTULACA

Germ 4-8 days @ 70°. Cover seeds lightly. Maintain even soil temp. 6-8 weeks before transplanting. Can easily be direct seeded.

SERIES

Happy Hour Mix

SI DS 8-10" Well suited for hot, dry, full sun locations. Large semi double flowers are earlier than others. **Annual**
47881 pkt (40 sds) \$2.40

Happy Hour Pink Passion

47886 pkt (30 sds) \$3.10

PTILOTUS

Germ 5-7 days @ 76-80°. Maintain moderate soil moisture. 6-8 weeks before transplanting.

Matilda

SI 26" Ornamental silver-green foliage with fat, feathery, bottlebrush-shaped flowers in shades of silver-pink. Grow as a cut flower or plant in containers for an eye-catching addition to your patio. Heat and drought tolerant. **Annual**
47906 pkt (15 sds)..... \$6.10

RANUNCULUS

Germ 23-30 days. Sow seeds and press gently into soil. Ranunculus seeds germ best in cool temps (50-60°). Keep out of direct sunlight and always moist. 12 weeks before transplanting.

SERIES

Bloomingdale II Mix ✂

SI 10-14" Showy, 3-4", peony-like flowers are surrounded with beautiful green, fern-like leaves. Their upright, compact plant habit makes it an ideal to plant in a pot. Cover seeds lightly. Deadhead to encourage new blooms. **Annual**
47938 pkt (15 sds)..... \$3.70

Bloomingdale II Pink Shades ✂

47944 pkt (15 sds)..... \$3.70

Magic Mix ✂

SI 6-8" Ranunculus are among the most beautiful flowers! Dwarf mounding plant with multi-petaled blooms. Does better as a container plant. It will thrive in the cool of spring but will be done when temps begin to warm up. Makes a great houseplant when grown in indirect light. Mix range in colors of red, rose, orange, yellow, pink, and white. **Annual**
47931 pkt (15 sds)..... \$3.60

RUDBECKIA

Germ 20 days @ 60° night and 70° day. Pre-chill seeds 5 days before sowing. 6-8 weeks before transplanting.

Autumn Colors ✂

SI 20" Sturdy stemmed plants with vivid combinations in fall colors. Large 5-7" blooms put on a show all summer long in landscapes and beds. **Annual**
47951 pkt (25 sds)..... \$3.00

Cherry Brandy ✂

SI 20-24" Combine Cherry Brandy with Rudbeckia of other colors, or do a mass planting for red blooms all summer. Long lasting flowers are perfect for bouquets from early summer straight into fall. Excellent food source for bees and butterflies. **Annual**
47956 pkt (20 sds)..... \$3.10

Denver Daisy ✂

SI 22-26" An eye catching, big bloomed Rudbeckia. Bi-color 7" blooms adorn well branched plants. Distinct ring surrounds the dark eye. Deadhead to increase blooms, will reseed. **Annual**
47961 pkt (20 sds)..... \$3.00

Goldsturm ✂

SI DS 24-36" Heat, drought and disease resistant plants are ideal in hot summer beds. Easy care, golden yellow flowers, attracts butterflies. **Perennial**
48851 pkt (40 sds)..... \$2.30

Indian Summer ✂

SI 36" Huge golden 6-9" semi double & single yellow flowers with dark brown centers for a touch of summer. Blooms July to frost. Easy to grow. **Annual**
47966 pkt (35 sds)..... \$2.70

SALVIA

Germ 12-15 days @ 70-75°. Do not cover seeds, needs light. Maintain even soil temp. Does not tolerate cool temp. 6-8 weeks before transplanting.

Adora Blue

SI 15-18" Early and floriferous with long lasting upright flower spikes of deep violet blue. Blooms May to June of the first year. **Perennial**
48941 pkt (30 sds)..... \$2.60

Big Blue ✂

SI 24-36" A vigorous flowering annual, continuously sending out clear blue spire. Takes little to no extra care and performs well in heat and low water conditions. Attracts hummingbirds, bees, and butterflies. Is an excellent item for border plantings. **Annual**
48001 pkt (15 sds)..... \$4.60

New Dimension Rose

SI 8-10" A compact, well branched flowering perennial that has long lasting blooms throughout the summer. Rose color is intense and showy. **Perennial**
48946 pkt (25 sds)..... \$2.70

WILDFLOWER BLENDS

WILDFLOWERS

Creating your own little wildflower area is great fun and can provide lots of enjoyable surprises when the blooming starts. Here are a few tips to help get wildflowers established.

#1. Remove existing weeds by spraying or tilling. It is best to wait a week or two and let the existing weed seeds sprout than till again before seeding. #2. Broadcast seed and cover with row cover or straw rolls. Wildflower seeds will germinate over a 2-3 week period and soil surface must be kept moist just like grass seed.

Annual Mix Cut Flower ✂️

A Wildflower mix that should provide lots of cheery bouquets. Children love to cut wildflowers so help them get started with this annual mix that blooms mid-summer to frost.

Contains: Aster, Pot Marigold, Bachelor Button-Polka Dot Mix, Godetia, Clarkia, Plains Coreopsis, Cosmos - Dwarf Sensation, Chinese Forget Me Not, Larkspur, African Daisy, Poppy - Mission Bells, Annual Gaillardia, Baby's Breath, Sunflower, Strawflower, Candytuft, Tree mallow, Alyssum - Tall Sweet, Evening Primrose, Shirley Poppy, California Bluebells, Black Eyed Susan, Catchfly, Marigold, Zinnia.

Bee Butterfly Mix

With its abundance of nectar-rich blooms, the Butterfly & Bee Wildflower Mix can be planted to attract beautiful pollinators in any region of the country. Containing 16 annual and perennial wildflowers including Wild Cosmos, Rocket Larkspur, Echinacea and Catchfly, this diverse blend delivers stunning color throughout the season. A great choice for a variety of soil types, this mix contains only 100% pure, non-GMO seeds. 1 lb. covers 2,500 sq ft

50055 1 oz. \$3.80 50057 ½ lb. \$16.40
 50056 ¼ lb. \$8.90 50058 1 lb. \$30.90

Beneficial Insectary Blend

Beneficial insects are a natural army of pest control allies and it is important to provide them with suitable living conditions. We have selected this seed mix for beneficial insect habitat and have included plants which are proven hosts to specific beneficials such as predatory mites and wasps, ladybugs, lacewings, syrphids, tachnids, predacious beetles and many more. By creating a safe haven and nectar source for these insect allies they will clean your garden of many pests before you even know they're there. Plant small pockets throughout your rows and at the edge or border of your garden. Ideally have a row or border to leave undisturbed for insects to overwinter and to lay eggs. Excellent living mulch for under fruit trees, grapes and berries. Contains White Yarrow, Candy Tuft, Tidy Tips, Baby's Breath, Alyssum, White Dutch Clover, California Bluebells, Baby Blue-Eyes. Perennial mix 1 oz. covers 100 sq. ft

SEED

Arugula

Arugula is easy to grow and grows fast as a microgreen. It's a favorite and generally considered a staple of the spicier side of microgreens and baby salad greens. The peppery taste gets less intense as it grows bigger. Harvest when the look and the flavor is to your liking. Begin sampling the greens when the first set of leaves form to determine when to cut!

80743 ¼ lb. \$5.30 80746 5 lb \$36.60
 80744 ½ lb. \$7.80 80747 25 lb \$152.00
 80745 1 lb. \$10.30

Rainbow Radish Mix

Radish microgreens are substantial, crunchy and taste just like mild radish. Very easy and fast growers. Impressive mix of colors makes a great choice to add color and pep to any salad, slaw or sandwich. A robust blend of different radishes gives a kick to any dish.

81183 ¼ lb. \$5.00 81186 5 lb \$30.40
 81184 ½ lb. \$7.00 81187 25 lb \$123.50
 81185 1 lb. \$8.90

Red Kale

Try this vibrant kale microgreen with dark green leaves and variegated stems of pink, floral purple, and at times, bright red. Growing kale microgreens is quite easy. It has a pleasant flavor: nutty and robust, similar to mustard, only less spicy! Kale is an extremely nutrient-dense food source. With microgreens you can receive all of the health benefits of kale and avoid the sometimes bitter taste that comes with full grown kale.

81143 ¼ lb. \$6.00 81146 5 lb \$48.20
 81144 ½ lb. \$9.20 81147 25 lb \$205.50
 81145 1 lb. \$12.80

Rainbow Blend

Zesty, spicy, and slightly sweet, each of these microgreens offers a different flavor profile while complementing all others in the mix. Use them in salads or as garnish or topping for any savory dish. And it tastes as good as it looks!

80763 ¼ lb. \$7.80 80766 5 lb \$76.80
 80764 ½ lb. \$12.60 80767 25 lb \$338.00
 80765 1 lb. \$19.10

Red Beet

Beet microgreens have beautiful variegated stems and leaves with an earthy, almost sweet flavor. For best results, presoak beet seeds 6-8 hr. Grow beet microgreen seeds in potting soil and bury with a thin layer of soil. There are so many health benefits (including powerful detoxifying and antioxidant properties) in these tiny, yet powerful plants. Cut close to the soil line to feature the red stem and add to salads.

80733 ¼ lb. \$5.90 80736 5 lb \$45.50
 80734 ½ lb. \$8.90 80737 25 lb \$193.00
 80735 1 lb. \$12.20

Wheatgrass

This green is regarded as a superfood; high in nutrients, and an excellent source of vitamins and minerals. Grow in your kitchen and consume as a juice or add it to your smoothies. Harvest when the shoots are 4-6" tall.

81193 ¼ lb. \$3.80 81197 5 lb \$10.40
 81194 ½ lb. \$4.60 81198 25 lb \$39.20
 81195 1 lb. \$4.50

Borage

Borage microgreens seed is a moderate to easy microgreen to grow. It may just take a little patience but these borage seeds will produce immensely healthy microgreens with succulent stems. Looking for cucumber microgreens? You've found it. Borage has a refreshing cucumber flavor—sometimes referred to as "the cucumber microgreen", even though they aren't related.

80753 ¼ lb. \$16.60 80756 5 lb \$240.50

 80755 1 lb. \$53.70

SPROUTING SUPPLIES

TOOLS

FRESHLIFE 3000
(Shown with extra barrels)

FRESHLIFE 3000

FRESHLIFE 1000

Fresh Life 1000 (manual)

Hand watering with a faucet sprayer will produce top quality crops of sprouts. Includes sprout barrel, top lid, and upper and lower tray. No power source needed.

80921\$68.60

Fresh Life 3000

Use with electric or 12 volt battery and inverter.

Features: Automatic watering, water for five minutes three times per hour, expandable up to three growing levels, user controllable water pressure, no seed pre-soaking necessary, detachable plug, power switch, BPA-Free, no plumbing hook ups, no soil, no jars, no hassle. Sprouts are baby plants in their prime. According to experts, at this stage of development they have a greater concentration of proteins, vitamins, minerals, bio-flavinoids, T-cells, etc. than at any other point in the life of the plant. There is virtually no loss of nutrients because they are eaten the day they are picked. Just add water and seeds! No soil, no special light, no green thumb needed. Seeds have the ability to sprout 7-15 times their weight, which makes them very economical to grow. (1 year warranty)

80922\$186.50

Sprout Topper

Durable plastic lid with mesh holes big enough to drain well but well enough to hold tiny seeds such as alfalfa! Buy more than one lid and rotate your crops every few days to assure you always have a steady supply of sprouts. (Fits wide-mouth jar)

80999 \$4.80

NEW

Sprouting Lid with Stand . Stainless Steel

Durable stainless steel sprouting lid for Wide Mouth jars, featuring an integrated stand for easy drainage. Designed to resist rust and breakage for long-lasting use.

80996 \$6.50

Deluxe Kitchen Crop Sprouter

You don't need a green thumb to easily grow nutrient dense sprouts at home. Kitchen sprouter has four trays allowing you to grow a variety of sprouts at one time. 6" diameter stackable sprouting trays with moisture control lid and drain basin.

80912 \$18.90

Extra Sprouter Barrel

Can't raise enough sprouts for your crew? Consider using the extra barrels and triple your quantity. Sprout barrels will stack with the connecting water tubes. Sprinkle and rinse three times the amount with no extra effort. Each barrel yields approximately 2 qt. at harvest. Eat to your health!

80916\$55.20

SEED

Alfalfa

Many times more nutritious than lettuce. Mild, crisp, fresh, new taste will add flavor and texture to salads and sandwiches. . Customer favorite!

80775 ¼ lb \$4.40 80777 1 lb \$11.50
80776 ½ lb \$6.80

Mung Bean

Crunchy texture and firm structure makes this ideal for stir frying. Contains quality protein, iron and potassium. Sweet flavored.

80816 ½ lb \$4.10 80817 1 lb \$5.50

Red Lentils

Tiny disk shaped legume with a hearty, nutty flavor perfect for snacking. Great for eating fresh or to be used in any cooked dish. Rich in iron and minerals. A complete protein in itself.

80856 ½ lb \$4.00 80857 1 lb \$5.30

Broccoli

Loaded with nutrients, known to be cancer fighting. Rich, peppery broccoli flavor that will add extra spice and a delicious taste to any dish.

80785 ¼ lb \$4.50 80787 1 lb \$12.10
80786 ½ lb \$7.30 80787 1 lb \$11.80

Purple Kohlrabi

Light kohlrabi flavor with colorful stems adds attraction to your salads. Add a crunch and classic spicy flavor to sandwiches or any of your favorite dish. Enjoy the health benefits of B-complex, vitamin C, and more in these tiny sprouts!

80826 ½ lb \$6.20 80827 1 lb \$9.40

Sunflower

Rich source of Vitamin D and Lecithin. Unique crunchy texture, thicker stems, more volume. Ready in 6-7 days. If you like the nutty sweet flavor of sunflower seeds, you will enjoy these. Hulls need to be removed for leaves to fully open.

80866 ½ lb \$6.40 80867 1 lb \$9.60

Crimson Clover

Not just for rabbits anymore! With it's sweet mild taste clover sprouts are a healthy, low-calorie, and nutritious complement to any soup, sandwich, and salad. More fullness than Alfalfa, good all purpose sprout.

80796 ½ lb \$4.90 80797 1 lb \$7.30

Radish

All the hot and spicy characteristics of the radish itself. Add zest to your salads! Radish sprouts are a gourmet complement to many traditional dishes and are a great low-calorie source for calcium, potassium, and Vitamin C.

80836 ½ lb \$5.00 80837 1 lb \$6.90

Green Pea

Good source of fiber, protein, and minerals. They have a mildly sweet flavor, similar to peas picked fresh from the garden. Will add a delightful crunch to any recipe, try them in stir fry's or sautéed with onions and mushrooms

80806 ½ lb \$3.60 80807 1 lb \$4.60

Red Cabbage

Flavored just like chinese cabbage from the garden. Sprouts have a great taste that can be used in salads, sandwiches and your favorite recipes. Make them a part of your daily diet to benefit from the health benefits they provide.

80846 ½ lb \$10.40 80847 1 lb \$17.80

LAWN & LANDSCAPE

Keys to Success for New Lawns

1. Add lime if needed and till soil 3-4" deep.
2. Rake out large clumps and stones, leaving approximately 3/4" loose tilth on top.
3. Spread seed at 6-8 lb. per 1000 sq. ft.
4. Roll with 1/2 filled lawn roller. Seed needs to be bedded firmly into soil for quick and uniform germination.
5. Cover with weed free straw, or 1/4" fine compost.
6. Water heavily, 4-6" deep the first time. Follow-up watering needs to be done on a daily basis. Soil surface should not dry out for 14-16 days. Use a sprinkler and a water timer to insure this important step is not neglected.

LAWN SEEDS

Landscapers Mix

Introducing our Landscapers Mix Grass Seed, the perfect blend for a lush, vibrant lawn that stands the test of time! This premium mix contains a carefully selected trio of grass varieties: Perennial Ryegrass, Kentucky Bluegrass, and Creeping Red Fescue. Each type brings its unique strengths to create a robust, beautiful, and easy-to-maintain lawn.

Maximum planting depth: 1/4"-3/8"

Seeding time: Feb-May & Aug-Oct 20th

Approximate germination time: 7-28 days

55077	5 lb	\$19.00		5
55078	10 lb	\$35.30		10
55079	50 lb	\$154.00		50

TOP PICK

Plush Carpet Blend

Dark green, disease resistant and tolerant to drought. Thrives with less care and watering than Showplace Mix. Fast germinating and easy to mow, this Kentucky Blue, Perennial Rye, Lawn Fescue mix is a good economical choice for people that want a nice lawn at a fair price. For the best results sow at 6-7 lb. per 1,000 sq. ft. 250 lb./acre

Days to germination: 5-14 days

55026	1 lb	\$6.80		
55027	5 lb	\$20.90		5
55028	10 lb	\$38.60		10
55029	50 lb	\$181.50		50

Playmakers Blend

This barefoot friendly mix is the number one choice for lawns trampled by games and other backyard activities. This blend is drought tolerant, thrives with little water or fertilizer, and has good resistance to turf grass diseases. A soft grass blend of 80% fine bladed perennial fescue, 10% bluegrass, and 10% perennial rye grass. If you want a good quality lawn that greens up quickly, try Playmaker Mix. 6-7 lb. per 1000 sq. ft.

Days to germination: 5-14 days

55086	1 lb	\$7.00		
55087	5 lb	\$22.90		5
55088	10 lb	\$42.80		10
55089	50 lb	\$198.50		50

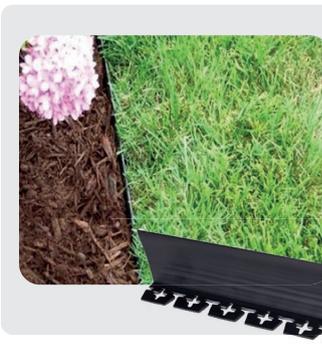

Shady Blend Mix

Especially adapted to shady areas. This mix will also compete well with tree roots for those areas that are hard to keep in good condition. Contains a higher percentage of shade-loving Fescues along with Perennial Ryegrass, and Kentucky Bluegrass. 6-7 lb. per 1000 sq. ft.

Days to germination: 7-21

WEED CONTROL

4 Speed XT Weed Killer

Liquid

If you want results, use this commercial form of lawn weed control. Selective Herbicide combines four active ingredients, triclopyr, 2,4-D, pyraflufen and dicamba for a powerful and fast control of more than 100 broadleaf weeds. As a fast acting and effective weed killer, you will start to see symptoms of injury to the weeds with 1 - 2 days of application even in hard-to-kill weeds, such as oxalis, spurge, wild violet and wild geranium. To minimize drift, use a medium or coarser spray nozzle. :: Application Rate: approx. 1,000 sq. ft. Mixing Rate: 1.1 - 1.5 fl. oz. per gal. of water.

67203 32 oz (concentrate) \$46.30

Pasture Pro Broadleaf Weed Killer

Liquid

For those tough weeds in your pasture that you'd like to get rid of but don't want to worry about keeping animals off for a while, this does the job. Eliminates 125+ species of weeds and brush. NO waiting period after spraying once spray has dried. :: Application Rate: 1 qt concentration treats 1/2 - 1 acre.

67406 32 oz \$30.90

HyR Brix Lawn

Trimec Broadleaf Herbicide

Liquid

This product is also effective and great to use for hard to kill weeds, with no repeat application required. The Trimec Classic Broadleaf Herbicide's active ingredients have a synergistic action which makes it an economical product to use and treat more acres better than any other 3-way product. Provides broad spectrum broadleaf weed control in a homeowner formulation. Kills hard to control lawn weeds. Designed for application to cool season grasses. Use on Kentucky bluegrass, Bermuda grass, perennial ryes, fescues, and more. Concentrate. Mixes with water. :: Application Rate: 1 pint covers up to 4000 square feet. Mixing Rate: 1 - 4 oz. per gal.

67495 32 oz (concentrate) \$19.70

Weed Out With Crabgrass

Liquid

Controls over 200 plants. Commonly used on lawns, orchards and pastures. Controls both grassy and broadleaf plants in one easy step, including: crabgrass, barnyard grass, foxtail, black-eyed susan, buttercup, catnip, chickweed, dandelion, dollarweed, ground ivy, jimsonweed, morning glory, poison ivy, poison oak, ragweed, sunflower, thistle, and other broadleaf weeds. Rainproof after 1 hr. :: Mixing Rate: 2 oz. per gal. Application Rate: One pint is enough to cover up to 2,500 sq. ft.

67505 16 oz (concentrate) \$18.50

Outstanding Benefits FOR THE SOIL, CROP AND GROWER

- » Increases organic matter content
- » Increases earthworm activity
- » Increases the soil's plant-available nitrogen
- » Stabilizes the soil to prevent erosion
- » Brings deep rooted minerals to the surface
- » Provides habitat for beneficial insects
- » Improves root and air penetration in the soil
- » Increases the soil's moisture-holding capacity
- » Chokes out weeds
- » Breaks up subsoil and plowsoles
- » Reduces populations of pest organisms

We Recommend

Biological Inoculant

Legumes, such as bean and peas, enrich the soil through the process of nitrogen fixation. Rhizobium bacteria are able to capture atmospheric nitrogen and transform it into a plant usable form.

61073 pkt (treats up to 4lbs).....	\$3.80
61074 6 oz (treats up to 50 lbs).....	\$8.10

Annual Ryegrass

Ryegrass roots create a vast root system that improves the texture and the amount of organic matter in the soil structure. The population of earth worms and microbes increases, which takes care of most ryegrass surface residual matter during the growing season. Access to deeper soil also allows crops to mine nutrients previously trapped beneath compacted layers. Annual Ryegrass roots break through soil compaction to reach deep water and nutrients. It leaves improved soil structure and increased organic matter in its path. If planted in fall 6-8 weeks before the first killing frost, it will survive the winter and provide a green manure for spring. Later planting will help winter-kill if so desired. Sow at $\frac{3}{4}$ lb per 1,000 sq ft. 25-30 lb per acre. **Annual**

54007 5 lb	\$9.50	
54008 10 lb	\$16.20	
54009 50 lb	\$58.30	
54010 250 lb.....	\$280.00	
54011 2,000 lb.....	\$2,178.00	

Annual Soil Buster

A great blend designed specifically for home gardens. Can be broadcasted any time after August 15. This mix adds organic matter, fixes nitrogen, recycles nutrients, improves soil biology, smothers weeds, and winter kills. Germinates best if area is raked or dragged a little after planting. Running your tiller through with the tines disengaged works well, as does dragging with a pallet or old box springs. Mix includes Winter Pea, Cow Pea, Oats, Crimson Clover, Radish, Sunn Hemp, Phacelia. 2-3 lb per 1000 sq ft. **Annual**

54047 5 lb	\$10.70	
54048 10 lb	\$18.70	
54049 50 lb.....	\$70.90	
54050 250 lb.....	\$340.00	
54051 2,000 lb.....	\$2,646.00	

Buckwheat

For summer green manure. Sow in late May through July and till in about a month later when flowering has begun. Non-legume broad leaf does not fix Nitrogen, but is one of the best hot weather cover crops because of its ability to produce organic matter and smother summer weeds (Canada Thistle, Quackgrass, Nutgrass, etc.) quickly. Also accumulates insoluble phosphorus and, when turned under, releases it to the soil in plant-available form. It attracts beneficial insects, and grows to maturity in 30-45 days, so 2 to 3 plantings can be sown in one summer. Annual, will winter kill. Mature height varies with soil quality, from 8" to 3'. Sow 3 pounds per 1000 square feet. Price subject to change. **Annual**

54077 5 lb	\$10.60	
54078 10 lb	\$18.60	
54079 50 lb.....	\$70.10	
54080 250 lb.....	\$336.50	
54081 2,000 lb.....	\$2,619.00	

Fall Green Manure Mix

Fast-growing green manure mix for late summer and fall planting. This ready-made mix is comprised of winter rye, field peas, ryegrass, crimson clover and hairy vetch. Vigorous late summer growth provides winter erosion control. The peas, clover and ryegrass will winter kill to provide organic matter and soil cover. The hairy vetch and winter rye will regrow in the spring to provide nutrients for crops to utilize. Because the seeds of this mix vary in weight and size, it is best seeded, then raked in. Sow at 1- $\frac{1}{2}$ lb/1000 sq ft. (50 lb/acre). **Perennial**

54177 5 lb	\$10.40	
54178 10 lb	\$17.90	
54179 50 lb.....	\$62.80

54181 2,000 lb.....	\$2,343.00	

Create your Own

Feel free to blend your own mixes. For example: Groundhog Radish, Buckwheat, and oats can be mixed together.

Black Plastic Tip

Turning under perennial cover crops such as rye or Fall Manure Mix can be a problem in wet spring weather. Try this idea: spread a sheet of black plastic as large as you need right on top of your green cover crop in early Spring (March 15.) Secure the edges well and leave in place for 5-6 weeks. This works out well with the timing of main planting. The sun heats up the plastic and soil, and the cover crops disappear. Earthworms and soil microbes explode on the abundant food provided by the decaying cover crop. Plastic can be folded and reused for vine crops. We tried this with great success.

Groundbreaker Mix (N-Vest)

A powerful blend of Austrian Winter Peas and Groundhog Cover Crop Radish, this mix is designed to improve soil health by fixing nitrogen and breaking up compacted, heavy soils. Austrian Winter Peas are excellent nitrogen producers, yielding 90-150 lb/acre, and are more cold-hardy than common pea varieties. They also contribute up to 5,000 lb/acre of dry matter, building soil organic content. Groundhog radish produces a deep taproot that naturally drills through tough soil layers. As the roots decompose over winter, they leave behind open channels that improve water infiltration, air flow, and overall soil structure. For best results, sow before September 1, right after removing sweet corn, tomatoes, or vine crops. Lightly rake or cover to ensure good seed-to-soil contact. This mix will winter kill. Sow at 1 lb per 1,000 sq ft. or 37 lb per acre. **Annual**

54247 5 lb	\$12.10	
54248 10 lb	\$21.40	
54249 50 lb	\$80.50	
54250 250 lb	\$382.50	
54251 2,000 lb	\$2,977.00	

Groundhog Radish

Groundhog Radish provides a deep aggressive root type that helps build soil tilth and percolation. Same variety that is in Groundbreaker Mix. These are edible if so desired. 12 lb per acre. **Annual**

54207 1 lb	\$5.70	
54208 5 lb	\$17.00	
54209 50 lb	\$133.00	
54210 250 lb	\$619.50	
54211 2,000 lb	\$4,824.00	

Medium Red Clover

A very versatile legume green manure. A tall quick-growing clover. Sow in spring, summer, or fall, alone or with rye at 1/2 lb per 1000 sq ft. Fixes 80+ lb of nitrogen per acre. Grows in poor soil and roots help break up tight soils. **Biennial**

54107 1 lb	\$7.40	
54108 5 lb	\$28.40	
54109 50 lb	\$247.50	
54110 250 lb	\$1,186.00	

Miniature Clover

Standing only 4-6 inches tall, Miniature Clover creates a lush, green carpet that's incredibly low-maintenance and drought-tolerant. Ideal for use as a beautiful lawn alternative, it provides excellent erosion control and improves soil health by fixing nitrogen. Additionally, it makes a superb cover crop, enriching your soil with minimal effort. Grows in zones 3-10

Plant Time: Late February through mid September.
Seed Rate: New Seeding (Spring or Fall): 1-2 lbs covers 1,000 sq ft.

Sow Depth: 1/8" - 1/4" Perennial		
54151 1/4 lb	\$9.30	
54152 1/2 lb	\$16.00	
54153 1 lb	\$26.70	
54154 5 lb	\$111.00	
54158 10 lb	\$219.00	
54159 50 lb	\$1,073.00	

Mustard Caliente 199

Mustards have bio-fumigation and allelopathic effects in soil. Mowing or chopping them down just prior to full bloom and tilling or plowing into the soil can reduce the amount of harmful nematodes and disease pathogens in the soil profile. While this is not a silver bullet to cure all disease problems, it is well worth using in a cover crop rotation. Wait 14-16 days after incorporation before planting any following crop. Caliente 199 Mustard produces excellent biomass with the highest bio fumigation potential available. Contains ISCI 99, with the highest glucosinolate level of any commercial variety. Excellent disease, weed, and nematode suppression in many crops. Allow 6-7 weeks from planting to chopping into soil. Seeding rate: 9-11 lb/acre. 4-6 oz per 1,000 sq ft. **Annual**

54276 1/2 lb	\$7.00	
54277 1 lb	\$12.20	
54278 5 lb	\$49.50	
54279 50 lb	\$437.50	
54280 250 lb	\$2,097.00	

Oats

Fast growing cover crop can be used in spring and fall. Provides a quick cover to prevent erosion and control weeds. If sown in early spring, it can also help use up excess moisture allowing soil to be worked up to a week earlier. Certified weed-free seed. Will winter-kill. 5-6 lb per 1,000 sq ft. **Annual**

54307 5 lb	\$6.70	
54308 10 lb	\$10.60	
54309 50 lb	\$28.10	
54310 250 lb	\$135.00	
54311 2,000 lb	\$1,048.00	

Purple Top Turnips

A 6" nearly round, purple red upper root, creamy white lower part, suitable for freezing. A light frost enhances flavor. Young tops can be cooked like mustard greens.

36009 50 lb	\$222.50	
36008 5 lb	\$26.80	
36007 1 lb	\$7.30	

White Clover

Low-growing perennial will thrive in poor soil, spread rapidly, and choke out weeds. High nitrogen fixation. Attracts beneficial insects and bees. Sow under cole crops and in corn rows, under fruit trees and berry plants as a living mulch. Can be mowed off and tilled under in fall. Sow at 1/4 lb per 1000 sq ft. **Perennial**

54146 1 lb	\$10.20	
54147 5 lb	\$38.70	
54149 50 lb	\$351.00	
54150 250 lb	\$1,682.00	

Winter Rye (Common)

Hardest winter cover crop to prevent soil erosion and add organic matter. If rye grain or straw is desired, sow in fall for midsummer harvest. For green manure, sow anytime spring through midfall at 4-6 lb/1000 sq ft. 180 lb per acre. **Perennial**

54347 5 lb	\$6.50	
54348 10 lb	\$9.90	
54349 50 lb	\$24.40	
54350 250 lb	\$117.00	
54351 2,000 lb	\$910.00	

Cover crops, also known as green manures, are one of the cornerstones of ecologically sensible agriculture.

HIGH SCORE

Wildlife Food Plots

Cave In Rock

Cave-N-Rock Switchgrass is a perennial warm season grass, great for establishing cover for wildlife. It is a good addition to your hunting setup for deer. Cave-N-Rock switchgrass will reach 6 feet tall at maturity and typically grows from 3-6 feet tall depending on soil environment. While it can take some time to establish, once established and with proper maintenance (Mowing/Burning) it will last a lifetime. Cave-N-Rock switchgrass can adapt to a wide variety of growing conditions and has an extensive root system that provides great soil erosion control.

Seed Rate: 5 lb per acre

Seed Depth: 1/4" - 1/2"

Easy Screen Blend

Ever wish you could get to and from your favorite tree stand without disturbing the deer feeding on your plot or funneling deer closer to your tree stand? Easy Screen Blend is capable of growing 10-14 feet tall in a few months and can help you get into the stand undetected. Planting around the border of a food plot will also help give deer a sense of security, making them more comfortable to feed in daylight hours. With some planning, you can plant in areas where you may want to place a ground blind later in the season, providing additional hunting opportunities for unfavorable wind conditions.

10 lb bag will seed a screen 8 ft wide by 1,250 ft long

Plant Time: late May through early August

Seed Rate: 1 lb covers 1,000 sq ft

Sow Depth: 1/8" - 1/4"

Ingredients:

Egyptian Wheat

Egyptian Wheat is a member of the sorghum family and produces long, slender stalks that reach 7 to 10 ft in height with large seed heads. Use Egyptian wheat to provide screening and cover around food plots or direct deer past your bow stand by creating pinch points. Generally not considered a food source. Plant after danger of frost has passed; does best on fertile well-drained sites receiving full or lightly filtered sunlight. May need extra nitrogen and potassium for maximum growth and stand-ability.

Plant Time: April/May

Seed Rate: 1 lb covers 4250 sq. ft.

Sow Depth: 1/2" - 3/4" **Annual**

Forage Oats Plus Mix

This annual grain mix serves as an excellent standalone option for both food and cover. Additionally, it proves to be a valuable companion crop when planted alongside other food plot seeds. The blend consists of rapidly growing Forage Oats, complemented by Sweet Fall triticale and Forage Oats. The combination yields abundant forage during the fall, with the added benefit of triticale and wheat coming back in the following spring, providing food, and aiding in weed suppression until the spring planting of a new plot.

Plant Time: August/Early September

Seed Rate: 1 lb covers 425 sq ft

Sow Depth: 1/2" - 3/4" **Annual**

- 59127 10 lb \$16.20  10

Horse Hay Mix

We developed this mixture with horse owners in mind. When someone mentions horse hay, there are multiple opinions of what horse owners want. The horse hay mix is a balance between alfalfa and grasses. Many horses do not need pure alfalfa in their diet for many reasons. The alfalfa provides protein for the horse ration, but also nitrogen for the growing grasses. It is a win-win situation. This mixture can also be grazed. It is important to rotate the animals across this as the alfalfa will not tolerate overgrazing. One 50 lb bag will plant two acres.

Formulation: Alfalfa, Ryegrass, Timothy, Orchard Grass

56057	5 lb.	\$30.70
56059	50 lb.	\$281.00 🌱 50

ANCIENT GRAIN SEEDS

Rockside Einkorn

🌱 🌾 Einkorn is the oldest grain in history. It has a deep root system that helps the grain contains roughly 30% more proteins, manganese, riboflavin, zinc, magnesium, thiamin, niacin, iron and vitamin B6. It contains all of these essential nutrients while having 15% less starch translating to fewer carbohydrates than modern wheat. Many people that have gluten sensitivities have no problems with baked goods made with Einkorn grain. It is the primary grain we use for pizza crust, cookies, crackers, desserts that call for flour, and breads. When using it in bread some people like to add another grain that has a higher gluten content so you get the expected rise. Einkorn has a great flavor, especially when it is used in a recipe that has some sugar in it as well.

SEED STARTING & SAVING

Plant ID & Tools

Garden Marker

Felt tip, water resistant, fade proof permanent marker. Ideal for use on wood, plastic and metal plant and garden labels. Also writes on ceramic or glass. Removable from non-porous surface with rubbing alcohol.

61027 \$3.50

Potato Storage Bags

These paper bags with mesh windows are a great way to store your potatoes over winter. Available in 5, 10, 20 and 50 lb.

61160 5 lb (5 pk) \$3.00

61161 10 lb (5 pk) \$3.20

61162 20 lb (5 pk) \$5.60

61163 50 lb (5 pk) \$7.50

Garden Planner

This handy chart provides indoor and outdoor seeding dates for popular garden vegetables. It includes local spring and fall frost dates for the U.S. and Canada, with a sliding frost line for easy reference. Details cover seed quantities, planting depths, row and plant spacing, plus sunlight needs, minimum soil temperatures, and expected yields. A companion planting guide is also featured, making it an essential for gardeners and homesteaders alike.

61030 \$5.50

Gardener's Select Hand Sprayer

A versatile solution for both gardening and household tasks. Its comfortable design and efficient atomization makes it ideal for plant care, cleaning, and more. Adapt to any task with ease using this convenient sprayer.

61075 32 oz. \$5.20

Plant ID Stakes

These reusable plastic ID stakes are convenient, durable and economical. 3/4" wide in 4" or 6" lengths.

61098 4" .48 pk. \$3.80

61108 6" .48 pk. \$4.60

Plant ID Stakes (Metal)

A favorite for all perennials and of course for recording the name of every rose in the garden. Many growers use this style marker in display fields at blooming time to inform customers and visitors. Nameplate is tilted for easy reading. 10" tall.

61088 8 pk. \$5.50

Sharpie Marker

Ideal for label writing. Writes on metal, plastic, glass, paper, foil, or film.

61028 \$1.90

Soil Blocker

If you want to produce stronger and healthier plants from seed, soil blocking is well worth the effort. Environmental friendly and eliminates the need for plastic seed starting trays. Start with a fine potting soil, add water till the correct consistency and pack into the blocker. The block serves as the container plus the growing medium and can be planted outside once the plant is mature enough. 4 Cells.

65198 2" \$27.20

Dial Seed Sower

This handy seed sower has five different size seed openings so you can use it for a broad range of seed sizes. The compartment is easy to load and unload, and the durable design gives years of trouble-free seed sowing. Just fill, tap, and go! Then return unused seed to the package. Reduces the need for thinning, thus conserving precious seed.

61020 \$4.30

Mini Wand Seeder

Eliminate the frustration of uneven seeding. This great tool works with suction that allows you to pick up and release individual seeds right where you want them. Five tips included for all vegetable and flower seed sizes. No batteries or electric required.

61070 \$27.60

Seed Boosters

Basic H

A great plant based all-natural soap with lots of uses around the home and garden.

86724 32 oz. \$10.60

Root Dip Transplant

This water-holding gel has seven strains of beneficial mycorrhizal fungi to jump-start rooting and establishment. One packet will treat up to 50 raspberry plants or 300 strawberry plants. Mixes with one gallon water.

61120 3 oz. \$8.10

BIOLOGICAL INOCULANT

Keep out of direct sunlight and heat.
Instructions: Moisten seeds with non-chlorinated water. Mix inoculant with moistened seed until completely coated. Plant immediately.
Packet treats up to 4 lb. of seed.

Biological Inoculant

Legumes, such as bean and peas, enrich the soil through the process of nitrogen fixation. Rhizobium bacteria are able to capture atmospheric nitrogen and transform it into a plant usable form. Because not all soils contain these nitrogen fixing bacteria, dusting the seeds with inoculant can improve the yield of beans and peas, and provide free fertilizer for the following crop. For maximum benefit, mow off or till under plants. Do not pull out and throw away the roots.

61073 pkt (treats up to 4 lb seeds) \$3.80

61074 6 oz (treats up to 50 lb seeds) \$8.10

Rooting Powder

Start your own plants at a fraction of the cost. Dip snips and cuttings into this ready to use powder for fast and easy rooting of anything you wish to propagate. Directions on bottle.

61121 1.25 oz \$5.40

Soil Moist

A favorite among greenhouse growers! Water storing polymers reduce your plant watering by 50%, reduce transplant shock and soil compaction. Will absorb water and release back to the roots for more even moisture. Ideal for indoor or outdoor containers. Mix 1 Tbsp. into your hanging basket or container soil for season long benefits.

62661 8 oz. \$7.80

Potting Soils

Better Gro

A locally made superior potting soil that we highly recommend for containers and baskets.

Containers

SEED STARTING TIPS

Take a cardboard box or sheet and line it with tinfoil. Arrange it behind the seedlings on your windowsill and the extra light reflection will help them green up and grow nice and straight. Be careful not to overdo to prevent excessive heat build-up

GREAT FOR CUTTINGS!

Seed Starting Plug Tray

Start your seeds the way greenhouses and professionals do. Planting tiny flower, herb, and some vegetable seeds in too large a container can lower the quality of seedlings. This 200 hole plug tray is just right for seed starting and makes transplanting simple.

61110 200 cells..... \$2.40

Easy Start Q-Plug Kit

The Q-Plug with its all natural ingredients is used by commercial nurseries and homeowners throughout the world. It eliminates the need for messy bags, loose soil and mixing of soil amendments. With the Q-Plug, all you do is insert the seed or cutting, keep the plug moist, and maintain proper temperatures. The Q-Plug retains moisture and promotes fast, strong, root growth. We recommend this for cuttings and vegetable seed starting.

Kit includes: Seed Starting Tray . Solid, Clear Humidity Dome, Q-Plug Insert & Q-Plug Soil Plugs.

SOIL CARE

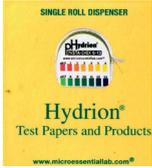

Soil Testing

Digital pH Meter

A handy little pH tester to check soil pH. While not as accurate as a lab test, it is good enough to check the soil pH for blueberries, hollies, tomatoes, etc. be sure to properly clean stem and follow directions for best results.

65019 \$17.00

pH Test Strips

Fast, convenient and accurate. Test the pH of water, saliva, slurries, and sprays. Accuracy range 4.5 - 7.5 in .5 increments. The best we have found. Use 2" for each test. 15' roll.

64029 \$13.00

Rapitest Soil Test

An economical, easy-to-use garden test kit that provides reliable results! 40 tests (10 each for pH, nitrogen, phosphorus, potassium.) Instructions included.

60280 \$15.40

Soil Sample Probe

Get a durable steel soil probe with a sturdy T-handle to easily push in for accurate and dependable soil testing every time. Open-end probes can take a 12" sample and empty easily through a slot cut in the side of the probe.

60330 \$57.00

Soil Sample Analysis

Proper soil fertility is the foundation for plant health. A soil test is one's best single guide in determining the strength of each link in the plant nutrient chain. The weak link sets the ceiling on crop yield potential. A soil test identifies the weak link or links.

A standard soil test will provide information on soil pH, cation exchange capacity (CEC), organic matter, lime requirements and base saturation. The soil test will also provide the status of phosphorus (P), potassium (K), calcium (Ca) and magnesium (Mg). Instructions:

- Dig 4-6 inches deep in 4 or 5 different locations for improved accuracy.
- Place a total of 2 cups of soil in a clean Ziploc bag
- Label the bag with the garden size in feet (approximate) and location the sample was drawn from; e.g. Garden or Orchard.

• Mail to: Berlin Seeds 5335 County Rd 77, Millersburg OH 44654

We will contact you once the results have returned.

Phosphorus, Potassium, Calcium, Magnesium & Sodium + Iron, Manganese, Zinc, & Copper, Nitrogen, Sulphur, Boron and soluble salts

Biochar

Biochar Soil Amendment

100% NATURAL

Biochar is produced in a way that creates high carbon levels and it is incredibly porous. These pores help retain water and provide a cozy home for micro-organisms to grow and store nutrients. Mycorrhizal fungi takes up residence in biochar and proliferates by abundant sporulation, sending whisker-thin hyphae out into soil to search for water and nutrients, pumping them back to fungi that lives in the biochar. Each bit of biochar becomes a host for bacteria and fungi, whose presence anchors the rest of the soil biology. Biochar thus becomes an active storehouse to stockpile essential nutrients. Their interactions provide a natural way to make nitrogen and other important elements readily available to the roots, increasing the cation exchange capacity of your soil. Studies have shown that the benefits of biochar include reducing the potential of disease in your soil. As the bacteria and fungi thrive so do the natural processes that make your plants grow.

- Supports soil microbial life and biodiversity
- Helps plants resist diseases and pathogens
- Improves fertilizer utilization, by reducing leaching from the root zone

Application Rate: Preload Biochar by mixing with compost or saturate with liquid product like Sea 90 Mineral.

Garden Soil: 1 cu/ft bag per 32 sq ft

Spread a light, even layer on your soil and till or rake into the top 4" of soil

60416 54 cu/ft \$840.50 500

Soil Care

100% NATURAL

Microbes

For Garden & Lawn

Soil Care is a 100% natural mix of 74 species of beneficial microbes bacteria, archaea, and fungi that plants must have for full health. Our proprietary mix of microbes strengthen the ecosystem in soils and other growing media. Plants can't directly consume most nutrition bound up in soil; they depend on microbes to process it for them, to make nutrients "bioavailable". Plants team with microbes to defend themselves against pests and pathogens such as blight, rusts, root rot, and harmful insects, to moderate pH and salinity and to improve water retention and soil aeration. Avg. use is 2 oz. per gal of water per 500 sq. feet.

Features:

- + Wide array of uses
- + Increases soil water-holding capacity
- + Functions within Horizon O and A soil layers
- + Tolerant of soil disturbance
- + Decomposes organic matter into rich carbon source
- + Rich in bacterial diversity, actinomycetes, and protozoa
- + Unlocks soil-bound nutrients
- + Contains plentiful nitrogen-fixing cyanobacteria and rhizobacteria
- + Dominant in endomycorrhiza but also contains some ectomycorrhiza
- + Genera includes Bacillus, Clostridium, Streptomyces, Azotobacter, Rhizobium, Azospirillum, Trichoderma, Rhizopogon

60341 16 oz \$26.30

60345 1 gal \$91.10 10

Compost

Bull Country Compost

100% NATURAL

Bull Country Compost is a nutrient dense soil conditioner produced from cow and horse manure. During production, compost is heated naturally, without the use of chemical enhancements, to 150 degrees for at least 72 hours to eliminate weed seeds and harmful bacteria. After 6-9 months of curing, the final product is screened to ensure a uniform, easy to spread product. Environmentally friendly and chemical free. Releases nutrients for 2 years after application.

60080 2 qt.....\$12.90

NEW

Deep Roots Soil Reviver

An all-in-one soil amendment formulated to revive depleted soils by restoring microbial life, enhancing nutrient availability. Blending composted organics, worm castings, biochar, sphagnum, humic acids, and beneficial microbes, it restores balance while improving structure, aeration, and moisture retention. It is ideal for mixing into garden beds, adding to potting mixes, or top-dressing around plants.

60077 2 qt.....\$15.90

Incred-A-Soil

ORGANIC

An incredible slow-release plant food and an alternative to commercial lawn fertilizer. Made from livestock manure and carbons (contains: straw, hay, and corn fodder). The manure is temperature monitored (between 130° - 150°) over a 16 week period before it's placed in consumer bags. Fabric covers are used to cover the material during composting to insure desirable moisture levels. This procedure ensures a high quality compost to provide the following benefits:

- + Quality fruits & vegetables
- + Loosens soils & increases yields
- + High organic matter content
- + High & diverse microbial activity
- + High humus content & nutrient value
- + Stabilizing compounds for soil
- + More drought resistant

In the fall, lightly till or rake in ¼ lb. per square foot of Humus compost after removing all seasonal garden plants. Or, in the spring, lightly till or rake ¼ lb. per square foot into garden before planting.

No soil test necessary. Works great for all soil types, regardless of pH.

Contains humates and probiotics that improve soil biology, water retention, and aeration.

Soil Alive

Analysis: 5-8-14 +Ca8 +S9

A healthy growing environment starts with healthy soil. HyR Brix® Soil Alive is a unique soil amendment that replaces critical elements that have been depleted over time. As it releases its nutrients into the soil, it aerates and relieves soil compaction, and enhances microbial activity, all of which and enhances microbial activity, all of which boost plants' photosynthesis process. It's the single best thing you do to set your soil straight right from the start. :: Coverage: 4,000 sq ft.

I used the All-Purpose Liquid Fertilizer to foliar feed once a week and it kept my plants free of aphids and blight while my neighbors were losing their plants to blight due to our rainy summer.

-Belinda R., Sharon Grove, KY

Granular Fertilizer

Alfalfa Meal

Use Alfalfa Meal for plant and microorganism nutrition. Roses respond well to alfalfa meal. For new plantings, mix 1/2 cup into the planting hole before planting the rosebush. For existing plants, mix 1/2-1 cup around each rose bush, to a depth of 2"-3". It is an excellent addition to the compost pile since it is high in protein and helps activate the composting. For flower and vegetable gardens work in 2-5 lb per 100 sq ft

- 60007 5 lb\$7.00 
- 60008 10 lb\$10.70 
- 60009 50 lb\$29.30 

All Purpose Fertilizer

A multi-purpose granular fertilizer. Supplies a balanced blend of nitrogen, phosphorus, and potassium in a 5-10-10 formula. Provides a balance of three primary nutrients used by plants to promote healthier growth.

- 60331 50 lb\$53.60 

Aluminum Sulphate

Aluminum Sulphate helps create an acidic soil condition for plants such as Azaleas, Gardenias, Camellias, Rhododendrons, Blueberries and others. Intensifies blue color in Hydrangeas.

Application Rates:

Shrubs: 1 lb. per 3 ft of height

Trees: 1 lb. per in. of diameter

To Correct Alkaline Soil: 5 lb. per 100 sq. ft

- 60010 3.25 lb\$8.80

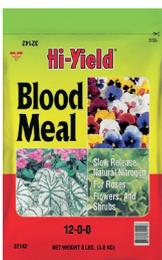

Ammonium Sulphate

Analysis: 21-0-0

The best fertilizer for blueberries. Apply 1/4 cup per plant May 1, and repeat June 1. Use 3 Tbsp. for young 2-3 year plants. Work into soil or mulch 1"-2". Applying Cottonseed Meal with last application helps feed soil bacteria and provides a long lasting nutrient source. Formulation: 21% Nitrogen and 22% Sulfur

- 60011 3.25 lb\$6.30
- 60018 16 lb\$16.40 
- 60019 50 lb\$27.20 

Blood Meal

 100% NATURAL

Analysis: 12-0-0

This slow release form of natural nitrogen aids plant top growth, encourages richer, greener leaves and more beautiful blooms on pansies, roses, flowers, trees, shrubs and vegetables. :: Application Rate: 2 lb. per 100 sq. ft.

- 60032 2.75 lb\$10.10
- 60033 8 lb\$34.10 

Bone Meal

 100% NATURAL

Analysis: 0-10-0

Bone meal increases phosphorous in soil for optimal spring gardening results. Essential in the development of strong root systems, this element is released into the soil for up to four months. Slow, steady delivery of nutrients helps you grow plenty of big, blooming flowers, fruits, and vegetables. For amazing tulips, place 1 tsp. 2" below each bulb. :: Application Rate: 4-5 lbs. per 100 sq ft

- 60038 3.25 lb\$6.90
- 60037 16 lb\$30.30 

SOIL BALANCE FERTILIZER

Soil Balance Fertilizer

Analysis: 8-6-8

**No Cheap Fillers, No Hidden
GMO Ingredients, No
Herbicides, No Pesticides.**

Feed the soil and your plants will take up nutrients in the perfect balance your body needs to be healthy too. We have partnered with soil biology experts and fertilizer

manufacturers to create a vegetable garden blend that is highly mineralized, earth friendly, perfectly balanced, easy to use AND affordable. Contains all the essential nutrients plants need to maximize yields, resist bugs and disease, and increase the brix (sugars) level. Improve the flavor and storage of fruits and veggies. 8-6-8 blend has primary NPK, Calcium, Magnesium, Sulphur, micro-nutrients, secondary nutrients, plus humates, probiotics, and ocean minerals. In other words you'll be hard pressed to find a better quality product at a more affordable price. Not organic but will not harm soil biology when used as directed. Why pay more for fancy advertising and marketing. **From our bag to your soil.**

- 60308 10 lb\$13.70 
- 60309 50 lb\$46.90 

How to Apply:

Garden Vegetable Soil Balance Application

Soil Feed: Apply 10 lb to 300 sq ft and mix into soil

Plant Feed: 2/3 cup 18" around each plant and mix into soil

Row Feed: side dress 4" from plants at 10 lb per 150 ft row

Strawberries Soil Balance Application

Row Feed: side dress each side with 4 lb per 50 ft row at renovation in June

Fruit Trees Soil Balance Application

Application Rate: 3 lb at drip line at petal drop in late spring.

Grapes Soil Balance Application

Application Rate: 2 cups spread evenly in 2" circle around base of plant.

DIY Blends using Soil Balance

Tomato Soil Balance Recipe:

Mix: 2 lb Sulphate of Potash with 10 lb Soil Balance.

Application Rate: 12 lb to 300 sq ft or 2/3 cup 18" around each plant and mix into soil.

Sweet Corn Soil Balance Recipe:

Mix: 3 lb Calcium Nitrate with 10 lb Soil Balance.

Application Rate: 13 lb to 300 sq ft or 2/3 cup 18" around each plant and mix into soil.

Blueberry Soil Balance Recipe:

Mix: 2 1/2 lb Soil Sulphur with 10 lb Soil Balance.

Application Rate: 12 1/2 lb to 300 sq ft or 2/3 cup 18" around each plant and mix into soil.

Lawn Soil Balance Recipe:

Mix: 4 lb Ammonium Sulphate with 10 lb Soil Balance.

Application Rate: Apply 14 lb to 300 sq ft

Calcium Nitrate

Calcium Nitrate Fertilizer is a water-soluble formulation that provides fast-acting nitrogen along with calcium to increase fruit quality and prevent blossom end rot. Great for onions, sweet corn, tomatoes, peppers, broccoli, brussel sprouts and more! Can help prevent blossom end rot on tomatoes and peppers if applied before problem occurs.

Application Rate:

(Side dress) Apply to soil at the rate of 1 cup per 50 ft row or 1 teaspoon per plant.

Apply to the root growing area staying away from the plant stem by 2"! Water in after application. A second application 2 weeks after the initial application is recommended.

Formulation: Calcium 19% and Nitrogen 15.5%

Cane Garden Crystals

100% NATURAL

Analysis: 0-0-1 Soil Biostimulant

Cane Garden Crystals is a concentrated, naturally occurring sugar complex. It has consistent small particle size and molecular arrangement and is water soluble in nearly any liquid. Cane Garden Crystals is a concentrated molasses sugar (carbohydrate complex) intended to increase performance of other biological products. Adding molasses crystals to the soil environment will add active carbon compounds that are digestible by the soil microbiology, helping the population of microbes to increase rapidly. Cane Garden Crystals has an energy curve and mineralization of molasses and the cleanliness for bacteria, fungus and chemical growth inhibitors as a dry crystal sugar complex. It is processed around 110°F, which allows it retain the natural minerals and enzymes that benefit plants, animals and bacteria.

- Made with Non-GMO sugar cane
- No synthetic flavors, colors, fragrances or preservatives
- Consistent sweet flavor, color, aroma and crystal size
- No grain residue carrier agent, pure molasses crystals
- Guaranteed Carbohydrates: 96%

60050 50 lb \$98.00 50

Cottonseed Meal

100% NATURAL

Analysis: 6-1-1

A natural source of nitrogen, phosphate and potash that helps create an acidic soil condition and aids in production of friendly soil bacteria. Work into soil around blueberries, Rhododendrons, Azalea, and Hollies. :: Application Rate: 3 1/2 lb. per 100 sq ft

Dr. Iron

ORGANIC

OMRI® Listed . Dr. Iron comes in a convenient granular combination for long lasting results. Corrects iron deficiency, reduces pH, and won't burn or stain. Use on blueberries, acid loving plants, and lawns. Formulation: 22% Iron and 55% Sulfur :: Application Rate: 1/2 cup per plant

60070 7 lb \$18.60 7

Enrich Formula

ORGANIC

Keep your houseplants happy and healthier without the guesswork. Foolproof formulas that are packed full of beneficial bacteria and fungi to help your houseplants thrive like they would in nature! Enrich Pellets are made from worm castings, it's the perfect root and soil builder. Mixing rate: 3 tsp. per quart of soil.

67516 14 oz \$12.90

Gypsum Pellets

A natural soil aerator, it helps loose clay or compacted soil improving water and air penetration. It encourages early root growth, increases calcium content in plants and quickly releases calcium into the soil without changing the pH. Dissolve gypsum in the soil by watering well. Use 2-3 lb. per 100 square feet. Use more if soil test indicates low calcium.

60098 10 lb \$9.20 10

60099 50 lb \$15.20 50

Hi-Cal Lime Pellets

Hi-Cal Lime Pelletized is high in calcium and low in magnesium. Pelleted form has uniform particle size for consistent release and is non-dusty and easy to spread. Formulation: 87% Calcium Carbonate

60109 50 lb \$10.70 50

Hi-Mag Lime Pellets

Analysis: 22Ca-11Mg

Hi-Mag Lime Pellets offer a faster, more effective solution than traditional lime products, helping to quickly neutralize acidic soils for optimal growing conditions. Enriched with calcium and magnesium, these pellets support overall plant health and enhance nutrient uptake by adjusting pH levels. Safe for use throughout the growing season, they are non-burning and can be applied alongside any fertilizer program or used on their own. Hi-Mag Lime Pellets are the ideal choice for improving soil quality and promoting vigorous plant growth.

60111 50 lb \$15.70 50

Hydrated Lime

Corrects soil acidity and helps loosen heavy clay soils. Increases soil pH. Can be used to keep down odor and flies around stables, outhouses, etc. Supplies calcium to plants and microorganisms. Sweetens the soil and turns hydrangeas pink. :: Application Rates: 1 lb. per 30 sq. ft. Make your own whitewash: 5 lb / 1 gal. water. Let set overnight. Dissolve 1/2 lb salt to 2 qt warm water. Mix well and apply.

60110 4 lb \$9.50 5

Kelp Meal

Analysis: 1-0-2

The Soil Supercharger! 100% Pure Organic Kelp Meal derived from the finest Norwegian Sea Kelp. Improves soil texture, fertility, improves your soil moisture retention plus adding a long list of important trace minerals back into your soil. All this adds up to improved earthworm and soil microbe activity. End results- bigger, better fruits and vegetables; larger, prettier flowers and a happier environment! Simply work Kelp Meal into garden soil. For perennials such as strawberries, raspberries, asparagus, rhubarb, flowers, bushes and trees, spread evenly around them and water in. A second fall application on perennials will improve their overwintering tolerance and put them off to a good early start in spring! :: Application Rate: 1 lb. per 100 sq. ft.

60167 5 lb \$12.90 5

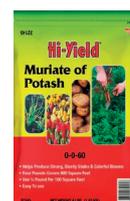

60168 10 lb \$22.50 10

60169 50 lb \$91.10 50

Manganese Sulphate

Manganese is a micronutrient that is commonly deficient in soils with a pH level above 6.5. Water your plants deeply 2-3 days prior to applying the soil application. The extra moisture ensures that the manganese sulfate is properly absorbed deeply into the soil. For landscapes, 1/3 cup to 2/3 cup of manganese is typically applied per 100 sq. ft. Will stain concrete, like iron. Use caution, don't over apply. :: Formulation: Manganese 31%, Sulfur 17%

60200 3.25 lb \$13.80

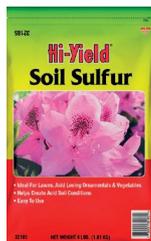

Muriate of Potash

Analysis: 0-0-60

An excellent source of potassium, which aids plants in forming healthy stems, roots and tuber growth. Great for below ground forming vegetables such as potatoes, carrots and others. :: Application Rate: 1/2 lb. per 100 sq. ft. or 1/2 lb. per 100 row ft. of crop. (1 lb. is approximately 2 cups)

60235 3.25 lb \$6.90

Soil Sulfur

100% NATURAL

Helps create acid soil conditions and also acts as a soil conditioner. Helps lower PH in excessively alkaline soils. Is slow acting, but long lasting. The best sulfur to use for blueberries. Formulation: Sulfur :: Application Rate: Mix into soil at rate of 1-2 lb. per 100 sq. ft.

- 60310 3.25 lb\$11.40
- 60311 50 lb\$41.10

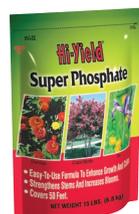

Sulfate of Potash

ORGANIC

Analysis: 0-0-50

Potassium Sulfate is a soil fertility amendment primarily for grapevines, tree crops, and vegetables. Sulphate of Potash has a very high potassium content. This makes it ideal for encouraging strong flower and fruit development. It also helps to ripen fruits and strengthen plants ensuring they can defend against pest, disease and weather damage. This is 0-0-50 mined, all natural source of potash (50%) without chlorine and contains 18% sulfur. Also has a low salt index, less than half that of muriate of potash. :: Application Rate: 1/2 - 3/4 lb. per 100 sq. ft.

- 60318 10 lb\$7.60
- 60319 50 lb\$34.50

Super Phosphate

Analysis: 0-18-0

An inexpensive and effective source of phosphorus that is quick acting, helping to improve color, strengthen stems and increase blooms. It works well on root crops. Use when planting bulbs.

- 60321 3.25 lb\$6.20

Zinc Sulfate

This a great source of zinc for Pecan and fruit trees. Use this product to correct zinc deficiencies that may cause fruit deformities. Hi-Yield Zinc Sulfate also prevents and corrects rosette on pecans. This dry formulation can be applied as a soil treatment or foliar application. Active Ingredient: Sulfur - 17% Zinc - 36% :: Application Rate: Foliage spray: 1 Tbsp. per 3 gal. on water Soil treatment: 1 3/4 lbs. per in. of diameter of tree trunk.

- 60329 3.25 lb\$13.90

Soft Rock Phosphate

Soft Rock Phosphate is the best natural source of phosphorus and calcium. It is mined in Florida from the best deposit in the country. Soft Rock Phosphate is both an immediately available and a long-term source of phosphorus. It averages 20% P2O5 (3% immediately available) and 20% Calcium. It can supply phosphorus and calcium for up to 5 years after application, depending on the crop.

Phosphorus in the Soil: Phosphorus is the catalyst of plant nutrition. It is the job of phosphorus to compound all the nutrients (except nitrogen) combining them with itself so that calcium can carry everything into the plant. Soils must have good phosphorus uptake to build sugar levels in the plant. Low phosphorus levels can be corrected by applying soft rock phosphate. Colloidal Phosphate sources like this one, do not leach out of the soil profile like chemical sources do!

This product has been giving amazing results in gardens. Increases the sugar and mineral content of fruits and vegetables. Not to be confused with hard rock phosphate which is not nutritionally as readily available. :: Application Rate: 3 lb. per 100 sq. ft. or 1 ton per acre on phosphate deficient soils, less on fertile soils. Soft Rock phosphate should be applied and worked in prior to planting. Trees and berries, Common Use is: 10 lb. per 100' row

- 60298 10 lb\$12.00
- 60299 50 lb\$36.90

Fertilizer Blend Spikes

Fertilizer Spikes

Analysis: 16-4-4

Take the work out of fertilizing. We love these for fruit trees, evergreen, shrubs, and trees. Pound into soil around plant with a hammer. A balance slow release fertilizer for easy no-fuss feeding. Use 1 spike for each 1" diameter of tree. Apply early to mid-spring. Lasts all summer.

- 60076 5 pk. Evergreen\$6.30
- 60090 5 pk. Fruit Tree\$6.30

Jobe's Plant Food Spikes

ORGANIC

Analysis: 2-7-4

A new organic fertilizer spike developed by Jobe's for houseplants and succulents and cacti. The perfect balance of slow-release and readily available nutrients keeps all your indoor plantings happy and healthy.

- 60161 20 pk\$8.70

Liquid Soluble Fertilizer

Acid Loving Plant Food

Analysis: 31-11-11 plus Iron

Acid Loving Water Soluble Plant Food is a fast-acting, highly concentrated plant food that provides the nutrients plants need to grow lush and green. It must be dissolved in water before use and should be used each time you water your acid loving plant for maximum benefit.

Ideal For: Acuba, Azalea, Blueberries, Camellia, Citrus, Crepe Myrtle, Euonymus, Evergreens, Ferns, Gardenia, Holly, Houseplants, Hydrangea, Magnolia, Pine, Pyracantha, Rhododendron and all acid-loving plants.

Apply as a foliar spray or soil drench, but achieves the best results when both methods are used in combination.

Mixing Ratio:

- Indoor Soil/Root Feeding: 1 tsp. per 1 gal. water.
- Outdoor Soil/Root Feeding: 2 Tbsp. per 1 gal. water.
- Outdoor Foliar/Leaf Feeding: 1 Tbsp. per 1 gal. water.

- 60002 1.5 lb\$9.30

Blooming & Rooting Plant Food

Analysis: 9-58-8

A concentrated, high phosphorus plant food that helps promote vigorous blooming and root development. If you want to add some pop to your hanging baskets and flower beds, try this hard to find formula. Highly recommended by a local greenhouse for its wonderful flower power.

Mixing Ratio:

- Indoor Root Drench: 1 tsp per 1 gal water
- Indoor Foliar Feeding: 1/4 tsp per 1 qt water
- Outdoor Root Drench: 2 Tbsp per 1 gal water
- Outdoor Foliar Feeding: 1 Tbsp per 1 gal water

- 60034 1.5 lb\$9.30
- 60035 3 lb\$17.10
- 60036 8 oz\$5.20

Crop Finisher

Analysis: 9-15-30

An excellent crop finisher for melons, zucchini, and tomatoes. Start applications when fruits are approximately 1/2 size, up to harvest. :: Mixing Rate: 1-2 Tbsp per gal. Application Rate: Apply to foliage or root zone.

- 60068 3 lb\$8.10
- 60069 25 lb\$62.10

Liquid Soluble Fertilizer Continued

Jack's All Purpose

Jack's Professional 21-8-18 MagMum

Analysis: 21-8-18

Jack's MagMum is specifically formulated to meet the demanding nutritional needs of heavy-feeding mum crops. This high nitrate and high potential acidity blend provides the ideal environment that mums require. The addition of magnesium promotes vibrant green foliage, and the Peat-Lite trace element level delivers essential micronutrients often absent in standard peat-based potting mixes. :: Application Rate: 1 Tbsp per gallon of water every 7-10 days.

- 60275 25 lb. \$137.00 25

Jack's Tomato Feed/Veggie Feed

Analysis: 12-15-30

Formulated for vigorous plant growth from roots to green foliage, abundant flowering and fruit set for all tomato varieties and blooming vegetables. Tomato Feed contains a micronutrient package and Magnesium for improved feeding results under diverse soil and growing conditions. It also includes Calcium, an effective nutrient to help prevent blossom- end rot.

- 60160 1.5 lb. \$10.70

Magnesium Sulphate (Epsom Salt)

Contains a soluble source of magnesium that is readily available to aid in correcting plant yellowing. Use to encourage white blooms on hydrangeas. :: Application Rate: Foliage Spray: 2 Tbsp. per gal. Soil application: 1 lb. per 100 sq. ft.

- 60198 3.25 lb. \$8.50
- 60199 50 lb. \$28.00 50

Miracle-Gro All Purpose Plant Food

Analysis: 24-8-16

An all purpose, water soluble instant-action fertilizer, absorbed through the leaves and roots. Safe to use-will not burn when used as directed.

- 60204 8 oz. \$5.30
- 60202 1.5 lb. \$10.90
- 60203 3 lb. \$17.60

Miracle-Gro Miracid Plant Food

Analysis: 30-10-10

For Blueberries, Azaleas, and Rhododendrons. Saves yellowing evergreens. Contains chelated iron, copper, zinc, soil acidifiers and plant food. Starts working almost instantly.

- 60207 1 lb. \$7.80

Miracle-Gro Rose Plant Food

Analysis: 18-24-16

Produces up to 3 times more blooms. Supplies all vital growth nutrients roses need. Produces more and larger flowers, stronger, more beautiful bushes. Use for all types of roses and other flowering plants.

- 60205 1.5 lb. \$10.90

Miracle-Gro Tomato Plant Food

Analysis: 18-18-21

Special formula plus magnesium for home gardening. Apply every 7-14 days for continuous, balanced nutrition. Grow bigger and more tomatoes.

- 60206 1.5 lb. \$10.90

Peters Peat Lite Special

Analysis: 20-10-20

A water soluble fertilizer that can be used year-round. It contains a full range of essential micro nutrients that promote root and shoot growth. The acidifying action will correct any excessive pH in the growing media. Peters 20-10-20 is effective in all water types, dissolves quickly and absorbs easily for improved plant performance. Highly recommended for planters and containers with peat-based potting soil. :: Application Rate: 1 1/2 tsp per gal. of water.

- 60278 3 lb. \$11.00
- 60279 25 lb. \$67.10 25

Plant Calcium Boost

Designed to be used during the growing season as a calcium supplement that's available immediately for plant use.

Use Plant Calcium Boost If soil calcium levels are low, or you are seeing signs of calcium deficiencies in your growing crop. We suggest supplementing Plant Calcium Boost throughout the growing season to ensure calcium is available for the growing crop at the rate of 1 ounce per 1000 sq. feet. This can be applied before or after planting. If the soil pH is below 6 and calcium levels are more than moderately low, we suggest a dry lime application in the fall or early spring, along with supplementing with Plant Calcium Boost during the growing season. Depending upon the severity of the calcium deficiency, you may need to apply more than once.

Lime will work to build soil calcium and raise pH while the Plant Calcium Boost will be available immediately for plant use or uptake. :: Mixing Rate: 1 oz per gal. (add 1/2 cup Garden Cane Crystals to maximize the effects). Application Rate: 1 gal covers 1,000 sq. ft.

- 60625 1 oz. \$8.20
- 60627 1 lb. \$115.50

Soil Calcium Boost

This is designed to condition, or loosen, tight soils. If your soil is tight, or you are seeing signs of soil compaction (like cracking, lumps, clumps or clods, decreased water absorption, and plant root growth issues, just to name a few), we suggest using Soil Calcium Boost to help loosen the soil for better plant growth and nutrient uptake. You can apply Soil Calcium Boost in the fall to prepare your soil for the next growing season, or it can be applied in the spring before planting. If your soil is showing signs of being extremely tight, consider doubling the application by applying one in the fall and one in spring. :: Mixing Rate: 1 oz per gal. (add 1/2 cup Garden Cane Crystals to maximize the effects). Application Rate: 1 gal covers 1,000 sq. ft.

- 60615 1 oz. \$8.20
- 60617 1 lb. \$115.50

Liquid Fertilizer

African Violet Food

Analysis: 7-10-7

Just a small amount with each watering brings forth beautiful blooms, lush foliage and excellent plant vigor of African Violets and other flowering plants. :: Mixing Rate: 1/8 tsp. to 1 qt.

60003 8 oz (concentrate).....\$5.40

Cactus Plant Food

Analysis: 2-7-7

This 2-7-7 formula has the specific ratio needed to keep succulents, cacti and tropical plants healthy and happy.

FoliarStor

ORGANIC

Analysis: 0-0-0

(Our choice for the equivalent of Monty's in organic production) A high quality plant food for the certified organic grower! OEFFA Certified. Check with your agency before applying.

FoliarStor is a biologically active, totally natural fertilizer derived from organic substrates of sea plants, decomposed compounds and poultry manures, soft rock phosphates, fish emulsions, biological humic extracts from lignite, and intermediate plant metabolites derived through fermentation. It is formulated to provide a natural nutrient source for growers desiring to maintain high quality production without the use of conventional fertilizers. For garden use, mix 2 oz. per gal. It has been shown that plants high in carbohydrates (sugar content) have a stronger natural defense against insect infestation. FoliarStor is formulated to help increase the carbohydrate content of plant tissue. Manufactured using nature's own natural compounds, it will not burn like many conventional fertilizers. :: Application Rate: 3-5 qt. per Acre

60086 32 oz (concentrate).....\$10.30

60087 1 gal (concentrate).....\$25.00 10

Grow Formula

ORGANIC

Keep your houseplants happy and healthier without the guesswork. Fool-proof formulas that are packed full of beneficial bacteria and fungi to help your houseplants thrive like they would in nature! Grow Concentrate: full of microbes, hormones and enzymes to stimulate growth. :: Mixing Rate: 1/4 tsp. per qt.

Liquid Calcium

Analysis: 0-0-0-10Ca

It is not uncommon for soil tests to show ample calcium, while most of it remains unavailable to plants. Calcium has no benefit unless it can be taken up through the roots. Liquid Calcium provides that immediately available calcium boost plants often need. Calcium is required in the largest quantities by plants compared to all other nutrients and make up 60% to 70% of the soil's saturation of cations. Water soluble fermented molasses base to enhance utilization and increase foliar absorption. :: Mixing Rate: 1-2 oz per gal.

60177 32 oz.....\$10.70

60178 1 gal.....\$30.40 10

Liquid Fish

100% NATURAL

Analysis: 2-3-1

Made from fresh water fish, this organic fish hydrolysate is produced by a cold enzymatic process to retain all nutrients, vitamins and enzymes. A great source of nitrogen, phosphorus, and complex proteins to feed soil microbes. More complex than synthetic fertilizers, it lasts longer in the soil and won't burn your plants like commercial fertilizers. Liquid Fish reduces the compaction of the soil making it loose and airy, vastly improving soil structure. Use as a foliar or drench to feed beneficial bacteria and fungi for better nutrient and moisture retention. Spray fruits and vegetables for greater plant vigor and noticeably better taste. Filtered down to 120 mesh for use in drip line systems and sprayers. Works great as a compost enhancer.

HOUSEPLANTS

Mixing Ratio: 1/2 oz per gal

Application Rate: every 2-3 weeks

GARDENS & ORCHARD

Mixing Ratio: 1/2 - 1 oz per gal

Application Rate: every 2-3 weeks

MONTY'S® LIQUID CARBON SOIL CONDITIONER

Rejuvenate Your Soils! Healthy soil means better crops and gardens.

Increased growth and roots on wheat, corn, soybeans, & more, compared with untreated fields

Monty's® Liquid Carbon™ serves as the anchor to crop management by helping to increase aeration, improve moisture management, relieve compaction, and speed the breakdown of crop residue and manures.

Use anywhere improved drainage is desired: fields, pastures, lawns, gardens, and around trees and shrubs.

Liquid Carbon is a cost-effective means of:

- Relieving soil compaction
- Improving moisture retention
- Increasing air space for healthy roots
- Improving drainage
- Enhancing micronutrient uptake in plants
- Stimulating microbial activity to keep the soil "alive" and dynamic for healthier plant life

Humics can:

- Act as a natural buffer and chelator
- Increase availability of P₂O₅, Zn and Mn
- Assist in the conversion of iron
- Increase efficiency of natural and nutrients
- Increase permeability of plant membranes
- Promote root development
- Allow for improved germination
- Enhance microbial population
- Improve soil condition

The difference is unique Activated Technology!

- Ingredients:**
- Humic acid: 2%
 - Organic carbon: 1%

"Monty's Liquid Carbon really helped. Bigger and sweeter yields. It doesn't show drought as soon. Thanks to Monty's!" — **BB (FROM WI)**

"Since using Monty's Liquid Carbon, we have super soil. More garden goodies, and better hay and oat yields. We wouldn't want anything else!" — **AB (FROM IL)**

"Where we have had a problem with soil compaction and we have applied Monty's Liquid Carbon, we have seen a positive response in decreased soil compaction. It does work. I have seen it work. It will help you if you've got compacted soil." — **RP**

When to use:

Liquid Carbon can be applied to the soil in the early spring or fall, or as necessary throughout the season. Can also be sprayed on plants.

Monty's Premium Soil Conditioner

MONTY'S PLANT FOOD

THE SECRET TO SUCCESSFUL GARDENING

Discover the joy of stronger and more abundant plants — all season long!

"I have never seen so many blossoms. Everything we do seems to have a positive response!"
— JL

ECONOMICAL
Each bottle goes a long way.

EFFICIENT
Apply directly to the leaf; feed the plant not the soil.

FOOD GRADE
From naturally derived ingredients.

WORRY-FREE, KID AND PET SAFE
A non-toxic, non-corrosive, no-burn formula; pH neutral, low salt, low chlorine.

SEED TO HARVEST
Use right up to picking time; no waiting period.

RAIN-FAST AND DROUGHT RESISTANT
Nutrients stay in the plant.

INDOOR/OUTDOOR (GREEN 4-15-12)

- Promotes early root vigor and assists in developing early resistance in all plants and vegetables
- Helps prevent transplant shock
- Low nitrogen for moderate top growth
- Terrific for starting seeds and transplants

Use early in the season, outdoors and all year for indoor plants. Use in the fall as a bulb and root dip.

GROWTH (YELLOW 8-16-8)

- Promotes new growth, root and top growth and larger foliage
- Increases growth after seed germination
- Promotes early vigor, stronger stems
- Promotes leaf enhancement
- Broad-use foliar or root zone plant food

Use as soon as plant emerges from soil and throughout early growth season. Helps revive lagging plants.

ROOT AND BLOOM (ORANGE 2-15-15)

- Bloom and yield enhancer, improves plant hardiness, builds resistance to disease.
- Promotes bloom development
- Increases number and vibrancy of blooms
- Increases yield of vegetables

Use as soon as plants set bloom. Terrific for winterizing roses, perennials, trees and shrubs.

GARDEN TRIAL PACK

Monty's Garden Trial Pack

8 oz Indoor/Outdoor (Green), 8 oz Growth (Yellow), 8 oz Root & Bloom (Orange)
60227 8 oz (concentrate)

MONTY'S® FARM FERTILITY PRODUCTS

Energize your crops with Monty's Foliar Fertilizers!

Use Monty's foliar fertilizers with your current nutrient management programs. Each formula is designed to provide the nutrients your crops need at specific growth stages — at planting, during vegetative growth, and through reproduction.

SEED STARTER/ FOLIAR 4-15-12

- For quick emergence and early season vigor.
- Assists in developing early resistance.
- See improved response for transplants.

GROWTH 8-16-8

- Apply during vegetative growth stages.
- For rapid response and growth.
- Supports vigorous growth.

ROOT & BLOOM 2-15-15

- Use during reproductive and bloom stages.
- Assists with bloom retention and kernel fill.
- Enhances reproductive cycles.

AT PLANTING

IN SEASON

IN THE FALL

HAY AND PASTURE

Apply 24 ounces per acre of Yellow Growth Formula 8-16-8 with 32 ounces per acre of Liquid Carbon™ to jump-start microbial activity.

ALFALFA

Apply 24 ounces per acre of Yellow Growth Formula 8-16-8 with 32 ounces per acre of Liquid Carbon to jump-start microbial activity.

CORN

Apply 32 ounces of Green Seed Starter 4-15-12 directly to the seed or in furrow for rapid germination and early root development.

Apply 24 ounces per acre of Yellow Growth Formula 8-16-8 after each cutting or grazing the remainder of the summer.

Apply 24 ounces per acre of Yellow Growth Formula 8-16-8 following each cutting after 3" of regrowth.

Apply 24 to 32 ounces of Yellow Growth Formula 8-16-8 at the third and sixth leaf stage for growth and overall plant development.

Apply 24 ounces of Orange Root & Bloom 2-15-15 formula two to three weeks prior to dormancy. This helps build the root system for rapid green-up and early season growth.

Apply 24 ounces of Green Seed Starter 4-15-12 two to three weeks prior to dormancy. This helps build the root system for rapid green-up and early season growth.

As close to tasseling as possible apply 24 to 32 ounces of Orange Root & Bloom 2-15-15 to provide nutrients for ear development and good kernel fill.

money!

USE MONTY'S DURING PERIODS OF STRESS

Increased growth during times of stress. Compare roots on wheat, corn, soybeans, and more, to those of untreated fields.

By applying Monty's at regular intervals and making extra applications during periods of known stress, you can provide needed nutrients to help your plants deal better with stress. Keep your plants and crops growing at peak performance and provide the vigor necessary to use natural defenses against pests and disease.

- **Combat heat, weather, or insect stress**
- **Maximize production and keep costs in check**
- **Address specific nutrient deficiencies**

"Drawing on over 10 years of experience, Hay-Now is specially formulated with added Sulfur and Iron for a cost-effective program that is easy to use. Expect success you can see with Hay-Now on your fields and pastures."

HAY-NOW™

Hay and pasture liquid fertilizer

Hay and pasture liquid fertilizer Hay-Now is a foliar applied liquid fertilizer containing N, P, K with Sulfur, Iron, and Zinc. It is specifically formulated to deliver readily available nutrients during the vegetative growth stages to enhance growth and root development.

APPLICATION: Foliar apply Hay-Now anytime from early spring green-up through fall. If cutting, apply Hay-Now after every cutting with 2-3 inches of re-growth. If grazing, apply Hay-Now every 30-45 days. Suggested application rate is 1-2 quarts per acre. For use on all grass hays and legumes. Winterize your hay and pasture fields with 2 quarts in the late fall. Covers: 120 Acres @ 1 quart, 60 acres @ 2 quarts

"Microhance is an exceptional micronutrient package. It helps us to achieve that next level of yields that we are looking for in our crops."

Monty's Microhance

Analysis: 3-0-0

APPLICATION: Foliar apply 1-2 quarts per acre. Can be applied
60233 2.5 gal (concentrate)\$38.00 25

MICROHANCE®

Nutrient Package - Six Important Nutrients

Nutrient Package - Six Important Nutrients Microhance contains six important nutrients including Nitrogen, Sulfur, Boron, Iron, Manganese, and Zinc. It offers a unique blend of Monty's technology designed to provide nutrients to the plant at any stage of growth, helping maximize the plant's yield potential.

APPLICATION: Foliar apply 1-2 quarts per acre. Can be applied by itself, in addition to a starter, or with many other products including herbicides, insecticides, and fungicides. Covers: 10 Acres @ 1 quart, 5 acres @ 2 quarts

"Agri-N is a product you can add to any application for a quick burst of energy and green-up at any growth stage."
— Gary Coughlin, Agronomist

Monty's Agri-N

Analysis: 14-0-0

60232 2.5 gal (concentrate)\$42.70 25

AGRI-N™

Foliar Enhancement for Green-Up and Energy

Foliar Enhancement for Green-Up and Energy Agri-N is a 14% Nitrogen and 26% sugar source. It is a natural product that provides nitrogen for green-up... and energy - without the nozzle problems caused by other sugars.

APPLICATION:: Row crops: Apply 1-3 quarts per acre for green-up and energy. Hay fields and pastures: Apply 1-2 gallons per acre as a nitrogen source during the growing season. Covers: 10 Acres @ 1 quart, 5 acres @ 2 quarts

Liquid Fertilizer Continued

Neptune's Fish & Seaweed Fertilizer

ORGANIC

Analysis: 2-3-1

OMRI® Listed . Neptune's Harvest Organic Fish/Seaweed Blend Fertilizer gives you the perfect blend of hydrolyzed fish and seaweed, ensuring a complete fertilization program. Neptune's Harvest Fish/Seaweed Fertilizer is OMRI Listed for organic use. Growers using our Fish/Seaweed Blend Fertilizer on a regular basis have reported increased marketable yields and improved shelf life on fruits and vegetables. Fish and Seaweed are known to build the natural sugar in plants. Flowers and foliage will be stronger and more colorful. Blooms will be more plentiful, fragrant and longer lasting. :: Mixing Rate: 1 oz. per gal

Neptune's Fish Fertilizer

ORGANIC

Analysis: 2-4-1 .

Organic :: OMRI® Listed . Neptune's Harvest Fish Hydrolysate is the perfect fertilizer for organic gardening. Our unique cold process protects heat sensitive nutrients naturally found in fish, providing you with the best fertilizer available! We believe in making the highest quality fish hydrolysate, which is why our liquid fish uses a variety of dock-fresh North Atlantic fish. Unlike fish emulsions, Neptune's Harvest doesn't remove the proteins or oils during processing. It is OMRI listed for organic use.

We recommend Neptune's Harvest Fish Fertilizer for all your outdoor and indoor growing needs! Perfect for: Vegetables, Flowers, Fruit, Trees, Grass, and Containers, Seedlings and Transplants: 1 1/2 oz. per gal. (2 Tbsp. per gal.) Hay application is 2-3 gallons per acre with 20-30 gallons of water for each application. The first application is when the hay comes out of dormancy, the second is 2-3 weeks before cutting, and the third is 1 week after cutting.

Tomato Twine

White, sturdy poly twine with a tensile strength of 59 lbs. Can be used for your tomatoes, peppers or any other crops that need trellis support. 3 lb. ball has 6,300'

- 62686\$9.50

Tomato Vine Clips

Use to fasten vine crops and tomatoes to trellis or support strings. Durable plastic clips snap to string and clamp around any plant stem to keep supported. Many uses around the garden.

- 62697 20 pk\$3.30
- 62698 50 pk\$4.20

Trellis Netting

Trellis Netting makes it easy to grow pole beans, snap peas, cucumbers, and other climbing crops. Simply stake or drape the netting onto whatever framework you have and secure as needed. 7" Reach - through mesh makes garden care and harvesting easy for any gardener. Reduces damage from ground-rot, insects, rodents, and garden pests. Stakes not included.

- 62605 5' x 10'\$6.90
- 62710 5' x 15'\$9.00

Plant Trellis Netting

Plant trellis netting, particularly designed for supporting cut flowers, provides the perfect structure to keep long-stemmed blooms like cosmos, dahlias, and zinnias upright and straight. This netting helps flowers grow tall and reduces the risk of bending or snapping in the wind. With evenly spaced openings, it allows for even growth and easy access for pruning or harvesting. Its durable, weather-resistant design ensures reliable support throughout the growing season.

- 63017 4' x 50'\$12.70
- 63018 4' x 16'\$6.70

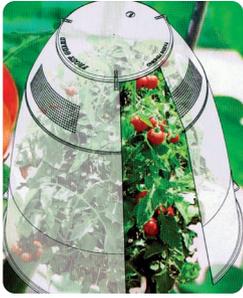

Vine Ties

Applicable for blackberries, raspberries, and young trees. Easy to apply and gentle on your vines. Features extra strong hook ends. Made from long life UV stabilized polypropylene. 6" long with 3/8" narrow band. Clips to 1/8" wire supports. Great for tall spindle fruit tree training.

- 62718 2 7/8" . 20 pk\$4.20
- 62728 6" . 20 pk\$5.40

Plant Cover

Frostguard

15" high, 13" diameter. Permits planting 4-6 weeks earlier in spring, and harvesting later in fall. Adjusted vents to prevent overheating. Protection from wildlife- no more bunnies munching your greens. Screens keep out egg-laying insects and leaf eaters. Great for cabbage, broccoli, etc. Reusable year after year. Easily stackable for storage.

62553\$17.90  15

Greenhouse Plastic

6 mil. 4-year UV stabilized clear poly. Build your own structure and cover with this commercial grade durable plastic. 32' wide

62578 6 mil . custom cut per ft.\$5.30

62579 32' x 100' . 6 mil.\$335.50  175

Row Cover .5 oz Pro 17

You will be pleased with this row cover. We have used it with excellent results. Speeds growth of vegetables, while also deters garden pests. Cover seeds for better germination or seedlings for wind/sun protection. Protect your broccoli, cabbage, etc. from white butterflies by covering them. Or use to cover strawberries, blueberries, etc. when ripening to keep birds away. Works Great When using plastic as mulch. Recommended by Experienced Gardeners, this extra lightweight row cover has some frost protection, up to 4° warmer than your current temperature. 85% light transmission and allows rain to penetrate.

Row Cover 1 oz Pro 34

You will be pleased with this row cover. We have used it with excellent results. Place seeds or plants in the ground in spring, two weeks earlier than usual. A great protection from garden pests and also shields plants from strong spring winds and direct hot sun. Row cover works like a greenhouse, yet allows rain to soak through. 1 oz. is great for your melon patch. Drape cover loosely over melon bed. Weight it down or stretch over hoops. When plants begin to flower, remove cover to allow pollination.

Has a frost protection of 6° warmer than your current temperature. 70% light transmission.

Plant Cover

TIP FROM BERLIN

Make a 3-4' tube from any tough scrap mat. and fill it with pebbles, sand and/or gravel. Use to seal edges of row cover. Will conform to uneven ground, and keep pests from crawling underneath.

Row Cover Hoops

Improved low tunnel design with loops for easily wrapping twine between hoops down the bed. This provides increased row cover support and allows for a wider spacing between hoops. Space approx. 4 ft apart.

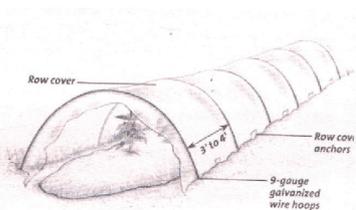

62660 30" Square .15 pk \$32.70  35

Spring Steel Rods

Heavy-Duty, long-lasting, galvanized spring steel hoops make a quick easy tunnel cover for early crops. With spring steel rods you get to decide how tall and wide you make your tunnel. Push ends 8-10" into soil 3-4' apart and cover with row cover or insect netting. Excellent for both early spring and late fall season extension.

62582 58" .15 pk \$19.50  45

Row Cover Hoops

Heavy-Duty long-lasting galvanized 32" diameter hoops. Space approximately 4' apart.

62581 34" dia Rounded .15 pk \$24.90  35

62660 30" Square .15 pk \$38.90  35

Insect Netting

Garden insect netting works well to protect vegetables, flowers, plants and fruits from birds, moths, and insects while letting water, air, and sunshine get through. See-through plant netting helps check the progress of your plants and is breathable, odorless, and flexible. Prevent UV and insect damage in summer. Can be cut to other sizes as needed; sturdy enough to fold up after the season and reuse. Lifetime: 5-6 years.

Testing indicates this mesh blocks SWD flies. Secure edges are a must for good control.

Pest control: The insect net can basically block all common garden pests. Significantly reduce the use of chemical pesticides while minimizing wind/ hail/ frost damage. Can be used to grow chemical-free crops.

Disease prevention: Virus disease is a catastrophic disease for many vegetables, mainly spread by insects- especially aphids. Insect nets cut off the main transmission way, therefore greatly helping to reduce the infection of vegetable viruses.

Easy to install. Cover plant directly or build a hoop or a grow tunnel, then place the netting on the frame.

Block sunlight: Insect nets can shade to a certain degree and reduce the possible inhibition caused by the strong light. Tests show insect nets help plants enjoy up to 3-5° lower temperature.

Material: 100% New HDPE, UV resistant fine mesh, neat double edge.

Mesh size = 1/32" or 1024 holes per square inch.

67349 6.5' x 25' \$17.80

67350 6.5' x 50' \$31.80

67347 20' x 50' \$95.70  25

67348 30' x 50' \$143.00  25

Insect Net Bag w/ Zipper

Say goodbye to pesticides. This netting bag works great as a physical barrier, covering your trees from top to bottom to provide full protection against insects- totally chemical free! A must-have for your organic gardening or farming.

Made of high quality PE material, its expected life span is 4-5 years. It will not harm your trees, as it allows 90% of light and 75% of air to pass through. Zipper closure design makes it more convenient to apply. Fasten around tree with rope.

With a 0.04" (1 mm) mesh netting, even the smallest insects can't reach your trees. Multi-functional netting also works well as bird netting and hail netting. Suitable for all growing seasons.

67343 16' x 18' \$65.00

67344 9' x 10' \$20.90

Plant Cover

Wall O' Water

Your self standing Wall O' Water Plant Protector enables you to set out tomatoes, peppers, or other plants six to eight weeks earlier than normal without fear of freezing. Once in place fill the Insulated Plant Protector with water up to $\frac{2}{3}$ full. This creates a folded teepee at the top to start retaining warmth inside. Allow plants to grow inside the plant protector until it starts to grow through. Once plants are taller than the protector, fill the rest of the tubes with water to create a short, round wall of water barrier.

- Helps produce 2X more fruit 30-40 days earlier.
- Reusable, sturdy plastic tubes.
- Protects up to 16°F

18" Tall

62730 3 pk.....\$21.10

Bird X Netting

This lightweight $\frac{3}{4}$ " mesh effectively protects your berries and fruit trees. Sits lightly on top of berry plants. It can also be used to cover ponds and pools to keep out leaves and debris.

67216 14' x 45'.....\$26.70

67217 14' x 75'.....\$36.70

Tomato Tray Automator

Increases yields by reflecting light off the red tray to the plant to stimulate growth! Simply fit the tray around the young plant, pushing the 4 corner stakes securely into the soil. Tray holds a half-gallon of water and contains four holes for fertilizer, which allows for slow, continuous feeding each time you water. Four 1.75" long spikes on each tray insert into soil, and each has a small opening at its base. This allows you to fill them with slow release fertilizer, or helps water slowly reach to the root system. It also keeps weeds and insect pests away from the soil around them. 12 x 12"

62685 3 pk.....\$10.80

Pond & Pool Netting

We think this $\frac{3}{8}$ " mesh does a better job than Bird X. Birds can't slip through, and it floats better on top of berry plants. Can also cover ponds and pools to keep out leaves and debris.

Soil Care

Garden Weed Barrier

OMRI® Listed . Biodegradable paper mulch made from all natural cellulose fibers that decompose by the end of the season. This DeWitt garden mulch eliminates weeds, helps reduce erosion, can moderate soil temperatures, and can be worked into the soil after the growing season. It allows air and water to penetrate, so it is excellent to use instead of plastic. It can be used between rows or seeds can be planted directly into the mulch.

- 67313 2' x 40' \$10.70

Better Reds Mulch Film

Increases tomato yield up to 20%. Reflects light back to plants which stimulates growth. Retains moisture, controls weeds and warms the soil. Also use with strawberries, melons, etc.

- 62536 3' x 24' roll \$11.90

Backpack Sprayers

solo®

Solo Backpack Sprayer

The Solo Backpack Sprayer has an comfortable and efficient designed pump handle, tank and frame that make this backpack sprayer ideal for applying disinfectants, fertilizers, pesticides and formulations for tree, shrub and plant protection. With a polyethylene tank that resists ultraviolet rays, this backpack sprayer is built to last. The cone, fan and jet nozzle offers three different spray patterns for different applications. The fill opening size of 4" allows you to easily add fluid into the tank without spilling it all over yourself. This back pack sprayer has a wand length of 28", allowing you to reach hard to get places with ease. Nylon web straps are padded at the shoulders for comfortable days of spraying. Pump handle is adjustable for left or right hand operation Empty weight is 12 lb.

64037 4 gal \$112.50 30

Solo Battery Backpack Sprayer

No more tiresome pumping. Rechargeable 12V-9ah lithium battery. Powers a hi-pressure pump with two pressure settings. Now with lithium ion battery!

- Free of emissions, whisper-quiet. 60" nylon-reinforced hose provides extended reach and increased durability.
- 6.6 gallon transparent tank made from durable UV-resistant high-density polyethylene (HDPE). Powerful 12V pump with two-step toggle switch.-
- Low 36 psi, high 62 psi.

- Recharges in less than 3 hours. (charger included)
Equipped with a comfortable padded backpack support frame with wide padded shoulder straps.

64038 4.5 gal \$301.50 30

Solo Backpack Motorized Sprayer Model 466

A powerful motorized mist blower for the serious small orchardist and market grower. Blows a fine mist, applying sprays much more effectively than pump sprayers. Better coverage through-out the leaf canopy and hard to reach areas. We have found organic sprays to be much more effective due to thorough coverage of product being applied. Cuts spraying time in half.

Watering

A. B. C.

A. Six Cycle Digital Aqua Timer

Automatically water up to six times per day. Easy to program, large LCD screen, entire program visible at a glance, metal coupling nut with rubberized grip, and retains programming through battery change.

64035 \$46.10

D.

E.

B. Watering Timer

Automatic water shut-off with intermittent function. Mechanically operated timer; no batteries needed. Timed watering up to 2 hours. Great for gardeners on the go. Connect to sprinkler, set the dial, and the timer does the rest. Egg timer design, on/off to use like a faucet, works with low pressure drip and soaker hoses.

64050 \$16.00

C. HiFlo Poly Hose Y

Large size allows for greater water flow. Featuring large knob for easy operation and durable poly construction.

64011 \$7.70

D. Melnor Wash & Fill Hose

The unique Melnor Wash & Fill lets you quickly rinse your hands under a gentle shower without removing the hose from the faucet. The built-in switch controls the washing head or the hose or even stops flow to both. The spray head also works well to fill watering cans or buckets with the hose still attached. The hose connection allows full rotation to prevent kinking.

64021 \$14.30

E. Easy Clean Hose Filter

Dramm introduces the Easy Clean™ Filter for less clogging and a longer lasting life of your watering accessories. The Easy Clean™ Filter is designed with a stainless steel fine mesh to capture nozzle plugging debris. Will fit any standard hose & pipe connections (including water timers). Easy to install, remove and clean.

64009 \$6.60

F. Hozon Injector

Back by popular demand. Siphon mixer fertilizes as you water. Dilution ratio is 20:1. Mix Monty's, Mir-Gro, Seaweed, Rooting and Blooming or any water soluble fertilizer in a bucket, drop the suction hose in, and the Hozon will do the rest. Works with any sprinklers and Hozon nozzles. Maximum hose length 50'.

64012 \$19.50

G. Chapin Injector

A smaller unit that attaches right to your spigot. Clear tank allows for easy monitoring of fertilizer base as it draws down inside of unit. Tank has a removable top plug for easy filling of your favorite water soluble fertilizer. Mixes at a 1:16 Ratio or 1 oz. per gallon. Connects to a garden hose.

Watering

5/8" Flexzilla Hose

Hoses are engineered with a lightweight flexible hybrid polymer to lie flat and eliminate kinking under pressure. It redefines flexibility, making it easy to maneuver around trees, bushes or other obstacles. Zero memory means your hose stays put without twisting. And Flexzilla Garden Hose doesn't fight you when you coil it. Plus, with our superior O-ring you get a long-term, leak-free connection at the spigot that outlasts the competition by far. The Flexible Hybrid Polymer inner tube material is drinking water safe. Maximum working pressure at 70°F: 150 psi. 3/4" fittings both ends.

- 64108 5'\$16.10
- 64109 10'\$21.70
- 64010 50'\$57.20
- 64091 100'\$90.20
- 64110 custom cut per ft.\$1.70

Gilmour Impulse Tripod Sprinkler

With a telescoping tripod that reaches a height of 58", extended coverage is 5,800'. Ideal for your garden, lawn or extra large areas. The all-metal build stands up to frequent use even in tough conditions, while the spiked feet provide maximum stability. Lifetime warranty.

- Adjustable collar for partial-to-full-circle coverage.
- Easy-to-use dials for customizing direction and length of spray.
- Diffuser pin customizes spray, from powerful jet to gentle mist.
- Sprinkler head has 3/4" NPT connection to base.

64034\$45.30

Tree Sprinkler

Tree Hugger Sprinklers are the ultimate tree and shrub watering device for your newly planted or established trees and shrubs. This unique design allows for 360 degree watering in one easy application. With our adjustable valve you can direct the water to the targeted saturation zones. Easier to use compared to a tree soaker hose, tree ring watering bags or tree watering spikes. Put a timer on your hose for the ultimate in effective and efficient lower cost tree, shrub and bush irrigation.

64063 7"\$23.30

1/2" Flexzilla Hose Reel

With Levelwind Technology - Flexzilla's unique winding system automatically layers hose back and forth across the reel, ensuring that the hose is coiled smoothly and easily every time. It includes Flexzilla water hose and lead-in hose.

64092 70'\$330.00 30

Cyclone Portable Injector

Equipped with a complete metering tip kit, pick-up hose, strainer, ceramic weight, and stainless hanger, this injector ensures precise distribution with ease. Its brass GHT inlet and outlet fittings offer durability and a secure connection, making it a reliable tool for greenhouse use. Compact and versatile, the Cyclone Portable Injector is designed to simplify fertilization while maintaining high performance and quality.

64090\$110.50

NEW

5/8" Flexzilla Kink-Free Hose Fitting

A durable fix for worn hose ends. Made from aircraft-grade aluminum, this piece installs easily and keeps your line running without leaks. The built-in bend guard helps prevent kinks and extends hose life—perfect for quick repairs or custom builds.

- 64105 Female.....\$13.80
- 64106 Male\$11.70

Mini Max Sprinkler

Zoom 4 way control adjusts the overall watering area. Coverage up to 4,000 square feet. Great for watering the lawn, newly seeded areas, or a large garden. Sturdy metal step-spike makes it easy to securely place in the ground and the Infinity Turbo Drive motor provides a smooth operation. Flow-through base allows unit-to-unit connection so multiple sprinklers can be set up throughout the yard.

64028\$41.20

Melnor Impact Metal Sprinkler

Waters up to 85' diameter. Sturdy metal head with step-spike. Allows unit-to-unit connections.

64019\$19.40

Rain Gauge

EZ Read Rain Gauge has brightly colored selection of colors for mounting on the fence or in the ground. Yellow markings on the clear tube allows for high visibility float. Durable two piece plastic stake. Funnel is constructed to prevent debris from entering.

64032\$7.10

Garden Irrigation Kit

Effortlessly water your garden or high tunnel with this efficient irrigation kit. Simply connect your garden hose, turn on the faucet, and let the system evenly irrigate your space. The kit includes a 35' headerline, 2,000' of durable drip tape, and 10 headerline-to-tape fittings, complete with a punch and hardware for easy installation. It's designed for convenience, ensuring your plants receive consistent moisture with minimal effort.

64095\$152.00 40

Melnor Flat Soaker Hose

Soaker hose is a great way to be Water Wise. By slowly soaking only the areas you need, plants grow strong and lush with minimum run-off. Our Flat Soaker Hoses are easier to use than standard hoses which are hard to bend and even harder to store. The flat design rolls up tight to store in a small space.

- 64014 25'\$12.10
- 64015 50'\$20.00

Stainless Steel The Roto Hoe

A Push Cultivator That Works For The Home Gardener!

Give your weeds a "whirl"!

Cultivator in action

The Roto Hoe

- No need to buy expensive gas!
- Plant your rows closer - More vegetables from less space.
- Forget the treadmill, get your exercise in the garden!
- Low maintenance - Won't rot or rust away.
- Won't wake your neighbors!
- Doesn't harm earthworms like a tiller.
- No need to change tines every few years.
- Shallow cultivating retains moisture and lets underlying ungerminated weed seeds rest in peace.
- Easy to use. Not just for the "Strong and Mighty!"
- 10 1/2" width.

65045 Stainless Steel.....\$256.00  50

Classic Cultivator

We are pleased to offer this high quality, well balanced cultivator with good strong wooden handles. Slightly curved, removable steel tines cut a 10" swatch. Heavy duty semi-pneumatic tire with ball bearing axle bearings. Made in the USA. Order attachments separately. Pony hitch works really well with children or ponies helping at the front end.

65018\$194.50  50

Pro Battery Microtiller

The Microtiller is used in minimal till operations to smooth the top 1/2" to 1 1/2" of soil before seeding or transplanting.

Great for smoothing and breaking up added compost, leaving your initial beds' soil undisturbed.

It can also be used to incorporate amendments like calcium or potassium into the first inch of your growing bed to maintain healthy living soil and significantly speed up your soil balancing efforts.

- Extremely easy to maintain with only three bolts to take apart the head unit
- Spring loaded throttle cable to effortlessly drive the drill at any speed
- Rubber grips for comfort
- Lighter Weight (21 lbs) with shoulder strap for easy carry!
- Lever Bolt to change handle angle quickly without the need for tools
- Entire unit beefed up to meet the demands of daily work while weight has been reduced.
- Smooth beds without ridges - no need for a bed roller
- Durable composite guaranteed to live up to rigors of farm work.
- Hardened steel tines and shaft for many years of use
- Extremely Durable
- **Powered with your cordless drill!**

Cut Flower Tools

Floral Foam Block

9" x 4" x 3" each brick. This floral foam block extends the life of your fresh flowers by providing essential hydration while securely supporting stems of all widths and sturdiness, ensuring your floral arrangements are easy to assemble and maintain. Scored in 1/32s and 1/16s and can be cut to fit any container. Whether for large bouquets or intricate centerpieces, this foam block is the perfect foundation for stunning, long-lasting floral displays.

67022 2 pk\$5.30

Floral Grid

The DIY Floral Grid is a supportive grid structure that holds flowers in place while you arrange them. Simply lock the 2 pieces of the grid in place and center on container of your choice with an opening of 6" or less. Hold the grid in place while gently inserting a few stems. Foliage can be within the grid but avoid getting any greenery below the water line. Continue to add stems until the grid and vase are full. Separate the grid pieces and slide them away from the finished arrangement. The stems stay neatly in place. Enjoy your handiwork.

Floral Tape

A simple tic-tac-toe pattern across your vase opening with this waterproof floral tape keeps stems perfectly in place. Make arranging flowers fun and effortless! Size: 1/4" x 90'

67025\$6.50

Floral Water Tube

Elevate your floral arrangements with these clear water tubes, specially designed to keep individual flower stems fresh and hydrated. Perfect for florists and hobbyists alike, these tubes provide an easy and discreet way to ensure each stem stays nourished, extending the life of your blooms. The transparent design seamlessly blends into arrangements, allowing the beauty of your flowers to take center stage. Lightweight, reusable, and easy to fill, it will preserve the vitality of your flowers from the moment they're cut to their final display.

67020 3" . 5 pk\$2.50

Flower Dri

Recognized by professionals as the best material for maintaining color when drying flowers. Reusable for years. Easy to follow directions on bag. Warning: This is addictive! Flowers to consider drying: Delphinium, Larkspur, Roses, Peonies, Cockscomb, Zinnias, Hollyhock, Salvia, Marigold, Snapdragon, Daisy, Ageratum, Bells of Ireland, Coneflower, Cosmos, Dusty Miller, etc. To help protect dried flowers from humidity, spray with clear acrylic spray, after removing from Flower Dri.

67006 2 lb\$11.00

67008 10 lb\$42.20 

Flower Fuel

A clear flower food designed to keep freshly foraged or cut flowers hydrated, vibrant, and long-lasting. Easy to mix and safe for all flower types, it enhances color, freshness, and vase life.

67024 8 oz\$7.10

Fresh Flower Preservative

Enjoy your bouquets longer! Add fresh flower preservatives to your cut flowers to extend the life and retard wilting. 1 pkt makes 1 qt.

67012\$1.00

Galvanized Metal Flower Lid

This charming metal flower arranger, crafted with a delightful chicken wire mesh, adds a rustic touch to your floral displays. Perfect for creating eye-catching arrangements, it fits a variety of jar sizes-half-pint for petite posies, pint for small bouquets, and quart or half-gallon for abundant displays. Ideal for wildflowers, garden picks, or even workspace organization, it offers versatility beyond flowers. Use it to declutter by holding pens, pencils, or art supplies with a creative flair.

67016 Standard\$5.80

67017 Wide Mouth\$6.00

Vase Brush

This brush will work in most vases, even one with a narrow mouth and wide bottom! Can be bent to get to hard-to-reach places.

DISEASE, PEST & WEED CONTROL

Application Tools

Chemical Measuring Cup

This handy 4 oz. cup calibrated for tsp., Tbsp., and oz. provides a measuring device so you don't use your kitchen utensils.

67230 4 oz.\$2.10

Mark It Blue

Liquid

Shows where you've sprayed. A concentrate blue colorant designed to provide temporary highly-visible evidence of spray application patterns. MARK-IT BLUE readily dissipates, is non-toxic and totally compatible with water-soluble solutions. Use on lawns, pastures, driveways, or grassy areas virtually anywhere spray evidence is needed. Mark-It Blue will not permanently stain vegetation or soil and can be used with all types of equipment. Indicates drift and eliminates waste. :: Mixing Rate: 1 oz. per gal.

67386 8 oz. (concentrate)\$8.30

Liquid Tank Cleaner

Liquid

Reduce or eliminate residues from pesticides in mix tanks by thorough cleaning with Liquid Tank Cleaner from one tank mix to the next. Extend the lifetime of seals and other soft parts in equipment and lines. Use with all active ingredients. Tank Cleaner has an extremely alkaline pH, which helps dissolve acid active ingredients more efficiently and works well with herbicides, which are particularly stubborn when being cleaned from a tank. :: Mixing Rate: 1 oz. per gal. 1 qt. per 400 gal.

67382 32 oz. (concentrate)\$14.60

Spreader Sticker

Liquid

An excellent wetting and adhering agent that improves the performance of all modern pesticides by dispersing the application uniformly and protecting the pesticide from rain wash off and weathering. ATTENTION: If you aren't using a spreader sticker when spraying insecticides and fungicides you may be spraying away money. You will see the difference on the plants when you spray, using Spreader Sticker. :: Mixing Rate: 1 - 2 tsp. per gal.

67457 16 oz. (concentrate)\$11.20

Fungicide

TOP PICK

Actinovate

ORGANIC

Liquid-Soluble Powder

OMRI® Listed. A high concentration of a patented beneficial bacterium in a water soluble powder. This powerful product effectively suppresses & controls a wide range of root rots and damping off caused by pathogens like pythium, phytophthora, fusarium, rhizoctonia, verticillium and other root decay fungi. Actinovate for Lawn & Garden is also effective as a spray application for foliar diseases such as powdery and downy mildew, bacterial spot, black spot, botrytis, alternaria and others.

How it works: When introduced into the root zone or applied to foliage this microbe colonizes and grows around the structure of the plant, while secreting beneficial and protective by-products. This combination of the colonization and the protective secretions forms a defensive barrier around the plant which in turn suppresses and controls pathogens. To ensure a solid population of disease-fighting microbes, we recommend three applications three days apart then only once every three weeks. This has proven very effective for large growers. Helps control damping-off when used in seed starting mix. Compatible with Monty's and chemical insecticides. Refrigerate after opening to increase shelf life up to 8 months. For maximum protection, use with a spreader sticker. Do not mix or rotate with Copper fungicide. Mix only what you want to spray the same day. Fights root diseases in annuals, perennials, trees & lawns. Effective against foliar diseases such as powdery mildew and black spot. Approved for organic gardening. Safe & Non-toxic. :: Mixing Rate: 1 - 2 tsp. per 2 gal.

67208 2 oz.\$19.10

67209 18 oz.\$128.50

Captan 80-WDG

Liquid-Soluble Powder

Multipurpose fungicide for ornamentals and fruits. Controls damping-off, powdery mildew, botrytis blossom blight, anthracnose, rust, brown rots, early blight and late blight on various plants. :: Mixing Rate: 1 1/2 - 2 Tbsp. per gal.

67530 8 oz. (concentrate)\$12.40

67229 6.25 lb. (concentrate)\$78.10  5

Copper Dust

ORGANIC

Liquid-Soluble Powder

7% copper sulfate for controlling early and late blight, leaf spots, downy mildew, anthracnose, and certain other fungal diseases on various vegetables, flowers, ornamentals and fruits. Does not contain insecticide. Won't burn plants. :: Mixing Rate: 2 oz. per gal.

67231 1 lb.\$9.40

Copper Liquid

ORGANIC

Liquid

Use Liquid Copper for these diseases on various vegetables, flowers, ornamentals and fruits: early and late blight, leaf spots, downy mildew, anthracnose, and certain other fungal diseases. Does not contain insecticide. :: Mixing Rate: 2 - 4 Tbsp. per gal.

67380 16 oz. (concentrate)\$18.80

Earth's Ally 3-in-1 Plant Spray

ORGANIC

Liquid

Earth's Ally 3-in-1 Plant Spray makes no compromises, effectively controlling soft-bodied insects and common plant diseases with a synergistic blend of thyme, rosemary, clove, and peppermint oils. The formula leaves no harmful residue on plants and can be safely sprayed on herbs and vegetables up until the day of harvest. Kills spider mites, whiteflies, aphids, thrips, mealy bugs, leaf rollers and scale insects. Controls powdery mildew, downy mildew, blight, canker, black spot and leaf spot. Fully saturate the stems and leaves of the plant you are treating, including the undersides of the leaves where bugs are often found. Do not apply in temperatures over 90 degrees and for additional safety, avoid use when pollinators are active. Shake well before dispensing. :: Mixing Rate: 1 1/4 c. per gal.

67515 32 oz. (concentrate)\$23.30

Fungicide Continued

Fire Blight Spray

Liquid-Soluble Powder

21.2% Streptomycin Sulfate for control of fire blight, bacterial wilt, stem rot, leaf spot, crown gall on fruit trees, flowers, shrubs. :: Mixing Rate: 1 Tbsp. per gal.

67304 2 oz (concentrate)\$18.10

Fung-onil (Daconil)

Liquid

Controls early blight on tomatoes. A proven broad spectrum fungicide for use on vegetables, fruit trees, flowers and lawns. Controls rust, botrytis, anthracnose, downy mildew, alternaria leaf spot, powdery mildew, early blight, peachleaf curl, and many others. 29.8% Chlorothalonil. :: Mixing Rate: 1 - 2 Tbsp. per gal.

67237 16 oz (concentrate)\$20.00

Garden Phos

Liquid

Systemic Fungicide. It is very effective in controlling plant diseases such as phytophthora, downy mildew, pythium, black spot, root rot, anthracnose, and more. It contains mono-potassium and di-potassium salts of phosphorous acid and it functions as both a curative and preventive treatment to plants. It may be applied as a foliar spray, soil drench, by soil incorporation, through basal bark treatment and as a bare root dip. It can be used on vegetables, fruits, trees, turf, ornamentals, in landscapes and interior-scapes, and bedding plants. Similar to our K-Phite 7 only in a pt. bottle. :: Mixing Rate: 2 - 3 Tbsp. per gal.

67312 16 oz (concentrate)\$22.20

Immunox Spray

Liquid

When natural controls aren't working, try this highly effective fungicide. Contains an ingredient used by professional landscapers nationwide. Doesn't wash away with rain once it has dried. Controls brown patch, rust, powdery mildew, black spot, blights, scab and more. New expanded label has fruits, vegetables, berry plants, and grapes listed. Same active ingredient as Rally. Try this for strawberry leaf diseases. Formulation: 1.5% Myclobutanil :: Mixing Rate: 1/2 - 3 oz. per gal.

67340 16 oz (concentrate)\$17.50

Indar

Liquid

Fungicide that offers protectant control and strong residual activity against diseases of apples, stone fruit, almonds, blueberries and cranberries. Excellent control of blossom blight, fruit brown rot and black knot in stone fruits and scabs, rusts, sooty blotch and flyspeck on apples. Excellent protection of the fruit and leaf by remaining on the fruit and leaf surface longer with good rainfastness. Protectant control with some locally systematic and curative activity. Can be used up to 1 day prior to harvest on some fruits. :: Mixing rate 1/2 - 3/4 tsp. per gal.

67338 4 oz (concentrate)\$21.40

67339 1 gal (concentrate)\$478.00

Kphite 7LP

Liquid

K-Phite Controls: phytophthora, pythium, fusarium, rhizoctonia, anthracnose, cercospora (leaf spot) cercosporidium (leaf spot), xanthomonas campestris, downy mildew, powdery mildew, erwinia amylovora, pink rot. Derived from dipotassium salts of phosphorous acid. In Tomatoes and Peppers: bacterial leaf spot, late blight. In Peaches: bacterial leaf spot. In Cabbage and leafy greens: bacterial leaf spot and black rot. In Melon, Pumpkin, Squash, Cucumber: bacterial spot. Carrots: bacterial leaf spot, carrot bacteriosis. :: Mixing Rate: 1 - 1 1/2 oz. per gal.

67362 1 gal (concentrate)\$59.40

67364 2.5 gal (concentrate)\$106.00

Lime Sulfur

Liquid

A very effective dormant spray for berry plants and fruit trees. Apply to fruit trees and grapes in early springs at bud swell. Raspberries and blackberries are the best sprayed after buds show green tip. Can be combined with dormant oil. Also used for in season control of mildews and brown rots. Rates are reduced for summer applications. :: Summer Mixing Rate: 1 - 2 oz. per gal. Spring Mixing Rate: 4 oz. per gal.

67377 32 oz (concentrate)\$13.60

67378 2.5 gal (concentrate) (Sulfurix)\$104.00

OxiDate - Zerotel

ORGANIC

Liquid

OMRI® Listed. One of the best and safest new fungicides available. Greenhouses and growers have used this product with excellent success for several years. Oxidate works immediately on contact, stopping and preventing virtually all diseases. Can be used as a drench for seed starting to prevent damping off and stem rot. Powerful activated peroxygen chemistry.

OxiDate RTS may be used as a preventative and curative spray treatment on any type of fruit or vegetable. There has never been a greater need for organic disease control, and OxiDate RTS is the perfect treatment for tomatoes, cucumbers, peppers as well as fruit and citrus trees. Rotate with Copper for more lasting protection. Effectively controls Alternaria, Anthracnose, Botrytis, Brown Rot, mildews, Fusarium, Pythium Rot, Phytothora, Rusts, Early and Late Blights, plus more.

Zero days to harvest.

Zero hour re-entry time.

No mutational resistance

OMRI listed - meets organic standards. Can be used weekly with no toxicity

Long-lasting, alternative to copper based products.

Can be hooked up to hose for quick application,

For best results, use once a week.

Begins working immediately

Mix at 1-3 oz per gal. (1 gal concentrate covers approx. 48,000 sq ft, 2.5 gal concentrate covers approx. 120,000 sq ft)

67403 32 oz (concentrate)\$20.60

67404 1 gal (concentrate)\$38.50

67402 2.5 gal (concentrate)\$113.50

Physan 20

Liquid

Get rid of fungus, mildew, algae, germs, and odors in your house. Kills mildew and odors in storage area, shower, basement, kitchen, closet and boat.

Get rid of garden fungus, black spot, powdery mildew, fire blight, or black fungus on your ornamental plants or fruit trees and brown patch on your lawn. :: Mixing Rate: 1 - 1 1/2 Tbsp. per gal. (Formerly Triple Action 20)

- Disinfects

- Prevents Mold

- Biodegradable

- Environmentally safe

- Use to disinfect greenhouses, flower pots and scissors used to take cuttings and trimmings.

- Treat plant cuttings to control mildew and diseases.

- Treat soil and seedlings to prevent damping off.

- Use for disease control, black spot, etc. on roses.

- Removes and prevents algae in bird baths.

67408 16 oz (concentrate)\$10.90

67407 1 gal (concentrate)\$44.60

Rally

Liquid-Soluble Powder

For effective control of apple scab, mildew, rust, leaf spots and black rot. Labeled for apples, peaches, cherries, grapes and berries. Formulation: Myclobutanil 40% :: Mixing Rate: 1 - 2 tsp. per gal.

67428 4 oz (concentrate)\$25.70

67429 20 oz (concentrate)\$101.00

Revitalize Bio Fungicide

ORGANIC

Liquid

Harness the disease fighting power of this potent new strain of bio fungicide. Controls various molds, blights, rots, mildews and spots. Use on fruits, vegetables, ornamentals or houseplants. This product may be used up to the day of harvest. Similar to Serenade with a different mode of action. :: Mixing Rate 1 tsp. per gal.

67435 16 oz (concentrate)\$19.90

Serenade

ORGANIC
Liquid

OMRI® Listed . Spray leaves, stems and new shoots to achieve complete and thorough coverage of the plant. For best results, apply product prior to disease development or at the first sign of infection. Repeat every 7 days to protect new foliage. Under conditions of high disease pressure or periods of frequent rainfall, shorten the number of days between spraying. If rainfall occurs within 4 hours of spraying, re-apply product. Do not water foliage within 4 hours of application. :: Application Rate: 15 oz. of spray solution per 100 sq. ft. :: Mixing Rate: Fruits and vegetables, 4 oz. (1/2 c.) per gal. of water. Ornamentals, mix 1 - 2 oz. (2 - 4 Tbsp.) per gal.

67448 32 oz (concentrate)\$21.10

DISEASE CONTROL

Organic. Effective. Safe.

Topsin M 3336

Liquid

67397 100 million in water soluble pouch.....\$95.00

Fruit Tree & Plant Guard

Liquid

Another Bonide exclusive! This proprietary formula is the first "purpose built" fruit care product for home gardeners to be offered in decades. We've combined the insecticide Lambda-Cyhalothrin with a patented, synergistic pairing of two fungicides- Boscalid and Pyraclostrobin. Lambda hasn't met a bug it can't kill.

Boscalid, classified by the US EPA as reduced risk, is a new class of fungicide with a unique mode of action, making it effective against plant pathogens resistant to other fungicides. Pyraclostrobin provides local, "translaminar" systemic action, designed to move from the top surface to the leaf, to the bottom, so applications to the tops provide disease control to the undersides as well. The product does not penetrate the fruit. This goof proof water based combination is economical, versatile and has a very broad spectrum. :: Mixing Rate: 2 oz. per gal. treats not only a comprehensive listing of fruit, but also nuts, flowers, shrubs, and ornamentals. For home grown fruit you can eat, Fruit Guard is the answer! Not for sale in CA, NY.

67307 16 oz (concentrate)\$40.50

Fruit Tree Spray

ORGANIC
Liquid

2-in-1 insect and disease protection for fruit trees. Controls Apple Maggots, Codling Moths and Apple Scab. Use on apples, cherries, grapes, peaches and more. Active Ingredient: 70% Cold Pressed Neem. :: Common Mixing Rate: 1 1/2 - 6 Tbsp. per gal. Ideal for fungus and insect control.

67309 16 oz (concentrate)\$21.70

67310 32 oz (concentrate)\$37.20

Dusting/Wettable Sulfur

Liquid-Soluble Powder

100% Natural. Provides a versatile method of controlling listed insects and diseases. Can be used as a dust or wettable spray on roses, shrubs, flowers, fruits and vegetables. Controls black spot, powdery mildew, leaf spot and rusts. Formulation: Sulfur :: Application Rate: As a spray: 4 Tbsp per gal. As a dust: Apply on all plant surfaces to thoroughly cover.

60320 3.25 lb\$12.30

Disease, Pest & Weed Control

Neem

ORGANIC
Liquid

Mix with Orange Label Monty's to keep your roses in top shape. Use on: fruits, nuts, vegetables, herbs, roses, houseplants, flowers, trees and shrubs.

Formulation: Hydrophobic Extract of Neem Oil. Insects Controlled: Aphids, spider mites, scale, whiteflies, beetles, leaf rollers and other insects. Diseases Controlled: Flower, twig and tip blight, alternaria, scab, needle rust, botrytis, leaf spot, rust, anthracnose, downy mildew, black spot, and powdery mildew. :: Mixing Rate: 2 - 6 Tbsp. per gal. Thoroughly mix solution and spray all plant surfaces. On all fruits and vegetables may be applied up to day of harvest.

67395 16 oz (concentrate)\$20.70

Orchard Spray

ORGANIC
Liquid

Contains sulphur plus Pyrethrin. This all natural, all in one, insect and disease control concentrate is perfect for the customer that prefers a natural choice. Great for fruit trees, vegetables, ornamentals, houseplants and lawns. Truly effective and all purpose. Use up to day of harvest. :: Mixing Rate: 2 - 4 oz. per gal. of water.

67306 32 oz (concentrate)\$25.10

Organocide Bee Safe 3 in 1

ORGANIC
Liquid

OMRI Listed and proudly made in the USA, Organocide® Bee Safe 3-in-1 Garden Spray features a unique blend of sesame oil, potassium sorbate, lecithin, and edible fish oil. This powerful combination acts as an effective insecticide, miticide, and fungicide, all while being safe for bees and adult butterflies. This organic spray is free from petroleum solvents, making it a perfect alternative to chemical-based pesticides. Organocide® effectively targets soft-bodied insects, spider mites, and scale insects, while also controlling common fungal diseases. Some plants in the Euphorbia family (Crown of Thorns, Poinsettia) as well as some succulents and tomato plants have shown sensitivity. If in doubt, test first on a small area of foliage to determine plant safety.

67531 32 oz\$20.60

Rose Granules All-in-One

Granular

If you want to grow big, abundant blooms, our one-step solution offers new ways to feed your roses, protect against insects and prevent diseases. All-in-One Rose & Flower Care is three systemic products in one. Fertilizer to promote strong roots and beautiful blooms. Insect Control that controls Japanese Beetles (adult), Aphids and other listed pests. Disease Control for Black Spot, Powdery Mildew, Rust and Southern Blight. It is convenient and easy to use. :: Application Rate: Roses: 1 capful per plant. Azaleas, Rhododendrons, Shrubs: 1/2 capful per ft. of plant height. Flower beds: 1/2 capful per 12 sq. ft.

60283 4 lb\$25.90

Rose Shield

Liquid

Another incredible goof proof combination. Best available technology formula from Bonide.

- Lambda-Cyhalothrin kills bugs on contact and by ingestion.
- Thiamethoxam is absorbed by the plant, and moves rapidly throughout, killing insects from within.
- Difenoconazole, a contact and systemic fungicide, works from within the plant as well, stopping existing, and preventing new plant diseases. A great solution for insect and disease problems of roses, flowers, landscape plants, trees, shrubs, and ground covers. Lasts up to 30 days. Rain proof within 60 minutes. No odor, non-staining. :: Mixing Rate: 3 oz. per gal. Not for sale in CA, NY.

67436 16 oz (concentrate)\$16.80

Triple Action

ORGANIC
Liquid

A terrific combination of Neem oil plus Pyrethrins. Excellent for organic gardening. Multi purpose insecticide, fungicide and miticide. Kills eggs, larval and adult stages of insects. Prevents fungal attack of plants tissue. For use on: Fruits, nuts vegetables, herbs, roses, houseplants, flowers, shrubs and turfgrass. :: Mixing Rate: 2 Tbsp. per gal. Thoroughly mix solution and spray all plant leaf surfaces (including underside of leaves) until completely wet.

67496 16 oz (concentrate)\$28.50

67497 32 oz (concentrate)\$50.60

67498 8 oz (concentrate)\$17.70

Grub Control

Beetle Gone

ORGANIC
Powder

Finally a good effective organic control for Japanese Beetles. This biological powder insecticide effectively controls various beetles, chafers and weevils including Japanese Beetles, Masked Chafers, Asiatic Garden Beetles, Oriental Beetles and other scarab & wood boring beetles including the Emerald Ash Borer. Applied as a foliar spray, once ingested the pest will stop feeding and die. It is the first BT insecticide powerful enough to control both adult and larva stage of susceptible beetles, yet it demonstrated no adverse risks to non-targets tested such as bees, wasps, ladybugs, fish or birds.

We recommend 2 treatments at 1 week interval when you start to see an infestation. :: Mixing Rate: 2 - 3 oz. of the powder for every 1 gal. of water and apply the mixture with a garden sprayer. Shake if needed to keep suspended. It is best to apply when rain is not in the forecast for a few days. If rain is forecasted, you may want to use a sticker with the application. Store cool and dry. 2 year shelf life. Certified for organic gardening.

67214 1 lb\$58.60

67215 1/2 lb\$35.20

Grub Killer Plus

Granular

Excellent turf rescue formula-delivers overnight results! If you need to eliminate grubs, this is the quickest way to do it. Spread with lawn spreader. Light watering helps speed up results. PLUS kills ants, billbugs, chinch bugs, crickets, cutworms, earwigs, grasshoppers, leafhoppers, millipedes, mole crickets, pillbugs, scorpions, sod webworms, sowbugs, and ticks. Active: 9.3% DYLOX. :: Application Rate: 10 lb. treats 5,000 sq. ft. for grubs, 7,500 sq. ft for other lawn pests.

60094 10 lb\$30.70 10

60095 20 lb\$52.80 20

Milky Spore Granules

ORGANIC
Granular

Milky Spore is a bacterium that infects and kills grubs. You apply milky spore to your lawn and water it in so grubs become infected by swallowing a spore when feeding on grass roots. The grub is killed 7 to 21 days later. As the grub decomposes billions of new spores will be introduced into the soil from one grub. As the spores multiply in your soil, they spread to cover the entire lawn. As time passes, the spores will spread to neighboring lawns. This bacterium becomes more effective over time and has a life span of 15 years. Milky Spore is approved by the EPA. It is a safe material to kill grubs. It is not toxic to insects, birds, pets or humans. It will not affect wells, ponds or streams. Also, it is harmless for food crops. :: Application Rate: 1 lb. per 350 sq. ft.

67521 15 lb\$48.70 15

JAPANESE BEETLE / GRUB LIFE CYCLE

Milky Spore Powder

ORGANIC
Powder

OMRI® Listed. Milky Spore will not spread unless grubs are present in the soil. The more numerous the grubs, the faster Milky Spore is established. After Milky Spore has built up in the lawn, infected Beetle larvae will die and decay, releasing billions of new spores into the soil. This process will continue on its own, year after year. Once the soil is saturated with spores and the grubs are destroyed, Milky Spore will remain dormant and viable ready to go to work once again, should new grubs appear. In warm climates, spread of the Milky Spore bacterium can be fairly rapid, saturating and spreading for effective control in 1-3 years. Heavy infestation of grubs "ten or more grubs per square foot" show dire consequences and a chemical may be used along with Milky Spore to destroy the majority of the Beetle larvae, allowing Milky Spore to remain as a residual back-up against grubs that are resistant to pesticides and against future infestations. Milky Spore is not affected by insecticides or pesticides and may be applied along with such materials in an integrated pest management program. :: Application Rate: 10 lb. of Milky Spore powder per acre. 1 lb. of Milky Spore powder to treat 4,000 sq. ft. Place 1 tsp. every 4' across your lawn in warm spring weather.

- 67387 10 oz.\$32.00

Captain Jack's Dust

ORGANIC
Dust

This organic dust has the same active ingredient as our popular Borer Bagworm Spray. Use to dust potatoes, fruits, vegetables, berries, grapes, and ornamentals. :: Application Rate: 1 lb. per 1,000 sq. ft.

- 67226 4 lb \$13.40

Crop Spray Liquid

A multi-purpose concentrate insecticide that provides a fast knockdown and efficient control of insect pests. Contains 6% Pyrethrins, a botanical insecticide derived from the Chrysanthemum flower and 60% PBO, a synergist that greatly enhances it's effectiveness. If you want to knock out cucumber beetles and squash bugs without strong chemicals we are highly recommending this product. Also effective against deer, horse and stable flies, face flies, biting and sucking lice, gnats, houseflies, mosquitoes, mites, fleas, ticks and bed bugs. :: Mixing Rate: 1 1/2 tsp. per gal.

- 67320 32 oz.\$158.50

Diatomaceous Earth

ORGANIC
Dust

Safe for household use and approved for organic growers, diatomaceous earth (DE) is a natural insect killer made from fossilized diatoms. Its microscopic, razor-sharp particles pierce soft-bodied insects on contact, causing dehydration and death. Even many hard-bodied insects that ingest DE suffer the same fatal effect internally, ensuring certain death. Reapply after rain. Use on plants, soil, or after spraying with Surround for broad organic pest control, including slugs, aphids, beetles, and caterpillars.

For animals, DE provides trace minerals and helps control worms and parasites. Mix into feed: cows and horses 1-2 oz/day; sheep, goats, and hogs about 1/2 oz; dogs 1/2 tsp.

- 67245 4 lb w/duster..... \$13.60 5

NEW

Coddling Moth Trap Kit

Mechanical

Coddling Moth larvae are among the most destructive pests to fruit trees, especially apples. Their feeding damages developing fruit, often making entire crops unmarketable. Though not usually fatal to trees, infestations can cause rot, deformity, and secondary diseases like Sooty Mold. Coddling Moth Traps use powerful pheromone lures to attract adult male moths as they gather near fruit trees to mate. Once drawn in, the moths become trapped on the sticky surface. While these traps target only the flying adults and do not affect larvae, they are a highly effective, non-toxic way to disrupt the breeding cycle. Each lure remains effective for up to 30 days.

67560 2 pk. \$18.60

Cucumber Beetle Trap

Mechanical

Cucumber Beetles are a major problem wherever squash, cucumbers, watermelon, pumpkin and other cucurbits are grown. Beetles can kill or severely stunt seedlings and on older plants damage stems and fruits. The beetle is well-known for transmitting bacterial wilt, and some viruses. Gummy stem blight is also associated with beetle damage. Larvae feed on roots reducing yield. The cucumber beetle lure has been specifically developed so that it can be used to trap multiple species of cucumber beetles. Effective for: striped cucumber (*acalymma vittatum*), western striped (*A. trivittatum*), spotted cucumber (*diabrotica undecimpunctata howardi*), western spotted cucumber beetle (*D. undecimpunctata undecimpunctata*)

Instructions: Place lure on or very near to yellow sticky trap. Use one trap with lure per 2,000 sq ft for monitoring or one trap/lure per 400 sq ft for trapping. Replace when filled with beetles or dirty. The cucumber beetle lure attracts for 3-4 weeks, depending on temperature.

2 Traps (reusable) and 2 Lures Per Kit

67235 2 pk Trap & Lure. \$19.70

67234 1 pk Replacement Cure \$5.20

Deer Repellent Pods

67508 \$20.80

Dog & Cat Repellent

Granular

Tired of dogs and cats ruining your landscape? Made from all natural ingredients that include white pepper, cinnamon oil, and thyme oil. This high potency, long lasting formula is specifically formulated to repel dogs and cats to prevent defecation, urination, and digging. Protect gardens, lawns, and trash cans with this convenient granulated formulation. :: Application Rate: 1 lb. per 200 sq. ft.

67252 3 lb \$16.70

Fly Lid . 5 Gallon Bucket

Mechanical

Tackle major fly infestations effortlessly with the 5 Gal Fly-Condo. Unlike traditional traps that use poisons or sticky adhesives, this innovative fly lid transforms a regular 5-gallon bucket into an effective, non-toxic fly trap. Simply bait the bucket with your preferred attractant—household items like vinegar, fruit, honey, or even red wine work wonders. As soon as the flies catch the scent, they'll be drawn down through the funnels and trapped inside, unable to escape. The Fly-Lid is discreet and doesn't rely on foul odors, making it suitable for use near your home or patio when using mild baits. For more severe outdoor fly problems, you can opt for stronger bait, like shrimp in water, which drives flies wild after a day or so. This trap can capture thousands of flies in a single bucket! When it's time to empty, just remove the lid, dispose of the contents, and reuse the lid to continue your fly control efforts.

67241 \$9.50

Disposable Cup Sized

Mechanical

The Billy Bob Fly Lid transforms any ordinary cup into an effective and non-toxic fly trap. Simply bait the cup with your choice of attractant, snap on the lid, and watch as flies are drawn in without the use of harmful chemicals. Perfect for use in barns, kitchens, or outdoor spaces as a mess-free and environmentally friendly solution to fly control.

67242 2 pk. \$3.10

Giant Destroyer

Mechanical

The effective rapid sulfur gas killer for all tunneling and burrowing rodents and animals in their holes, tunnels, and burrows. Most powerful of all gas cartridges. For ground hogs, voles, moles, skunks, ground squirrels, and more. Light fuse, place in tunnel, and cover up all entrance holes.

67314 4 pk. \$6.40

Houseplant Sticky Stakes

Mechanical

Ideal for use indoors or outdoors in potted plants. The yellow color of the trap as well as the glue will attract the insects. Just peel apart the traps, insert them into the adjustable stakes, and place at the base of your plant to start trapping insects immediately. These stakes are great for white flies, fungus gnats, blackflies, thrips, fruit flies, midges, and more.

62601 7 pk. \$9.00

Huge Reel Sticky Fly Tape

Mechanical

An economical, effective, and safe fly control method. This ribbon creates an irresistible landing area for flies. It works great for barns, shops, milking parlors, stores, and anywhere flies are a problem. Use with the hardware kit for a handy, no touch way to replace used ribbon. Tip: Wet your hand when handling this tape and it will not stick to your fingers.

67319 1330' \$58.00

67390 5 lb \$15.00  5

Mosquito Dunks

Mechanical

Kills Mosquitoes before they're old enough to bite! The Mosquito Dunks are America's best-selling home owner mosquito control product. The only product with BTI, a bacteria toxic only to mosquito larvae, that lasts 30 days and treats 12 square feet of surface water. Non-toxic to all other wildlife, pets, fish, and humans. Simply apply Mosquito Dunks® to any standing water, birdbath, water trough or water garden. Kills within hours, lasts for 30 days or more. Labeled for Organic Gardening by the USEPA.

67391 5 pk. \$4.50

Mouse Glue Traps

Mechanical

Designed for capturing mice without the use of poisons or traps that kill the rodents. Ready to use & easy to dispose of, tenacious holding power, low profile tray captures rats & mice better, pesticide free

67550 4 pk. \$6.40

Mouse Magic

Mechanical

Make'em disappear. The all natural ingredients trigger escape/avoid behaviors in mice driving them from any rooms sheds, attics, RV's, equipment or storage areas that attract them. Easier than traps. Pleasant smelling and lasts for weeks. Not for sale in IN, NM.

67393 12 ct. \$26.80

Mouse Traps

Mechanical

Powerful, aggressive design kills mice fast. Highly sensitive trigger reacts to even the smallest of mice. Removable bait cup makes it easy to setup and attract mice. Interlocking teeth make escape virtually impossible. Easy to use and set, easy to open for clean, no-touch disposal. Reusable traps eliminate waste and are a better value over time.

67552 2 pk. \$7.20

Poison Moleworms

Mechanical

Quickly and effectively kills moles. For use in underground runways and tunnels. Looks and feels like real earthworms. Includes 10 worms, 5 active tunnel locator flags, and 1 protective glove. Made in the USA.

Selecting the proper area to place the Poison Moleworms™ is essential to successfully getting rid of moles in your yard. Begin by locating active tunnels. Make 1 inch holes in the roof of a tunnel and mark the opens with the locator flags (included). Revisit the holes after 24-48 hours. Tunnels that have had holes resealed are an indicator of mole activity and a good place to bait.

Proper bait placement: After you've located an active tunnel, simply poke a hole that's slightly larger than the diameter of a Poison Mole worm TM in the roof of the active tunnel and drop the mole killer in. Reseal with dirt and repeat every 5-10'.

67409 10 pk. \$21.40

Rat Glue Traps

Mechanical

Designed for catching rats and other larger rodents. Here are the key details: ready to use & easy to dispose of, tenacious holding power, low profile tray captures rats & mice better, pesticide free.

67551 2 pk. \$8.30

Repels All

ORGANIC

Granular

These all-natural ingredients repel in three ways, by touch, taste, and smell. Triggers ingrained fear and flight responses in animal intruders, without harm. Reapply as needed, approx. every 2 weeks. Granules work best for small animals, and liquid is more effective for larger animals. :: Application Rate: 1 lb. per 500 - 800 sq. ft.

67431 32 oz (concentrate) \$19.90

67432 3 lb (granules) \$18.80

Rescue Disposable Fly Trap

Mechanical

Flies find it fast! The attractant packet inside the bag dissolves and activates when you add water. Simply cut the clear plastic circle at the very top, following the scissor symbols and dashed lines. Add water to the fill line and it's ready to go. Lured by the scent, flies enter the trap through the yellow top cap and drown in the water. Never touch the bait or the flies. Just add water and hang outdoors. Disposable.

67511 \$5.50

Rescue Yellow Jacket Trap

Mechanical

Disposable yellow jacket trap is effective in targeting and trapping all major species of yellow jackets found in North America, especially during warm, dry summer months. Features a powerful attractant as well as a handy disposable bag for additional ease and convenience. Add water to activate the powdered attractant - the insects simply won't be able to resist its lure. Once inside the trap, yellow jackets drown in the liquid. Perfect for taking on the go for picnics or camping trips. Lure lasts for weeks.

67433 \$6.80

Revenge Fly Catcher

Mechanical

The original fly catcher ribbon. Guaranteed not to dry out, leak in transit and storage, or be messy and obnoxious to use, like others are. Our "EZ Grab Tab" unfurls the ribbon cleanly and easily.

67434 5 ct. \$3.40

Small Rodent Tunnel Trap System

Mechanical

The Tomcat Tunnel Trapping System offers a powerful, non-toxic solution for pest control, ideal for situations where poison isn't suitable. Designed for effective elimination of pests like chipmunks, squirrels, and rats, this robust system includes two reusable snap traps housed within a durable polypropylene tunnel. The tunnel shields the traps from weather and tampering, ensuring safety around pets, children, and non-target wildlife. Its high-impact, reusable construction, coupled with an innovative "head-on" capture design featuring patented interlocking teeth, makes escape nearly impossible.

67554 \$35.70

Snake Stopper

Granular

Effectively repels snakes from yards, gardens, sheds, patios, decks, or anywhere snakes are undesirable. Safe for use where children and pets play. Can be used as a perimeter treatment. :: Application Rate: 1 lb. per 8" by 50'. Can be renewed every 2 weeks if needed. Safe non-chemical formulation.

67454 4 lb \$15.90

Terro Ant Killer II

Liquid

Favorite ant killer for over 80 years. Fast, effective, economical, and easy to use. Ants carry Terro back to the nest where it destroys the entire colony.

67477 1oz \$5.20

Terro Fruit Fly Trap

Mechanical

Designed to lure adult fruit flies using a special non-toxic food-based liquid lure. Flies that enter the trap can't escape to continue breeding. Traps are most effective when placed near problem areas.

67478 2pk. \$9.40

Tick-Take

Mechanical

A tick removal spoon is a safe and easy way to remove ticks, of any size or level of engorgement, from people and pets. The specially designed notch grabs the tick at the skin level and removes it completely in one continuous sliding motion without dropping or touching them.

67483 3 pk. \$5.90

Turf Ranger II Granular Insecticide

Granular

Formulation: Deltamethrin. Spread granules around your house and buildings to prevent ants, spider, crickets, fleas, and other creepy crawlies from entering. Controls many lawn insects too. :: Common Application Rate: 1 - 4 lbs. per 1,000 sq. ft.

60327 10 lb \$16.70 10

Wasp & Hornet

Liquid

Triple action formula provides instant knock down, quick kill and residual action that takes out the entire nest and prevents re-nesting. Jet spray shoots 20 ft. Oil-based. Kills carpenter bees.

67520 15 oz (aerosol) \$7.10

Window & Screen Fly Catchers

Mechanical

Very sticky and long lasting. Traps flies, gnats, and other flying insects. Odorless, insecticide free. Attaches directly to window pane or screen, just peel and press. Almost transparent, easily removed from the window or screen. 10 1/2" x 3 1/4".

67507 4 pk. \$6.30

Weed Control

4 Speed XT Weed Killer

Liquid

If you want results, use this commercial form of lawn weed control. Selective Herbicide combines four active ingredients, triclopyr, 2,4-D, pyraflufen and dicamba for a powerful and fast control of more than 100 broadleaf weeds. As a fast acting and effective weed killer, you will start to see symptoms of injury to the weeds with 1 - 2 days of application even in hard-to-kill weeds, such as oxalis, spurge, wild violet and wild geranium. To minimize drift, use a medium or coarser spray nozzle. :: Application Rate: approx. 1,000 sq. ft. Mixing Rate: 1.1 - 1.5 fl. oz. per gal. of water.

67203 32 oz (concentrate) \$46.30

Bayer Lawn Weed and Crabgrass

Liquid

Controls over 200 weeds. Controls both grassy and broadleaf weeds in one easy step including Crabgrass, Barnyard grass, Foxtail, Black-eyed Susan, Buttercup, Catnip, Chickweed, Dandelion, Dollarweed, Ground Ivy, Jimsonweed, Morning Glory, Poison Ivy, Poison Oak, Ragweed, Sunflower, Thistle, and other broadleaf weeds. Use on lawns, orchard and pasture. Rainproof in 1 hr. :: Application Rate: 1 pint covers up to 2500 sq. ft. Mixing Rate: 2 oz. per gal.

67366 40 oz (concentrate) \$18.00

Brush & Stump Killer

Liquid

Controls unwanted woody plants, vines, poison ivy, and broadleaf weeds around homes, cabins, trails fences, walkways, lawns, pastures, and other non-crop areas. Will not harm grasses. For control of stumps and cut vines, apply undiluted product with a paint brush to completely cover fresh cut surface. Formulation: Triclopyr. :: Mixing Rate: 8 - 16 Tbsp. per gal. of water to 500 sq. ft.

67220 16 oz (concentrate) \$15.00

Dead Weed Brew

ORGANIC

Liquid

Non-selective weed killer controls all types of grass and weeds around the garden, driveways, patios, flower beds, trees, and shrubs. Burns down within hours on sunny days. More effective than BurnOut II. Use with Drift Guard for weed control in your vegetable garden. :: Mixing Rate: 4 oz. per gal.

67239 32 oz (concentrate) \$39.30

67240 1 gal (concentrate) \$152.00 10

Killzall 365

Liquid

An improved, extended-control, round-up weed killer that prevents regrowth a full season. Only for driveways, fence rows, or along buildings where no vegetation is wanted all summer. :: Mixing Rate: 4 - 6 oz. per gal.

67357 32 oz (concentrate) \$33.80

Killzall Super Concentrate

Liquid

Total Weed Control: Non-selective weed and grass killer, contains a double-surfactant formulation that dries on quickly on the plant to start working quickly. Double surfactant. Short, concise easy to use label. Application rates: General weed control: 3 Tbsp. per gal. Tough weed control and brush: Formulation: 41% Glyphosate :: Mixing Rate: 5 Tbsp. per gal.

67359 16 oz (concentrate) \$16.10

67360 32 oz (concentrate) \$23.40

67358 1 gal (concentrate) \$79.10 10

Kleen-Up HE

Liquid

Alternative to Round-Up this hi-efficacy formula is effective at lower rates than the competing brands of glufosinate. Kills all unwanted weeds and grasses. Great for preparing flowerbeds, vegetable and ornamental garden sites, renovating lawns and for multipurpose weed control. Complete, to the root control in 2-3 weeks. :: Common Mixing Rate: 3 - 8 oz. per gal.

67361 32 oz (concentrate) \$19.30

Lawn Weed Brew

ORGANIC

Liquid

Captain Jack's™ Lawn Weed Brew offers selective control of weeds, disease, moss, algae, and lichens in lawns. The active ingredient is derived from naturally occurring iron found in nature. This Brew is specifically formulated with Iron (Fe) to control broadleaf weeds, disease, moss and algae without killing the grass. It works quickly to kill many common weeds down to the root like dandelion, chickweed, and more. The product is rainfast in three hours, and people and pets can safely enter the treated area as soon as the spray dries. Product instantly mixes with water and should be applied with a backpack, or pump sprayer. :: Mixing Rate: 5 oz. per gal.

67204 32 oz (concentrate) \$21.70

Moss Max

Liquid

Fast acting water based formula works within hours to kill moss, algae, and lichens in lawns, on hardened bark of trees, roofs, decks, patios, buildings, fences, walkways - all without staining and discoloring.

67392 32 oz (ready-to-spray) \$23.30

Organic Turf Tune Weed Preventer

ORGANIC

Granular

Feeds lawns to ensure a deep green color and also prevents weeds by inhibiting root development in seedlings. Will not burn lawns. Can be used in vegetable gardens and in and around bedding plants, roses, shrubs and trees with established root systems. Prevents dandelions, crabgrass, and other common weeds. Organic, made from corn gluten meal :: Application Rate: 20 lb. covers approx. 1,000 sq. ft. Lawn: Apply in early Spring and early Fall. Vegetable Garden: Apply every 4 to 6 weeks.

67542 25 lb (granules) \$47.50 25

Over The Top II
Liquid

Broad spectrum grass killer can be sprayed right over strawberries, asparagus, horseradish, mint plants, vine crops and much more. Use on ornamental shrubs and ground covers such as junipers, ivys, pachysandra and Euonymus. Controls quackgrass, goosegrass, Foxtail, crabgrass and barnyard grass, to name just a few on the label. :: Mixing Rate: 1 oz. plus 1 fl. oz. Dormant Oil per gal. per 1800 sq. ft.

67401 8 oz (concentrate)\$33.40

Pasture Pro Broadleaf Weed Killer
Liquid

For those tough weeds in your pasture that you'd like to get rid of but don't want to worry about keeping animals off for a while, this does the job. Eliminates 125+ species of weeds and brush. NO waiting period after spraying once spray has dried. :: Application Rate: 1 qt concentration treats 1/2 - 1 acre.

67406 32 oz.\$30.90

Thistledown
Liquid

Post-emergent control. Thistledown is a full-strength herbicide based on the active ingredient clopyralid, and is designed to control Canadian thistle and other thistle in your horse and livestock pastures and other non-crop areas. Apply up to the time of bloom. Does not kill grass. Weeds controlled by thistledown include Canada thistle, musk thistle, star thistle, and knapweed. It can also be used to control kudzu, dandelion, and oxalis. Avoid ornamentals and vegetables - most of these plants are susceptible, so be wary of where you are using the product. No grazing restrictions, horses and livestock can remain on pasture at time of application. Legumes in treated pastures will be injured or killed. :: Application Rate: 2,800 sq. ft per oz. Mixing Rate: 1/8 - 1/2 oz. per 2 gal.

67479 8 oz (concentrate)\$40.60

Treflan
Granular

Treflan is one of the only pre-emergents that is listed for garden use. Use according to the label for weed-free gardens and flower beds. Excellent for use in new or existing strawberry plantings. :: Application Rate: 1 lb. covers approx. 960 sq. ft. and lasts 2-3 months. Water or rake into soil.

67493 15 lb (granules)\$23.40 15

67494 3.25 lb (granules)\$11.60

Trimec Broadleaf Herbicide
Liquid

This product is also effective and great to use for hard to kill weeds, with no repeat application required. The Trimec Classic Broadleaf Herbicide's active ingredients have a synergistic action which makes it an economical product to use and treat more acres better than any other 3-way product. Provides broad spectrum broadleaf weed control in a homeowner formulation. Kills hard to control lawn weeds. Designed for application to cool season grasses. Use on Kentucky bluegrass, Bermuda grass, perennial ryegrass, fescues, and more. Concentrate. Mixes with water. :: Application Rate: 1 pint covers up to 4000 square feet. Mixing Rate: 1 - 4 oz. per gal.

67495 32 oz (concentrate)\$19.70

Turf & Ornamental Weed and Grass Stopper
Granular

This is absolutely the best and most cost-effective weed-preventer available. Spread granules on your lawn, flower beds, roses, anywhere you don't want weed seeds to germinate. Controls crabgrass too. More effective than Preen. Active Ingredient: Dimension. :: Application Rate: 12 lb. covers 5,000 sq. ft. Apply early to mid-May.

60326 9.6 lb.\$17.30 10

Vegetable Weeder
Liquid

A pre-emergent herbicide for the control of annual grasses and broadleaf weeds in vegetable gardens ornamental trees, established flowers, ornamental woody shrubs, ornamental ground-covers, and roses. Controls weeds by killing their seeds as they germinate. It provides long-lasting control of annual grasses and broadleaf weeds. It does not kill established weeds. Similar to Treflan but in a liquid form. :: Mixing Rate: 3 oz. per 2 gal. to cover 1,000 sq. ft.

67499 16 oz (concentrate)\$22.70

Weed & Grass Killer
Liquid

Alternative to Round-up. Weed & Grass Killer is a non-selective herbicide formulated for spot treatment of weeds and grasses. It provides visible results in three hours by killing the root and is rainfast in 15 min. For best results, apply this product when temperature is above 60° F. Protect desirable plants with a piece of cardboard or plastic and apply when air is calm to avoid drift. This product is commonly used on patios, walkways and driveways; around flowers, shrubs and trees; along fences and foundations; and in large areas. Plant new flowers, trees and shrubs in treated area after just one day. :: Mixing Rate: 5 - 7 oz. per gal. This 40 fl. oz. concentrate makes up to 13 gal.

67501 40 oz (concentrate)\$27.90

Weed Free Zone
Liquid

Controls over 80 of the toughest broadleaf plants. Intended for use on most ornamental lawns. Controls plants in one easy step, including: clover, ground ivy, spurge, chickweed, dandelion, henbit, poison ivy, purslane, shepherd's purse, thistle, wild onion, and many others listed on the label. Works in cooler temperatures compared to other weed killers. :: Mixing Rate: 1 1/2 - 2 oz. per gal.

67503 16 oz (concentrate)\$33.90

Weed Out With Crabgrass
Liquid

Controls over 200 plants. Commonly used on lawns, orchards and pastures. Controls both grassy and broadleaf plants in one easy step, including: crabgrass, barnyard grass, foxtail, black-eyed susan, buttercup, catnip, chickweed, dandelion, dollarweed, ground ivy, jimsonweed, morning glory, poison ivy, poison oak, ragweed, sunflower, thistle, and other broadleaf weeds. Rainproof after 1 hr. :: Mixing Rate: 2 oz. per gal. Application Rate: One pint is enough to cover up to 2,500 sq. ft.

67505 16 oz (concentrate)\$18.50

Pond Care

Clean Clear Blue
ORGANIC
Liquid

Control moss and algae safely. A complete organic pond treatment in one handy container! Naturally remove aquatic muck, odor, debris, and decaying leaves with billions of bacteria colonies and six added enzymes. Polish the water column by attacking suspended organic particles while tinting your pond a brilliant blue. The result will be a clean, clear, healthy, blue pond that is safe for people, fish, plants, and wildlife. Treats 1 acre 4-5' depth.

64008 1 gal.\$58.30 10

Canning

All American Pressure Cooker

- Silicone molds fit perfectly into medium Harvest Right freeze dryer trays
- Can withstand extreme temperatures and conditions that occur during freeze drying
- Each section holds approx. 1 tablespoon
- Food-grade premium silicone, BPA free, easy to clean and release
- Perfect for freeze drying yogurt, smoothies, pudding, jello, liquids, and more.

• Medium molds have a total of 60 sections per tray (each section measures 1" x 1")

72277 Medium . 5 pk \$84.00

72278 Large . 6 pk \$106.00

Resealable Mylar Bags

These Mylar bags are food grade and rated for long term storage. The 7 mil thickness and Mylar material aid in preventing oxygen and water from penetrating the bag.

72270 10" x 14" . 50 pk \$30.00

72241 8" x 12" . 50 pk \$24.90

72233 6" x 9.75" . 50 pk \$24.00

Oxygen Absorbers

Oxygen absorbers are used to protect packaged foods and other products against spoilage, mold growth, color change, loss of nutritive values, insect damage and loss of quality. For use in gallon-size Mylar bags.

72234 700cc . 50 pk \$20.00

Mylar Bag Heat Sealer

The Harvest Right 12" Heat Sealer is a compact and efficient tool for sealing bags and packaging materials. With its controlled heating element and adjustable settings, it creates airtight seals quickly and reliably.

72227 \$130.00

Oil Free Scroll Vacuum Pump 110V 60Hz

The oil free vacuum pump can be used with any size freeze dryer. They are quiet, fast, and easy to use. The Harvest Right oil free vacuum pumps do not require oil changes and do not require regular user maintenance.

72229 \$1,695.00 50

Premier Vacuum Oil Pump 110V 60Hz

Oil Changes

This new Premier Pump rarely needs to have the oil changed or filtered. The pump has a gas ballast feature that makes it so water does not stay in the oil. Because of this, the oil in the pump will be pristine and clear, even after 30 or more batches. You simply won't need to change the oil until you have run 20 or more batches. Whereas, the oil in the Standard Vacuum Pump needs to be changed and filtered every 4 or 5 batches (when using the new 3/8 inch vacuum hose). You should only replace the oil in this pump with Robinair Premium High Vacuum Pump Oil (or with JB Industries Black Gold Vacuum Pump Oil). Do not use Dairyland vacuum pump oil in the Premier pump.

72231 \$895.00 40

Oil Filter

Filtering the oil is quick and easy, and will preserve the life of your pump and increase the performance of your freeze dryer.

72228 \$39.50

Vacuum Pump Oil

- Premium High Vacuum Pump Oil
- Very low toxicity
- Excellent separation from water
- Crystal clear appearance
- Less than 0.5% aromatic levels
- Quality tested for minimal moisture content
- Excellent cold temperature properties for easier starting
- Chemically engineered to maintain viscosity at higher running temperatures
- Maximizes vacuum pump life
- For all high vacuum pumps

72232 1 qt. \$12.50

Food Dehydrator

Looking for a healthy, homemade snack? Use this easy to operate food dehydrator to dry your own fruits, vegetables, herbs and meat. Includes 6 stainless steel trays, 6 mesh sheet (for nuts, herbs and small fruit), 2 fruit roll sheet, can be used for fruit roll-ups or catching falling crumbs, recommend drying time and temp. chart. Temperature ranging from 86° to 194° and 24 hour timer.

73970 400 watt \$129.00 20

UNIVERSAL PLUS

Invented for Life Bosch - A Tradition of Commitment

Bosch Kitchen machines make kitchen tasks as effortless as possible and are the perfect solution for the busy kitchen. Virtually every preparation need is addressed with the variety of optional accessories offered. Bosch is committed to making life better through appliances engineered with innovative features, superior design, and quality craftsmanship.

Bosch Universal Plus Mixer

500 watt motor. Model includes: Mixing bowl, dough hook, wire whips, splash ring, dough hook extender, and cover. Mixing bowl capacity is 15 lbs. of dough or 6-1/2 qt.. Four controlled speeds plus a momentary switch for pulse operation. Best warranty in the business: 3 years on motor, 1 year on other parts. Earned Good Housekeeping's seal of approval.

- 73767 white\$499.00
- 73770 black.....\$599.00

Bosch . Blender

Fits Universal Plus. 6c. capacity. Tritan co-polyester material. Designed to pulverize, puree, mix, blend, or crush ice. Make your own fresh smoothies, beverages, soups, sauces, baby foods and more. Removable blades make cleaning simple.

- 73754\$92.00

Bosch . Metal Whip Driver

It is not recommended to use cookie paddles without the metal whip driver. You may purchase either one separately as needed or together as a set.

- 73764 \$16.20

Bosch . Bowl Scraper

This attachment comes with two scrapers, one for the center column and one for the outer wall of the bowl. Keep your bowl scraped clean while using the whips, whisks, or cookie paddles. Fits over the plastic or metal whip driver. Works on the Universal Plus.

- 73755\$29.90

Bosch . Ice Cream Maker

Make old fashioned churned ice cream at home. Use your favorite recipe and adjust to fit this 1 1/2 qt. freezer. Churn canister fits inside the Bosch mixer bowl. Put the ice and salt in the space between the canister and bowl. Turn the mixer on and wait 20-30 minutes to enjoy a bowl of soft serve ice cream. Recipe booklet included featuring Butter Pecan, Raspberry Cheesecake, and Vanilla ice cream recipes to name a few. Fits Universal Plus.

- 73761\$69.60

Bosch . Cookie Paddles

Made for medium to thick batters or moderate batches of cookie dough; or when adding heavier ingredients such as nuts and raisins. Use with the metal whip driver.

- 73756\$29.60

Bosch . Large Slicer/Shredder

Slice or shred directly into your Bosch mixer bowl. Fits all bowls with a center column. Contains one thick/thin slicer, one small/large shredder, and one grater blade. Fits Universal and Universal Plus.

- 73763\$87.70

Bosch . Cookie Paddles w/Metal Whip Drive

Made for medium to thick batters or moderate batches of cookie dough; or when adding heavier ingredients such as nuts and raisins. Use with the metal whip driver.

- 73757\$36.90

Bosch . ProLine Cookie Paddles

New and improved design features an innovative curved blade, specifically engineered to enhance ingredient incorporation. The curved shape creates a more dynamic mixing motion, ensuring ingredients are continuously pushed toward the center of the bowl. Must be used with the metal whip driver.

- 73760\$32.20

Bosch . Dough Hook Extender

A must-have accessory for bread making. Knead dough to the right consistency with this attachment. Mix batches from 1-14 loaves. Fits Universal or Universal Plus.

- 73758\$9.90

Bosch . Wire Whips

Stronger than whisks, these come with the Bosch. Use for mixing pourable liquids and batters. Any heavy batters and doughs should be prepared using the Cookie Paddles or Dough Hook.

- 73768\$28.00

 **NutriMill** Classic

Nutri-Mill Classic electric grain mill. Unlike commercial mills that strip away essential nutrients, this mill allows you to create flour that is rich in both taste and nutrition. With its high-speed impact chamber and stainless steel milling heads, the Nutri-Mill Classic offers a versatile range of grinding options, from super fine to coarser flour. Its powerful motor can effortlessly handle up to 20 cups of grain at a time, while the self-cleaning mechanism ensures a dust-free operation. Experience the convenience, customization, and health advantages of milling your own flour with the Nutri-Mill Classic.

73806 each \$299.00

The Nutri Mill will mill the following:

Wheat (<i>hard and soft</i>)	Buckwheat
Popcorn	Rye
Rice	Millet
Spelt	Barley

Use caution when milling the following:

Dried Lentils	Dried Sweet Corn
Dried Pinto Beans	Dried Mung Beans
Chick Peas	Soybean

It will NOT mill any of the following:

Oatmeal	Sunflower Seeds
Nuts of Any Kind	Oats
Dates or Raisins	Dried Fruits
Coffee Beans	Spices
Flax Seeds	

 **NutriMill** Grain Mill

Whether you're milling hard wheat for robust whole grain bread or soft wheat for sandwich loaves, the Impact Grain Mill ensures precise and consistent results. Smaller in size, yet powerful in performance, this grain mill is the ideal choice for those just starting out in milling or bread baking.

8-Cup Grain Hopper & 12-Cup Flour Canister are designed to handle large batches, ideal for frequent bread bakers. Includes: Grain Hopper Extension, Air Filter, Separator Cup.

73805 \$239.00

NutriMill Filter

As air flows through the NutriMill, the filter keeps flour inside the canister where it belongs, for virtually dust-free milling. (For NutriMill Plus & Impact Grain Mill)

73834 \$1.60

Ancient Grains

Dent Corn

This corn is organic, non-GMO, food-grade yellow corn. Great for cornmeal, grits, polenta, or tortillas. You can also use the whole grain corn kernel to create your own corn nuts or add to soups.

81009 25 lb \$22.70 25

Emmer Berries

Emmer is a type of farro (ancient hulled wheat) that dates back to early civilization. It is a simple grain of 28 chromosomes that pre-dates Spelt. It is prepared like brown rice and cooks in 50-60 minutes (or can be soaked overnight to reduce the cooking time). It is great in pilaf, grain salad, risotto, addition to soup, or sprouted for bread and salads.

81039 25 lb \$62.70 25

Oat Berries

Organic Old-Fashioned Oats are a delicious, wholesome hot cereal that will give you lasting energy throughout the morning. Organic oats are also a great choice for classic oatmeal raisin cookies, homemade granola and oatmeal bread.

81059 25 lb \$29.40 25

Einkorn Berries

Our einkorn berries are grown and packaged right here in Holmes County. At the farm, we carefully clean the husk, but do not polish or pearl the grain, so you are eating 100% of the bran and germ.

81019 25 lb \$68.60 25

81029 25 lb, Sprouted \$108.50 25

Hard Red Wheat Berries

Wheat Berries can be ground up to create a type of flour which you can use to make bread or other baked goods, but you can also cook them to make a side dish or crack them to put in salads.

81049 25 lb \$39.00 25

Spelt Berries

Spelt is a delicious, easily digestible ancient grain that is a primitive relative of modern wheat. Can be used in bread, cookies, muffins and waffles.

81069 25 lb \$30.00 25

81079 25 lb, Sprouted \$70.00 25

Self-Clean Program
Standard on all Ascent X models

VitaMix Blender

Durable, efficient and multifunctional, the Vita Mix is a great addition to any home kitchen. With the 48 oz container, and the many features that lets you explore more than 10 different techniques - from silky smoothies to textured sauces, nut butters and steaming soups to frozen desserts. The Self-Cleaning program is standard on all Ascent X Series models. Just add warm water and a drop of dish soap. 10 year warranty.

76678 Ascent X2 . Black\$549.50

Blender Spatula

A unique long handled spatula designed for all styles of blenders. 10" stainless steel handle with 4" spatula.
73863 \$13.60

VitaMix Dry Grains Container

The Vitamix Dry Grains Container is specially designed to handle whole grains, beans, and other dry ingredients with ease. Its durable, laser-cut stainless-steel blades create a unique reverse vortex that pushes ingredients away from the blades, ensuring even and consistent grinding. Perfect for making fresh flours, doughs, and batters, this BPA-free container is an essential tool for home bakers and those looking to mill their own grains.
76676 48 oz. \$154.50

Steam Juicer Deluxe

Attach the silicone juicer adapter to inside of juicer/ steamer to allow more of the juice to be extracted from the spout pan. Steamed foods are becoming more popular because they are tastier and more nutritious. When you cook foods in steam, you don't leach out vitamins and minerals into cooking liquid.

Butchering

Adjustable Burger Press

Save time and mold burgers into a perfectly uniform shape with this easy-to-use press. Use it for a fast weeknight dinner, freezing in bulk, or you next big party. Shapes burgers in 1/4 lb., 1/3 lb., or 1/2 lb.

83218 \$9.60

Butcher String

Extra-thick cotton string can be used when butchering or to tie meat roll ups to secure ingredients inside. Oven-safe and excellent for hundreds of other household uses. Non-toxic, natural twine is made with no chemicals or dyes. Made in the USA. 185' per roll.

73771 \$5.80

Magnetic Knife Block

12"x8" A beautiful natural bamboo that has a built-in super strong magnetic. Holds common kitchen knives securely that are easy and quick to reach. The anti-skid design at the knife holder bottom increases the thickness of the base, making the tool placement more stable and no need to worry about slipping.

73762 \$38.60

Magnetic Knife Holder

Store your knives or stainless steel kitchen utensils safely and within reach while making your kitchen look tidy. Screw on the attached screws, and then install it on the wall. You can use this in multiple places in the home to hang up keys, tools, or your stationary items. (Knives not included).

73859 \$11.90

Poultry Shears

Ideal for cleaning chicken, turkey and more. Easily make precise cuts and reach into tighter spaces to separate joints, cut bones, and remove skin. Specially shaped spring-action eliminates hand strain while cutting. High quality German steel blade stays sharper and holds edge longer than traditional stainless steel. 9-1/2" long.

73847 \$17.60

Stainless Oval Roaster

3-qt. oval roaster made of durable stainless steel includes a rack to elevate your meat inside roaster and a lid. Perfect for whole chicken, baking your favorite casserole, vegetables, or keeping food warmed while you're working elsewhere.

73867 \$42.90

Tote Box

High density Polyethylene (grey). Use in multiple ways; storage, mixing large amounts, or hold cut up meat when butchering. 15 1/4" x 20 1/2" x 7"

73886 \$11.00

Tote Lid

High density Polyethylene (grey) lid. Fits the tote box.

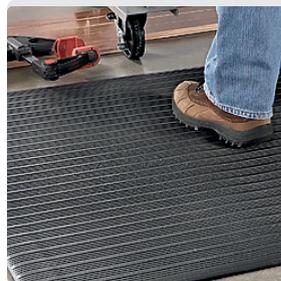

73887 \$7.60

Vinyl Apron

Bib-style without pockets. Waterproof protection for butchering, laundry, barn chores, etc.

73907 \$14.00

Anti Fatigue Mat

If you've ever been working all day on hard surfaces you know how tired legs and feet can get. These vinyl backed, 3/8" thick, easy to clean mats are great for kitchens, basements, shops, or any stationary work area. Long edges are beveled. Custom cut length available. Gray.

73746 2' x 4' \$20.70

73747 2' x 6' \$30.20

73748 2' x 8' \$40.20

73745 custom cut per ft. \$6.40

Food Prep

Cheese Slicer

This slicer features finger indents and is designed for right or left hand use. Stainless steel wire is replaceable.

73807 Grip-EZ \$12.30

Fruit and Veggie Peeler

Cat Cora Swiss-Style brand. A plastic handle with a sharp carbon steel blade to quickly peel potatoes, carrots, kiwi, or other fruits and vegetables. Also has a blemish remover on one side. German tempered stainless steel. Compare to Tupperware.

73825 \$5.90

Garlic Press

Crushes garlic with one easy press.

73793 \$15.60

Pepper Corer

Your favorite peppers just got a lot easier to core. Jalapeno corer lets you effectively clean out your jalapeno peppers and other small peppers for stuffing or slicing. The serrated edges are perfect for catching seeds and peeling away the inner membrane of the small peppers. Silicone handle with stainless steel blade.

73839 \$13.40

Multi Blade Herb Scissors

Make short work of snipping parsley, chives, and other herbs. Can also be used to shred paper, make confetti, or other art projects. 7 3/4"

73831 \$12.60

Potato Ricer

Sturdy ricer holds 2 1/2 cups. It incorporates air into potatoes to make them light and fluffy. Press cooked potatoes, peeled or unpeeled, quickly and easily. Also works for pumpkin or squash. Can be used to press out tincture kits.

73846 \$24.10

Hand Held Food Shaver

No more waiting for butter to soften to room temperature to spread. This clever tool shaves butter into small pieces, making it easy to spread. The other side is flat for spreading. Can also be used to shave chocolate to garnish desserts and drinks.

73772 \$7.50

Kitchen Accessories

Adjust a Tablespoon

Adjust to the spoon size you need. Space saving design removes the need for multiple measuring spoons.

73735 \$9.90

Adjust a Teaspoon

Adjust to the spoon size you need. Space saving design removes the need for multiple measuring spoons.

73734 \$9.90

Baster

Deluxe stainless baster for cooking up a delicious turkey, roast, or ham. A quality baster that can be used year round to help remove fat and oil from gravy, soup, or sauces. Or draw up the juices and pour them over your meat. Includes injector and cleaning brush.

73752 \$13.00

Bib Apron

Durable bib-apron with two front pockets and matching waist ties. Excellent to use when cooking and baking. Machine washable. 34" x 30" - 8⁹/₂0 poly-cotton blend.

73717 royal blue \$7.90

73718 burgundy \$7.90

73719 white \$7.90

Butter Spreader

Convenient butter spreader designed to easily cover any ear of corn. Can also be used for pancakes, toast, and in baking pans.

73778 \$2.80

Cookbook Holder

Protect your cookbooks, songbooks, notebooks, or smart tablets. No more splattered pages while using them in the kitchen. Plus, it saves your counter surface for cooking. Made of durable acrylic. 12-1¹/₂" x 9" x 3-1¹/₄".

73726 \$17.50

Deep Fry/Candy Thermometer

Use this thermometer to ensure correct oil temperature for crispy outsides when deep frying french-fries, fish, chicken, and more. Easy-to-read face and heat-resistant handle. It clips to pot for hands-free use.

73782 \$13.60

NEW

Digital Instant-Read Thermometer

Get precise temperature readings in 3-4 seconds with the Digital Instant-Read Food Thermometer. Its 3.9-inch, food-grade stainless steel probe and high-precision sensor are accurate to ±0.9°F and feature a wide temperature range of -58°F to 572°F. For added convenience, you can easily switch between Fahrenheit and Celsius, and a temperature lock function holds the reading after the probe is removed. With an IPX6 waterproof rating, cleanup is simple under running water. The thermometer includes a backlit display, a magnetic back for easy storage, and uses a long-lasting AAA battery.

73981 \$16.90

French Fry Cutter

A heavy duty cutter that works great to make regular or shoestring fries, zucchini sticks or other favorites. Can also be used to chop vegetables for home cooking or canning. Cast aluminum body with 1¹/₄" cutter.

73788 \$124.50 30

French Whip

A must-have addition to your canning kitchen. Long enough to reach the bottom of your cooker.

73789 18" \$5.50

Funnel Pitcher

A smart design combining funnel and pitcher. Pour thick liquids without messy drips. Perfect for muffin and cupcake batters, salad dressings, etc. Capacity: 3-1¹/₂ cups.

73792 \$4.40

Grater

A sharp, handy grater with three grating surfaces, fine, medium, or coarse. Its slim design fits into most drawers or tight spaces. The stainless steel grater with a santoprene base prevents slipping. Sturdy handle prevents hand fatigue and cramping.

73810 Grip-EZ \$12.30

Heat Resistant Spatula

Silicone blade with ABS plastic handle. Heat resistant to 500°.

73857 10" \$3.40

73860 16" \$6.30

Herb Mill

Herb Mill works great to chop dried or fresh parsley, dill, herbs, and spices. A sturdy mill with stainless steel blades that can be used right or left handed.

73812 \$11.30

Ice Stick Tray

Make your own ice sticks for water bottles or any beverage. Tray has spill proof lid and a flip top tab for convenient filling. Easy release tray makes 9 sticks at a time. Colors may vary.

73813 \$4.80

Jar/Serving Spoon

A spoon designed to fit pint or quart jars. Makes an excellent serving spoon with a long 8" handle. 1⁸/₁₀ SS.

73816 \$4.50

Juicing Lid

Juice your favorite citrus fruits directly into a wide mouth jar leaving fresh juice in a jar, ready to go! Replace with a regular wide mouth lid to store in fridge. Easy to clean.

73733 stainless \$8.30

Ladle

Stainless steel, one-piece ladle. 22"
73932 12 oz \$4.90

Large Serving Spoon

13" length. Excellent for casseroles, cobblers, and more.
73864 \$2.80

Mini Mixer

A compact, portable mixer with four attachments that beat, mix, stir or whip. Uses two AA batteries (not included). Works well to mix powdered drinks.
73828 \$8.40

Oil Sprayer Bottle

Evo non-aerosol oil sprayer bottle. The world's first non-aerosol trigger sprayer with a fan-shaped spray, keeps oils always at the ready and dispense without harmful additives, propellants or chemicals. They work with many types of cooking oil, like olive oil, canola oil, avocado oil, grapeseed oil, even infused oils with herbs and spices. Great for balsamic vinegar, lime juice and cooking wine, too. Makes preparing healthy meals and practicing portion control easier! Every pull of the trigger delivers a precise 1/4 tsp. 6 oz. heavy duty glass.
73837 6 oz \$19.90

Piano Whip

The right size for regular kitchen use. Works well to mix sauces and gravies, dissolve gelatin, scramble eggs, etc. Heavy duty.
73840 12" \$3.90

Pot Scrubber

100 grams of stainless steel to scrub large pots and pans.
73845 50 gram \$1.30

Pour & Store Pitcher Lid with handle

Pour, store or shake! There are almost infinite uses for our pitcher lids. Turn your wide mouth or standard mason jars into a pitcher or storage container. Feel free to shake it up - lid won't leak but still air tight for long term storage. Ideal for drinks or snack.
73727 standard \$6.00
73759 wide mouth \$6.00

Salad Spinner

A self retracting pull cord spinner dries fruits and vegetables quickly and easily. Outer bowl doubles as a serving bowl and comes with a flat lid for convenient storage. Spinning lid separates for easy cleaning and drying.
73850 4 qt \$32.40

Sauce Master Whisk

Unique whisk has flexible coils for maximum action when making sauces, gravies, etc. Flattens out to cover bottom of saucepan. We tested it and were impressed.
73851 \$12.30

Scrub Brush

Sturdy nylon bristles, comfortable grip fits perfectly in any hand. Handle has a soft touch, non-slip surface even when wet. Good for sweet corn.
73809 Grip-EZ \$4.90

Silicone Brush

Great for basting. High-heat resistant, won't stain, lose bristles, or retain odor. Red.
73854 \$4.80

Silicone Counter Connectors

Use to connect the counters and keep crumbs and spills from falling between the cracks. Can also be used between washer and dryer. Heat resistant to 500°F. Two strips. 11-3/4" x 2".
73779 \$8.70

Silicone Scraper

Our Favorite! Sturdy one-piece scrapers are stiff enough to scrape clean but soft enough to do it right. Every kitchen needs at least one of each. Choose from the traditional style scraper or spoon style (has a dish surface). Heat resistant.
73855 Scraper . 11" \$4.80
73856 Scraper . 8" \$3.20
73858 Spoon Scraper . 11" \$4.80
73861 Spoon Scraper . 8" \$3.20

Silicone Spoon Spatula

New spoon style spatula is flexible enough that it bends to the contour of pots and pans yet stiff enough to ensure a clean scrape every time. A staff favorite.
73862 11" \$5.30

Stainless Cookie Spatula

This stainless steel cookie spatula is ultra-thin for slipping under delicate cookies and baked goods.
73870 \$4.80

Stainless Gallon Jug

1 gal. stainless steel jug with tight fitting lid. Ideal for carrying and cooling milk. Works great for other beverages as well.
73872 \$37.90

Stainless Popcorn Popper

Stovetop. Heavy Duty. Don't fear being burned with the cool touch handle and end-of-handle crank while popping popcorn. The smooth crank makes it easier to keep the popcorn moving through the oil to ensure every kernel pops. Capacity: 6-quarts.
73877 \$73.50

Stainless Turner 8"

A wooden handled turner sized right to serve cakes, frozen desserts, and pizza.

73880 \$8.80

Stirring Spoon

12" length. Perforated with a flat front which allows you to scrape the bottom of your pots.

73883 \$4.20

Strainer Bags

Includes two bags with drawstrings. Use this bag to strain berries, make jelly, or brew canners of coffee or tea. Light and durable material made from a blend of cotton and polyester.

73817 \$6.40

The Multi Pot

1 1/2 qt. Stainless steel pot features measurements on the inside for easy measuring. Heat soups, sauces, or steep your tea. Ideal for vegetables, pastas, and one pot meals. Great for hot pizza, vegetable pizza, or fruit pizza.

73876 \$15.20

NEW

Wooden Cutting Board

This USA Made Hickory Cutting Board is great for prepping fresh veggies, chopping herbs, and doubles as an attractive serving or charcuterie board. It is the perfect partner for your fresh garden harvest, while its beautiful, expressive grain adds a touch of character for any gathering.

To ensure your hickory board lasts for years to come, treat it with care.

Oil regularly: Condition your board monthly with cutting board conditioner to hydrate the wood and create a protective barrier against moisture.

Hand wash only: After each use, hand wash with mild soap and warm water, and dry immediately. Never put your board in the dishwasher or leave it to soak.

Remove odors: For lingering garlic or onion scents, scrub the board with a lemon half and coarse salt to naturally deodorize it.

83223 Large . 12" x 20" x 1" \$68.40

83228 Round . 12" x 16.5" x 1" \$69.90

NEW

Cutting Board Conditioner

This natural and effective blend enhances the wood grain, and leaves a beautiful, silky finish that resists moisture and protects against everyday wear- the mineral oil penetrates deep into the wood fibers to hydrate them and prevent drying and cracking, while the beeswax creates a protective, water-resistant seal on the surface.

83229 2 oz. \$8.00

Cleaning

Our Products

Our Detergent

Biodegradable and safe for the environment. Highly concentrated liquid with low sudsing making it compatible with HE machines. Use 1/8 - 1/4 cup for regular loads, or less for smaller loads. There is no need to use additives such as pre-treaters, fabric softener, or bleach. Mild lemon scent.

Filling your diet with fresh fruits and vegetables is a good thing. You can make it a great thing with Organi Cleanse Fruit and Vegetable wash! Using Organi Cleanse will ensure your fresh produce is also clean produce. Penetrates and breaks down toxins, pesticides and weed killing residues to rinse cleanly away. For those times when you have to spray or lose your crop to disease. Let Organi Cleanse take over between the garden and the table. 2 capfuls per qt. Soak for 5 min. and rinse.

67400 16 oz. \$18.70

30 Second Outdoor Cleaner

Cleans stains from algae, mold, and mildew. Use on awnings, brickwork, decks, roofs, vinyl siding, composite decking, composite roofing, dog kennels, pathways, planter boxes, tents, houses, greenhouses, flower pots, birdbaths, patios, porches, tarps, tiles, walls... you name it! Just spray it on, wait 30 seconds, then rinse off. Dilute at 1:1 ratio.

86701 1 gal. \$15.70

NEW

47% Vinegar Cleaner

Mix this extra-strength vinegar with Basic H and essential oils to create an effective and eco friendly multipurpose household cleaner, or mix 1 gallon of the vinegar with 4 gallons of water, 1 cup salt, and 4 Tbsp Dawn Dish soap for a potent weed killer. This solution will kill or damage any plant it touches, not just weeds. Only use it on weeds in areas like gravel paths or driveways where you don't want any plant growth. For best results, use on small, young, annual weeds. It may only kill the top growth of mature perennial weeds with deep taproots.

86702 1 gal. \$24.80

80909 8 oz..... \$25.90

Stevia Pure Powder Extract

Stevia is a sweetener that is derived from the leaves of the plant species *Stevia rebaudiana*. It is a zero-calorie sweetener, meaning that it does not provide any energy or calories when consumed. Stevia is about 300 times sweeter than table sugar, so only a very small amount is needed to provide the same level of sweetness. It is also heat-stable and does not affect blood sugar levels, making it a popular alternative to sugar for people with diabetes or those looking to reduce their calorie intake. Stevia is commonly used in low-calorie and sugar-free foods and beverages, as well as in tabletop sweeteners and other products.

Maple Syrup

Rich Taste. Is the perfect middle ground for coffee, tea and vanilla ice cream.

Soft Taste. Has the perfect touch to bring sweetness and a hint of maple to your creations

Ultra-Rich Taste. is a great way to add sweet and smokey flavor to your favorite recipes.

It's real Maple Syrup straight from Ohio maple trees to your table. Delectably smooth and expertly crafted, our Ohio Maple Syrup is rich in flavor and color. Enjoy it on pancakes, waffles, French toast, or in oatmeal. Try it in homemade granola, applesauce, baked beans, candied sweet potatoes or steamed carrot. It's also great in cakes, pies, breads or in tea.

The different flavors are established by how long the sap is boiled in order to reach the desired sugar level for syrup. How much we have of each flavor depends on how the sap runs, so you will need to be ok with substitutes if we run out of your choice flavor.

Zanfel Poison Ivy Wash

Zanfel Poison Ivy, Oak & Sumac Wash® is a safe and effective topical solution for the reaction caused by exposure to poison ivy, poison oak, and sumac. Zanfel is a specially formulated wash that is clinically shown to remove urushiol, the toxin found in poison ivy, oak and sumac, from the skin and relieve itching ANYTIME after an outbreak. Zanfel treats the problem, not just the symptoms. It works to effectively remove urushiol from your skin by binding with the toxin to create an aggregated cluster, then moves it to the surface of the skin where it can quickly and effectively be washed away with water.

Dandy Blend

Dandy Blend is a 100% caffeine free, coffee alternative that consists of four ingredients: roasted barley extracts, roasted rye extracts, roasted dandelion root extracts, and roasted chicory root extracts. Is also great to use in a variety of beverages from iced coffees and lattes to cappuccinos. If you're trying to quit coffee or just looking to lower your caffeine intake, Dandy Blend provides all of the goodness of dandelion in an instant while still having that coffee taste, smell, look and feel.

82246 2 lb \$38.00

Dream Team

A gourmet coffee grown in the misty oxygen-rich mountainous regions of Central America. Hand-picked, processed and brought directly to Holmes County where these aromatic blends are crafted with care and developed to their full flavor potential by a talented team of roasters to make the kind of coffee that you dream about. The proceeds of this coffee goes directly to the hardworking family grower that gets fair trade pricing, which is what they dream about. It's a win-win situation for everyone. Guaranteed fresh with and aroma and flavor that put's the "aahh" in every cup. Rich with smooth flavors only found from Nicaragua, this coffee is the complete package. Choose from whole bean or ground.

Premium Organic Spices

NEW

Cajun Seasoning

ORGANIC

Ideal for grilling, seafood, hearty beans, and flavorful Creole-style meals. Ingredients: paprika powder, garlic granules, oregano leaf, onion granules, thyme, cayenne powder, sea salt, and black pepper powder.

84005 2.1 oz.\$5.90

Cassia Cinnamon

ORGANIC

This bold, sweet-spicy powder comes from cassia bark and is known for its rich aroma and warm flavor. Ideal for baking, spiced beverages, and savory dishes.

84010 2.1 oz.\$5.60

Curry Powder Blend

ORGANIC

Perfect for Indian cuisine, this fragrant blend adds depth and complexity to any meal. Its bold aroma and colorful spices elevate rice, tofu, meats, and grains with rich, authentic flavor. Ingredients: coriander seed powder, turmeric root powder, fenugreek seed powder, ginger root powder, cumin seed powder, yellow mustard seed ground, black pepper powder, cardamom powder, anise seed powder, ancho pepper powder, clove powder, and allspice powder.

84006 2.1 oz.\$5.40

Garlic & Herb Seasoning

ORGANIC

Combines savory garlic with a mix of herbs for a well-rounded, aromatic seasoning. Ingredients: garlic, parsley, oregano, and thyme.

84004 1.3 oz.\$6.20

Garlic Granules

ORGANIC

Garlic granules offer a convenient way to add rich, savory flavor to a variety of dishes without the prep of fresh cloves. Their coarse texture makes them ideal for rubs, marinades, soups, and roasted vegetables.

84002 2.5 oz\$7.50

Onion Granules

ORGANIC

Onion granules provide a quick, easy way to add sweet, savory depth to dishes without chopping. Their coarse texture is perfect for seasoning blends, soups, sauces, and rubs. A reliable, shelf-stable staple for everyday cooking.

84003 2.8 oz\$5.90

Pumpkin Pie Spice

ORGANIC

Perfect for pies, lattes, pancakes, and baked goods, it adds cozy, spiced sweetness to any recipe. Ingredients: cassia cinnamon powder, ginger root powder, nutmeg powder, allspice powder, clove powder, and cardamom powder.

Seasoning Salt

ORGANIC

This organic seasoning salt blends sea salt with herbs and spices for a balanced, all-purpose flavor boost. Ideal for vegetables, meats, and everyday cooking. Ingredients: Sea salt, onion granules, garlic granules, coriander seed powder, yellow mustard seed ground, paprika powder, turmeric root powder, black pepper powder, and parsley leaf.

84007 2.6 oz\$5.60

Taco Seasoning

ORGANIC

This zesty blend of spices brings bold, Southwestern flavor to tacos, burritos, and more. Ingredients: paprika powder, cumin seed powder, garlic granules, cayenne powder, sea salt, and oregano leaf powder.

84008 2.2 oz\$5.40

Wings & Things

Feeder Supplies

Dried Mealworms

These tasty little tidbits attracts bluebirds and orioles to your feeders. Your birds might not take to dried mealworms right away. You can tempt the birds to start eating them by moistened a bit to make them more appealing. However, do not leave damp dried meal worms out for more than a day or two. As soon as one bird catches on about the dried mealworms, its friends will partake too.

71218 18 oz \$11.60

Easy Oriole Nectar

8 oz concentrate mixes instantly with tap water to make 48 oz of nectar. No boiling required. Orioles love this stuff. Orange flavor attracts them better than orange colored sugar water. A great way to get them started on your feeder.

71227 8 oz \$2.80

Feeder Cleaning Mop

Reach all the way to the corners to keep your feeders clean.

71220 \$6.10

Full-Bloom Replacement Bee Guards

4-pack, yellow. Fits only Full-Bloom Glass Hummingbird Feeder. Fits 203CP & 204CP Humminbird Feeder

71237 4 pk. \$4.20

Hummingbird Nectar

Attract hummingbirds like never before. Our Sweet-Nectar hummingbird nectar concentrate is infused with all natural, steam- distilled wildflower extracts from plants most visited by hummingbirds. You can be 100% certain that only the best of ingredients are being offered at your feeders. Concentrate makes a full 4500ml (3X) by simply adding the appropriate amount of regular tap water. A great way to get hummers started visiting your feeder. No unnecessary food coloring or corn syrup here.

71231 1.5 liter \$11.50

NEW

Mason Jar Hummingbird Feeder

Compact and stylish, this 6 oz glass Mason jar hummingbird feeder features a vintage-inspired Mason jar design with a stainless steel lid and hanger. All parts are also removable, allowing for a more thorough cleaning. The glass jar and leak-free flower feeding ports are top-rack dishwasher safe.

71245 6 oz \$10.10

Seed-Sack Finch Feeder

For thistle seed. Size: 22" L x 4⁵/₈" W. Strong nylon fabric. 10 birds can feed at one time. Decorative floral pattern enhances landscape. Birds easily cling to soft fabric.

71238 1 lb \$4.40

Hummingbird Feeders

Full-Bloom Glass Hummingbird Feeder

Four-flower glass feeder with bee guards and perch.

71222 8 oz \$14.60

71223 16 oz \$23.30

In-Your-Hand Hummingbird Feeder

With a little patience you can train hummingbirds to feed right from your hand. Designed to fit comfortably in your hand so it's easy to hold steady. Three flower-like ports are removable and lid with a dish-style design make cleaning easy. Holds up to 2 oz of nectar.

71221 2 oz \$8.20

Mini Window-Mount Hummingbird Feeder

View hummingbirds up close and personal in the comfort of home with this Window Hummingbird Feeder. Two suction cups on the back attach it to the outside of any window. It features 3 feeding ports on the top with a ledge around it for the birds to sit on while they eat. The lid is hinged for easy filling and units lifts off for easy cleaning. 8 oz

71226 8 oz \$9.00

Rosette Glass Hummingbird Feeder

16 oz Glass feeding bottle. Screw-on hanging cap. Completely assembled.

71224 16 oz \$22.80

Oriole Feeders

3-Way Oriole Feeder

Provide a buffet of options to your sweets-loving oriole friends with the Fruit Trio Oriole Nectar Feeder. This unique oriole feeder allows you to serve 3 food options from the same feeder to increase your chances of drawing orioles to your backyard. The 30 oz. reservoir dispenses nectar through the 4 feeding ports. In addition, you can use the included attachments to serve up other oriole favorites such as orange slices and jelly. 4-large perches accompany each port, providing plenty of room for multiple orioles to perch while they dine. A built-in ant moat and bee guards ensure protection against insects so nectar is reserved just for your orioles. The wide-mouth opening of the feeder makes filling and cleaning easy. Use the built-in hanging hook to hang the feeder anywhere around your yard where you can easily view the bird-feeding action.

71234 30 oz \$27.80

Jelly-Fill Oriole Feeder

The easiest way to feed grape jelly to orioles. Included 32 oz jar can be interchanged with most jelly jars. Built-in stirrer allows for easy dispensing. Jelly stays fresh and dry inside the inverted jar. Orange color attracts orioles to your yard.

71229 32 oz \$22.30

Home Orchard

Backyard Fruit Production

David R Schlabach. One of the most well written, easy to use, books available on fruit and berry production. Answers most questions on what to spray and when to spray. Includes drawings and step by step spray programs for fruit trees, grapes, raspberries, blackberries, blueberries, and more. 172 pages, 7 1/2"x9 1/2"

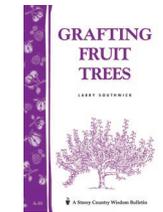

85704 \$13.00

Berries Raspberries & Blackberries

Louise Riotte. Raspberries can be difficult to maintain healthily. In this booklet, Louise Riotte shows you how to choose a raspberry variety, how to plant raspberries and blackberries, how to prune them, and non-chemical and mainstream methods to keep insects, pests, and disease at bay. Recipes included, and coming in at a handy 31 pages.

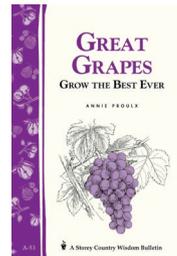

85721 \$5.00

Grafting Fruit Trees

A helpful and worthwhile look at the technicalities, tools, and techniques used in the ancient and modern practice of grafting and budding. Discusses methods and execution used by orchardists using both text and illustrations. 32 pages.

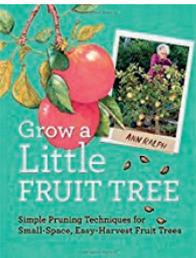

85735 \$4.00

Great Grapes

Annie Proulx. In this handy 31 page guide, Annie Proulx takes us on a journey through arboriculture. She attempts to build up the reader's confidence in the chapter "Who can Grow Grapes?", then follows it up in chapter 2 with a Grape Growers' Vocabulary. Further on, she reviews basic grape types, how to plan your own vineyard, caring for it (a must), and diseases and pests of the grape. Interestingly, she DOES include organic possibilities to keeping a healthy vineyard, and then follows that with several paragraphs on sprays. In what can be an intimidating venture, this book does what it can to ease you into the world of grape growing.

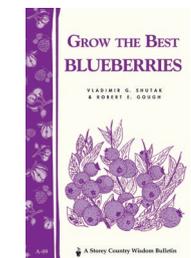

85736 \$5.00

Grow A Little Fruit Tree

Ann Ralph. Grow your own apples, figs, plums, cherries, pears, apricots and peaches in even the smallest backyard! Ann Ralph shows you how to cultivate small yet abundant fruit trees using a variety of specialized pruning techniques. With dozens of simple and effective strategies for keeping an ordinary fruit tree from growing too large, you'll keep your gardening duties manageable while at the same time reaping a bountiful harvest. These little fruit trees are easy to maintain and make.

85764 \$14.00

Grow the Best Blueberries

Vladimir G Shutak & Robert E Gough. Blueberries are high in natural anthocyanins that are protective of neurons. In this 32 page gem, Vladimir and Robert explore the soil science behind growing blueberries (they prefer more acidic soil), how to acidify your soil, selecting a plant, and propagating them. As anyone who has worked with blueberries knows, the greatest enemy of the blueberry is not a nefarious insect, but rather birds, and they explore how to protect them from them as well. They also cover pests of the insect variety and how to control them, although without relying on organic methods.

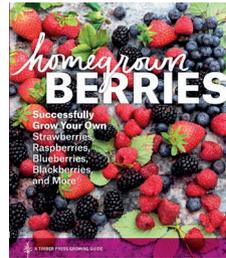

85739 \$4.00

Grow the Best Strawberries

Louise Riotte. As a strawberry lover, I can easily see the utility of this book. In 32 pages, Louise explores how to grow and select strawberries. She covers summer bearing varieties, Everbearing, and Alpine. Inventively, she covers the use of green manures for enriching the soils, as well as common composting. She also covers mulching, fertilizing, and irrigating. She also covers diseases, pests, and even viral afflictions for your strawberries. If all of that isn't enough, she also includes recipes for strawberry sorbet, strawberry balsamic, and strawberry nectar. at the end of the guide. A lot of useful information in a small handbook. Well worth it!

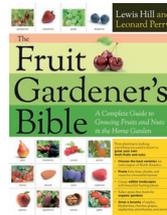

85740 \$5.00

Homegrown Berries

Berry lovers and home gardeners now have a guide for selecting, planting, caring, and harvesting strawberries, raspberries, blueberries, blackberries, and more. Homegrown Berries covers the information you need to know about the process from planting to picking. You'll learn the best varieties of strawberries, raspberries, blackberries, blueberries, gooseberries, currants, and elderberries for you, how to fit them into your landscape (including in borders and containers), and how to maintain them for peak harvest.

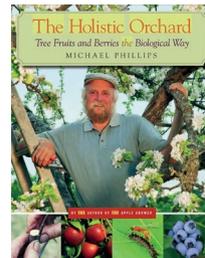

85840 \$19.00

The Fruit Gardener's Bible

Lewis Hill & Leonard Perry. From small fruits like strawberries, raspberries, and blueberries to orchard fruits and nuts, this book shows backyard gardeners how to grow organic fruit at home. It shows everything from choosing varieties to planting, pruning, and harvesting a bountiful crop. Full color.

85793 \$25.00

The Holistic Orchard

Michael Phillips. Growing tree fruits and berries is something virtually anyone with space and passionate desire can do - given wise guidance and a personal commitment to observe the teachings of the trees. "The Holistic Orchard" demystifies the basic skills everybody should know about the inner-workings of the orchard ecosystem, as well as orchard design, soil biology, and organic health management. Detailed insights on grafting, planting, pruning, and choosing the right varieties for your climate are also included, along with a step-by-step instructional calendar to guide growers through the entire orchard year. Every farm and homestead can enjoy the timeless pleasure of a fruit orchard! 414 pages

85710\$23.00

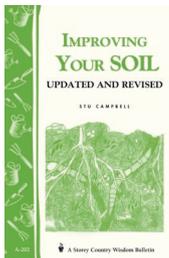

Hands-On Agronomy

Neal Kinsey & Charles Walters. The soil is more than just a substrate that anchors crops in place. An ecologically balanced soil system is essential for maintaining healthy crops. Hands-On Agronomy is a comprehensive manual on effective soil fertility management providing many on-farm examples to illustrate the various principles and how to use them. The function of micronutrients, earthworms, soil drainage, till, soil structure, and organic matter is explained in thorough detail.

Neal Kinsey demonstrates that working with the soil produces healthier crops with a higher yield. To that end, he provides an understanding of eco-agriculture as a viable enterprise that is both naturally and commercially sustainable. This work offers advice that is both highly valuable and applicable to the farmer of any level and promotes an ecological understanding of the farm from the ground up.

85823\$39.00

Improving Your Soil

Country Wisdom Booklet - Stu Campbell. Without good soil, one simply can't grow nutritious, healthy food. In this surprisingly thorough book, Stu correctly identifies the soil type of sand, silt, loam, or clay, or what I have found commonly, a mixture of types. He explains how to test the pH of one's soil, earthworms, drainage, managing air in the soil, nutrient balance, when to improve your soil, and soil amendments. Anyone who has farmed and gardened quite a bit, it ends with a chapter called "Improving Difficult Soils". There is a handy list of organic soil amendments such as alfalfa and coffee grounds. If you are serious about food production or gardening, take a look at this book.

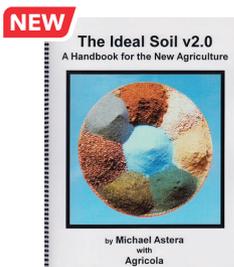

85744\$5.00

The Biochar Handbook

Kelpie Wilson. Step-by-step guidance for creating biochar, along with practical uses ranging from improving soil moisture retention and deterring pests to boosting compost and more. This accessible technique empowers gardeners, farmers, and communities to build lasting resilience.

85850\$38.00

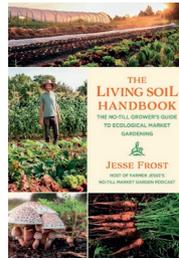

The Ideal Soil v2.0

William A. Albrecht. The Ideal Soil v2.0 is a practical guide to building fertile, mineral-balanced soils using science-based methods developed from the work of Dr. William A. Albrecht. This revised edition teaches farmers, gardeners, and land stewards how to interpret soil tests and apply the right mineral amendments to grow healthier crops without relying on synthetic fertilizers.

Focusing on cation exchange capacity (CEC) and base saturation, the book explains how to balance essential nutrients for optimal plant and soil health. With clear instructions, charts, and case studies, it offers a proven path toward regenerative, nutrient-dense agriculture that works in any climate.

85859\$52.00

The Living Soil Handbook

Jesse Frost. The No-Till Grower's Guide to Ecological Market Gardening is centered around the three basic principles of no-till market gardening: Disturb the soil as little as possible. Keep it covered as much as possible. Keep it planted as much as possible.

85825\$29.00

Wings & Things

A Purple Martin Journey

BERLIN SEEDS

GUARANTEE

All stock is guaranteed to grow and be true to name. Any stock that fails to show growth will be replaced free of charge or refunded if reported before July 15.

If your plant starts to leaf out but doesn't survive its first growing season, you may contact us anytime during that season to receive a gift card refund for up to 50% of the purchase price. All claims for replacement of refund must be made within the same growing season as the purchase.

Planting as early as the weather permits is one key to success. Proper plant protection and regular watering must be done, especially during stress periods of the first growing year.

We aim to provide you with premium quality stock, but we are working with nature and humanity and realize perfection is not always attained. We guarantee perfect imperfections. 😊 Our careful selection and your love and care will produce happy plants. We want you to be successful and completely satisfied. **Happy growing!**

If you're ordering seeds that you would like to have before your plants are available, make sure you use a separate order form!

GARDEN-READY

ORDER NOW • AVAILABLE AFTER MARCH 2

Blackberries

- MIX & MATCH VARIETIES FOR LOWER PRICES -

Space 24-30" apart. To avoid getting diseases from wild brambles, all wild brambles within 200 feet of your planting site should be removed and burned.

Chester . Thornless

An introduction from the U.S. Dept. of Agriculture, Chester is quite hardy, and ripens a little later than Triple Crown. Excellent for fresh use, jam and baking. Plants will not sucker but they do best when held upright with stakes. People who have planted them call them a "must" for all home gardeners. **Zones 5-8.**

87850 1-9 plants \$9.00 ea.
87850 10-24 plants \$8.10 ea.
87850 25+ plants \$7.40 ea.

Natchez . Thornless

This is the earliest ripening thornless variety with very high production potentials. Very large and good tasting berries can be harvested during a 3-5 week season. Due to its semi-erect growth habit, Natchez performs best with a trellis. Hardiness is same as Chester. The earliness of Natchez also means less problem with SWD larvae. We highly recommend this variety. **Zones 5-8**

87855 1-9 plants \$9.00 ea.
87855 10-24 plants \$8.10 ea.
87855 25+ plants \$7.40 ea.

Triple Crown . Thornless

Easy to pick. The excellent flavor, a combination of sweetness and tartness, is reason enough to have Triple Crown in your garden. Now add the large berry size and the fact that it is thornless, and it will surely be a favorite! A semi-erect plant with large semi-gloss berries makes it a good choice for "pick your own", home gardens and farm stands. Ripens mid to late July and withstands temps to -10° to -15°. **Zones 5-8**

87860 1-9 plants \$9.00 ea.
87860 10-24 plants \$8.10 ea.
87860 25+ plants \$7.40 ea.

Blueberries

- MIX & MATCH VARIETIES FOR LOWER PRICES -

Enjoy years of blueberries from your own garden. We offer robust 18-24" plants that come with a clump of growing medium around the roots for fast and easy establishment. Blueberries are easy to grow, and once established, last for many years and have no serious pest problems. No home gardener should be without them. Plant two varieties for best yields.

Mature bushes yield 10-14 lb. average, and grow 5-6' tall. We sell only quality Northern Highbush plants. They will grow well from North Carolina to coastal New England, westward to Minnesota and Missouri.

Berkley

Mid-Season . This is a variety that produces large, extra-sweet berries that are known to freeze well. A local favorite in pick your own plantings. **Zones 4-7**

88000 1-4 plants \$12.50 ea.
88000 5-24 plants \$12.00 ea.
88000 25+ plants \$11.10 ea.

Blue Crop

Mid-Season . Vigorous, upright, fruit is large, light blue and good flavored. Considered the best all around variety for adaptability. Consistent yields, high quality fruit and disease resistance. Blue Crop is perhaps the most widely planted variety in the US. **Zones 4-7**

88005 1-4 plants \$9.50 ea.
88005 5-24 plants \$9.00 ea.
88005 25+ plants \$8.00 ea.

Blue Ray

Early/Mid-Season . Performs particularly well in areas with hot summers and cold winters. This old and versatile variety produces high quality berries with outstanding dessert flavor. Berries are large, light blue with a medium scar and resist cracking. Bright red-yellow color in fall. **Zones 4-7**

88010 1-4 plants \$9.50 ea.
88010 5-24 plants \$9.00 ea.
88010 25+ plants \$8.00 ea.

Earliblue

Early-Season . First to ripen and early to bloom. This vigorous bush produces stout canes with bright red stems. Fruit is large, firm, light blue and has excellent flavor. Brilliant mixed red fall color. **Zones 5-7**

88015 1-4 plants \$9.50 ea.
88015 5-24 plants \$9.00 ea.
88015 25+ plants \$8.00 ea.

Jersey

Late-Season . One of the oldest and most widely grown varieties, Jersey is a favorite for home gardeners. Easy to grow bush that produces reliably heavy crops year after year. Tolerates a wide range of soil types. Medium sized sweet tasting fruit is a favorite for baking. Long lasting yellow-orange fall color. **Zones 4-8**

88020 1-4 plants \$9.50 ea.
88020 5-24 plants \$9.00 ea.
88020 25+ plants \$8.00 ea.

Patriot

Mid-Season . Vigorous hardy bush produces very large, slightly flattened fruit with excellent flavor. Berries are firm with small recessed scars formed on tight clusters. Ornamental bushes have nice fall color. Patriot is known as one of the easiest blueberries to start. More tolerant of soil types and less fussy about PH. Great for home gardeners. **Zones 3-8**

88025 1-4 plants \$9.50 ea.
88025 5-24 plants \$9.00 ea.
88025 25+ plants \$8.00 ea.

Currants

Imperial Currant

Imperial Currant has a delectable tart/sweet flavor and pearly, rose color, Imperial White may be one of the best currants on the market for fresh-from the bush eating. This popular variety produces white translucent fruit with pink a blush. Richer and sweeter flavor than most currants and high in vitamin C. Bareroot plants.

88155 \$9.70

Elderberries

Carefree, No spraying needed!

Adams . Cultivated

Elderberries start bearing a year or two after planting. The fruit contains more Vitamin C than oranges or grapefruit. The natural juices are high in antioxidants known to improve the immune system, and help fight off viruses. We offer sambucas canadensis, the native form of elderberry and also the best for nutraceutical purposes. These are named varieties with larger fruits. Plant one of each for more berries. Plants grow 6-8' tall. Space 6' apart. Hardy 2 year bare-root plants.

88300 1-4 plants \$10.00 ea.
88300 5+ plants \$9.30 ea.

Johns . Cultivated

Elderberries start bearing a year or two after planting. The fruit contains more Vitamin C than oranges or grapefruit. The natural juices are high in antioxidants known to improve the immune system, and help fight off viruses. We offer sambucas canadensis, the native form of elderberry and also the best for nutraceutical purposes. These are named varieties with larger fruits. Plant one of each for more berries. Plants grow 6-8' tall. Space 6' apart. Hardy 2 year bare-root plants.

88305 1-4 plants \$10.00 ea.
88305 5+ plants \$9.30 ea.

Gooseberries

A delightful, easy to grow fruit that is widely used in jam, jelly, wine, pie and dessert. Very low maintenance bush type plant, averages 3' x 3'. Self pollinating. Tolerates partial shade. Nursery inspected disease free plants.

Pixwell

Fruit is medium in size, purple-red-pink in color, has thin skin and is borne in clusters. As the name suggests, this berry is easier to pick than most because the berries hang below the branches. **Zones 3-7**

88770 \$7.10

Raspberries

- MIX & MATCH VARIETIES FOR LOWER PRICES -

- **RED RASPBERRIES:** Space 18-24" apart. After planting, cut canes back to 8-12".
- **BLACK RASPBERRIES:** Space 24-30" apart. After planting, cut canes off at ground level.

To avoid getting diseases from wild brambles, all wild brambles within 200 feet of your planting site should be removed and burned. Keep the same distance between plantings of red and black raspberries. These tips lead your berries to success!

Bristol

Early-Season . This berry wins more and more friends every year. Bristol's upright growth and cluster formation make its berries extremely easy to pick. Firm berries can be handled without bleeding. Excellent choice for black raspberry flavor. Virus free. **Zones 4-8**

89800 1-9 plants \$7.00 ea.
89800 10-24 plants \$6.50 ea.
89800 25+ plants \$6.00 ea.

Caroline

Everbearing . A larger berry than Heritage with a rich, full, and intense flavor. Fast becoming a favorite. Vigorous, hardy variety with excellent root rot resistance. Produces large dark red berries all the way to frost. **Zones 3-10**

89950 1-9 plants \$6.90 ea.
89950 10-24 plants \$6.20 ea.
89950 25+ plants \$5.90 ea.

Double Gold

Everbearing . Fruit color ranges from peachy gold to vibrant coral. Highly productive plants bears crops of conical-shaped raspberries that are tender, juicy and have excellent flavor. The plant grows vigorously, suckers freely, and shows strong disease resistance. Named for it's "double" bearing nature: Summer/floricane berries ripen in July. Fall/primocane berries ripen in mid-September through frost. Resistant to phytophthora root rot and common leaf diseases. Cold-hardy. Self-pollinating. **Zones 5-7**

90100 1-9 plants \$6.90 ea.
90100 10-24 plants \$6.20 ea.
90100 25+ plants \$5.90 ea.

Heritage

Everbearing . Great flavor and our #1 Seller and #1 Fall bearing variety! This hardy variety can produce two crops like all our fall bearing varieties. The first crop in July and the second and generally larger crop, starts in September and lasts until the first hard freeze. The yield from only one fall crop will usually be greater than the combined yield if allowed to double crop. Berries are large, brilliant red, firm and attractive. Superb for freezing and delicious fresh. **Zones 4-8**

89955 1-9 plants \$6.90 ea.
89955 10-24 plants \$6.20 ea.
89955 25+ plants \$5.90 ea.

Himbo Top

Everbearing . A release in 2008 is noted for flavor, terrific production, and very high resistance to root rot. Large, firm, bright red fruit hang down in clusters for easy harvest. Ed's top choice for red raspberries. **Zones 4-8**

89960 1-9 plants \$6.90 ea.
89960 10-24 plants \$6.20 ea.
89960 25+ plants \$5.90 ea.

Jewel

Mid-Season . The plant is vigorous, erect, consistently productive, resistant to anthracnose and widely adapted. The fruit ripens early and the ripening season is concentrated. The berries are large, with glossy skin, firm, of superior quality and excellent flavor. Virus free. **Zones 4-8**

89805 1-9 plants \$7.00 ea.
89805 10-24 plants \$6.50 ea.
89805 25+ plants \$6.00 ea.

Mac Black

Late-Season . Highly recommended for season extension. Mac Black is a variety that will extend the black raspberry season. Ripening after Jewel, Mac Black berries have excellent flavor, good size, and production. **Zones 5-8**

89810 1-9 plants \$7.00 ea.
89810 10-24 plants \$6.50 ea.
89810 25+ plants \$6.00 ea.

Prelude

Summer-Bearing . This variety is the earliest ripening summer red raspberry and has less problems with SWD larvae. Harvest starts in mid-June when growing in the midwest. This is primarily a spring/summer variety and may have a few berries in the fall. Very winter hardy and vigorous. Berries are conic shaped, and hold together well, with very good flavor. An excellent choice for early fruit with good quality. **Zones 4-8**

89965 1-9 plants \$6.90 ea.
89965 10-24 plants \$6.20 ea.
89965 25+ plants \$5.90 ea.

Strawberries

- MIX & MATCH VARIETIES FOR LOWER PRICES -

PLANT SPACING

16"-18" apart with rows spaced at 40"

25 plants = 35' row

Plants per Acre: approx. 8,712

EVERBEARING: Three months after planting, you should begin to pick berries, so plant them in early spring, pinch off flowers for two months, and then harvest strawberries from July to frost. They will flower and fruit irrespective of day length.

Strawberry plants shipped after May 20 are not guaranteed.

AC Wendy

Introduction from Nova Scotia with exceptional vigor. Large, early to ripen wedge-shaped fruit has good internal color with aromatic flavor. Fruit size holds well from first to last picking. Prized for high yields, firm berries and great for freezing attributes, its resistant to powdery mildew and red stele and performs well in heavier soils. Early season varieties may need additional frost protection. **Zones 3-8**

- 90650 1-3 bundles 25 plants/bundle \$19.80 ea.
- 90650 4-9 bundles 25 plants/bundle \$12.50 ea.
- 90650 10-19 bundles 25 plants/bundle \$10.50 ea.
- 90650 20-39 bundles 25 plants/bundle \$9.50 ea.
- 90650 40+ bundles 25 plants/bundle \$8.50 ea.

Albion . everbearing

Will produce summer and fall crop. Large sized, well flavored berry. This variety will out-produce any of the older varieties. Berries are good flavored, red throughout, and maintain very nice fruit size through the season. Hardy and resistant to disease. **Zones 4-7**

- 90700 1-3 bundles 25 plants/bundle \$21.80 ea.
- 90700 4-9 bundles 25 plants/bundle \$13.50 ea.
- 90700 10-19 bundles 25 plants/bundle \$11.50 ea.
- 90700 20-39 bundles 25 plants/bundle \$10.50 ea.
- 90700 40+ bundles 25 plants/bundle \$9.50 ea.

Brunswick

The best of both Honeoye and Cavendish are available in this popular variety. Good disease resistance with high yields and winter hardiness make this an all around winner. Resistant to red stele rot. **Zones 4-8**

- 90560 1-3 bundles 25 plants/bundle \$19.80 ea.
- 90560 4-9 bundles 25 plants/bundle \$12.50 ea.
- 90560 10-19 bundles 25 plants/bundle \$10.50 ea.
- 90560 20-39 bundles 25 plants/bundle \$9.50 ea.
- 90560 40+ bundles 25 plants/bundle \$8.50 ea.

Cabot

Highly recommended for home gardeners and market growers. Cabot is known for its huge berries, excellent flavor, winter hardiness and disease resistance. It is by far the best-tasting big berry ever! Cabot is best adapted for northern climate. The berries have an excellent flavor, color and firmness. If you like them big, try Cabot. Plant closer together since they don't runners as much as other varieties. **Zones 4-7**

- 90570 1-3 bundles 25 plants/bundle \$19.80 ea.
- 90570 4-9 bundles 25 plants/bundle \$12.50 ea.
- 90570 10-19 bundles 25 plants/bundle \$10.50 ea.
- 90570 20-39 bundles 25 plants/bundle \$9.50 ea.
- 90570 40+ bundles 25 plants/bundle \$8.50 ea.

Cavendish

Combines high yields with good disease resistance. These red berries are large, attractive, have excellent flavor and firm flesh. Resistant to red stele rot and verticillium wilt. Excellent winter hardiness. **Zones 3-7**

- 90580 1-3 bundles 25 plants/bundle \$18.50 ea.
- 90580 4-9 bundles 25 plants/bundle \$11.50 ea.
- 90580 10-19 bundles 25 plants/bundle \$9.50 ea.
- 90580 20-39 bundles 25 plants/bundle \$8.50 ea.
- 90580 40+ bundles 25 plants/bundle \$8.00 ea.

Earliglow

Very early, glossy red berries that set the standard for fresh eating. Considered by many the best tasting strawberry available. Excellent for jams and jellies. First and second pickings are nice size but berry size drops later in season. **Zones 4-8**

- 90590 1-3 bundles 25 plants/bundle \$18.50 ea.
- 90590 4-9 bundles 25 plants/bundle \$11.50 ea.
- 90590 10-19 bundles 25 plants/bundle \$9.50 ea.
- 90590 20-39 bundles 25 plants/bundle \$8.50 ea.
- 90590 40+ bundles 25 plants/bundle \$8.00 ea.

Flavorfest

A recent release, well suited for growing in the midwest. Flavorfest has shown consistent high yields, larger berry than Chandler, bright red, and EXCELLENT FLAVOR! Resistance to red stele rot and stem and leaf diseases as well as no susceptibility to anthracnose crown or fruit rot. **Zones 4-7**

- 90600 1-3 bundles 25 plants/bundle \$18.50 ea.
- 90600 4-9 bundles 25 plants/bundle \$11.50 ea.
- 90600 10-19 bundles 25 plants/bundle \$9.50 ea.
- 90600 20-39 bundles 25 plants/bundle \$8.50 ea.
- 90600 40+ bundles 25 plants/bundle \$8.00 ea.

Galetta

A productive hybrid of Earliglow. Has the same excellent flavor and holds its size well through the season. Large, red, glossy berries. Has red stele rot resistance and grows well in heavy soils. **Zones 4-8**

- 90610 1-3 bundles 25 plants/bundle \$19.80 ea.
- 90610 4-9 bundles 25 plants/bundle \$12.50 ea.

Grapes

plants
GARDEN-READY

- MIX & MATCH VARIETIES FOR LOWER PRICES -

Bluebell

Early-September : Blue :: Bluebell resembles Concord in size and color but matures earlier and is more cold hardy and disease resistant than Concord. Delicious flavored blue slipskin, good for fresh eating, juice and jelly. Ripens early September. Strong productive vine is a good substitute for Worden which is not available this year.
88891 1-2 plants \$10.50 ea.
88891 3-9 plants \$9.50 ea.
88891 10+ plants \$8.90 ea.

BERRY BOXES

These Berry Boxes are ideal for strawberries, raspberries, and blueberries or whatever your crop might be. The product is made of an extremely lightweight, sustainable molded fiber, a natural choice for absorbing excess juices from produce.

- 72261 Pint . 10 pk \$2.50
- 72256 Quart . 10 pk \$3.00
- 72262 Pint . 100 pk. \$20.70 
- 72265 Pint . 420 pk. \$79.10 
- 72257 Quart . 100 pk. \$23.80 
- 72260 Quart . 297 pk. \$64.40 

Concord

Late-September : Blue :: A well known standard for home use and juices. Vigorous and hardy vines. However, fruit is quite susceptible to black rot which may require spraying. **Zones 4-8**
88870 1-2 plants \$10.50 ea.
88870 3-9 plants \$9.50 ea.
88870 10+ plants \$8.90 ea.

Concord . seedless

Mid-September : Deep Blue :: A seedless version of the familiar Concord. The fruit is smaller and a bit more tangy. Excellent to eat fresh, or use for pies and juice. The vine is hardy, but slightly less vigorous than seeded Concord. **Zones 5-9**
88895 1-2 plants \$12.50 ea.
88895 3-9 plants \$11.50 ea.
88895 10+ plants \$10.50 ea.

Everest . seedless

Late-September : Deep Blue :: Is a truly seedless Concord-type grape offering a flavorful berry with the attractive blue coloring of a Concord at nearly double the size. Enjoy its soft, juicy distinctly flavorful fruit produced on attractive large clusters.
88900 1-2 plants \$15.30 ea.
88900 3-9 plants \$14.10 ea.
88900 10+ plants \$13.00 ea.

Fredonia

Mid-September : Blue/Black :: Very hardy and vigorous but requires less pruning than other varieties. Fredonia has a wonderful spicy-sweet flavor and superb quality. Good for jams, jellies, fresh eating, and a favorite for juice.
88875 1-2 plants \$10.50 ea.
88875 3-9 plants \$9.50 ea.
88875 10+ plants \$8.90 ea.

Himrod . seedless

Early-September : Golden Yellow :: A highly productive seedless grape that turns golden yellow when fully ripe. A very good table grape and a favorite for fresh eating. One of the best varieties for making your own raisins. Hardy to -15°F.
88905 1-2 plants \$12.50 ea.
88905 3-9 plants \$11.50 ea.
88905 10+ plants \$10.50 ea.

Niagara

Late-September : White :: Larger than most grapes. Quality is very good, sweet juicy with a rich distinctive flavor. The best known white grape. Cold hardy. **Zones 5-8**
88880 1-2 plants \$10.50 ea.
88880 3-9 plants \$9.50 ea.
88880 10+ plants \$8.90 ea.

Reliance . seedless

Mid-August : Red :: The hardiest of the red seedless! Hardy to -30°F. Large clusters that are well filled. Fruit has a sweet delightful flavor and stores well. A dependable, productive variety. **Zones 5-8**
88910 1-2 plants \$12.50 ea.
88910 3-9 plants \$11.50 ea.
88910 10+ plants \$10.50 ea.

Steuben

Mid-September : Blue/Black :: Exquisite flavor in a very large cluster. Melting, sweet tender with a delicate grape flavor. Minimal or no spraying needed. Hardy to -20°F. Stores well.
88885 1-2 plants \$10.50 ea.
88885 3-9 plants \$9.50 ea.
88885 10+ plants \$8.90 ea.

Asparagus

Jersey Knight

All male - most widely adaptable of the new hybrids and more productive than Mary Washington. Disease-resistant roots. Plants should be spaced 18" apart and in a few years you will have a solid row. Large one year plants. No. 1 crowns.

- 87700 1-3 bundles 25 plants/bundle\$17.50 ea.
- 87700 4-9 bundles 25 plants/bundle\$13.50 ea.
- 87700 10-39 bundles 25 plants/bundle\$11.00 ea.
- 87700 40+ bundles 25 plants/bundle\$9.40 ea.

Purple Passion

Dress up your relish plate with color with these beautiful purple spears. Purple passion is sweeter and more tender than green varieties. Produces spears of the same size and maturity as Jersey King with a slightly smaller yield. Large one year No. 1 crowns.

- 87705 1-3 bundles 25 plants/bundle\$17.50 ea.
- 87705 4-9 bundles 25 plants/bundle\$13.50 ea.
- 87705 10-39 bundles 25 plants/bundle\$11.00 ea.
- 87705 40+ bundles 25 plants/bundle\$9.40 ea.

Spring Garlic

Spring Garlic

Garlic bulbs separate into 8-10 cloves. Plant and store same as shallots.

- 88745 1 bulb\$2.60 ea.
- 88746 ½ lb (3-4 bulbs)\$4.80 ea.
- 88747 1 lb (6-8 bulbs)\$8.90 ea.

Horseradish

Horseradish

Dig roots in fall or early spring and grind or blend for tasty sauce with zest. Vigorous and easy to grow.

- 89010\$5.80 ea.

Rhubarb

Delicious for sweet-tart pies, sauces, preserves. Easy to grow; once established they'll have large crops year after year with hardly any care. Do not pull stalks first year. Never cut it off; always pull. Leave 3 stalks per plant when harvesting.

Usually Available March 2-May 1

Crimson Red

This variety is considered by some to be the best flavored rhubarb available with a perfect sweet, tart combination that makes rhubarb so unique. Crimson Red shows good weather hardiness and adapts to many soil types and growing conditions.

- 90250 1-4 plants\$8.50 ea.
- 90250 5+ plants\$8.00 ea.

Shallot Sets

Shallots

Enhance your cooking with the mild, distinctive flavor of shallots. A combination of onions and garlic, but with a better storage life. Easy to grow, plant the sets 4-6" apart, completely covering with soil. Each set will yield one big cluster of shallots. Harvest anytime or when tops die back. Storage: 10-12 months

- 90402 ½ lb\$3.60 ea.
- 90403 1 lb\$4.90 ea.
- 90405 32 lb\$92.80 ea. 30

Onion Plants

Requested ship date on onion plants should be before April 25. Grown in the south during the winter months and shipped fresh. Starting with plants will produce larger onions and give you more choice of sweet onion selection. Will mature earlier than onion sets.

PLANTING INFO FOR ONION PLANTS: For early green onions, plant 1" deep. For larger storage onions plant very shallow. These will grow faster and bigger with the bulb on top of the soil. Harvest the same as onion sets.

Candy

Hybrid . Day-Neutral . Easy to grow, adapts to all climates. #1 for fresh eating, these huge savory onions are irresistible. Golden skin, attractive white rings with a mild, sweet flavor. Every spring, your garden needs some Candy! Storage: 3 months.

- 89210 1-4 bundles 50-70 plants/bundle\$8.20 ea.
- 89210 5-6 bundles 50-70 plants/bundle\$5.90 ea.
- 89210 7-29 bundles 50-70 plants/bundle\$5.00 ea.
- 89210 30-59 bundles 50-70 plants/bundle \$3.80 ea. 10
- 89210 60+ bundles 50-70 plants/bundle \$3.70 ea. 30

Patterson

Hybrid . Long-Day . Patterson has the same firmness and storage qualities as Copra, with a larger size, better uniformity. Yield potential is higher with equally matched flavor and storage capacity. The 3 - 4" bulbs have dark yellow skin and thin necks that dry quickly with a moderate pungency and good sugar content. They maintain their quality long after other varieties have gone soft.

- 89215 1-4 Bundles 50-70 plants/bundle\$11.30 ea.
- 89215 5-6 Bundles 50-70 plants/bundle\$8.20 ea.
- 89215 7-29 Bundles 50-70 plants/bundle\$6.90 ea.
- 89215 30-59 Bundles 50-70 plants/bundle \$5.30 ea. 10
- 89215 60+ Bundles 50-70 plants/bundle \$5.00 ea. 30

Redwing

Hybrid . Long-Day . A large uniform bulb with deep red color. Thick skinned onions have excellent long term storage. Good red color in the rings. Very attractive on sandwiches. Storage: 6-7 months

- 89220 1-4 bundles 50-70 plants/bundle\$10.80 ea.
- 89220 5-6 bundles 50-70 plants/bundle\$7.80 ea.
- 89220 7-29 bundles 50-70 plants/bundle\$6.60 ea.
- 89220 30-59 bundles 50-70 plants/bundle \$5.00 ea. 10
- 89220 60+ bundles 50-70 plants/bundle \$4.80 ea. 30

Super Star

Hybrid . Day-Neutral . Big, mild white onions from plants. 2001 AAS winner. Widely adapted, day-neutral variety. Produces uniform, large, white-skinned onions with mild flavor and thick rings. Great for salads, slices, onion rings, and frying. Storage: 3-4 months

- 89225 1-4 bundles 50-70 plants/bundle\$8.20 ea.
- 89225 5-6 bundles 50-70 plants/bundle\$5.90 ea.
- 89225 7-29 bundles 50-70 plants/bundle\$5.00 ea.
- 89225 30-59 bundles 50-70 plants/bundle \$3.80 ea. 10
- 89225 60+ bundles 50-70 plants/bundle \$3.70 ea. 30

Walla Walla

Open-Pollinated . Long-Day . Huge and sweet. Flattened globes with golden skin. The famous, mild yellow variety from Walla Walla, WA. Technically "day-neutral" but best grown as a "long day" type. Best used within a few months of harvest.

- 89230 1-4 bundles 50-70 plants/bundle\$8.20 ea.
- 89230 5-6 bundles 50-70 plants/bundle\$5.90 ea.
- 89230 7-29 bundles 50-70 plants/bundle\$5.00 ea.
- 89230 30-59 bundles 50-70 plants/bundle \$3.80 ea. 10
- 89230 60+ bundles 50-70 plants/bundle \$3.70 ea. 30

Yellow Spanish

Open-Pollinated . Long-Day . Delicious raw or cooked. This strain of Yellow Sweet Spanish onions produce an extra jumbo size bulb; up to 1 lb! This onion is a gardening favorite for sizing up quickly without much tending. Reliable and dependable. Grows well in short day areas if planted early enough.

- 89235 1-4 bundles 50-70 plants/bundle\$8.20 ea.
- 89235 5-6 bundles 50-70 plants/bundle\$5.90 ea.
- 89235 7-29 bundles 50-70 plants/bundle\$5.00 ea.
- 89235 30-59 bundles 50-70 plants/bundle \$3.80 ea. 10
- 89235 60+ bundles 50-70 plants/bundle \$3.80 ea. 30

Onion Sets

Onion sets are a small onion bulb, grown from seed the previous year and stored over the winter. Push bulbs into the soil and they'll start growing again. To start your own onion sets, see Garden Seeds for onion seeds.

PLANTING INFO FOR ONION SETS: Before planting, divide the sets into two sizes. Use the largest sets for green table onions, and the smaller sets for dry cooking onions.

GREEN TABLE ONIONS: Choose sets the size of a nickel and larger. Plant 1/2" apart, 2-3" deep with the roots down. Deep planting produces more white, edible stems. Harvest delicious green table onions in 4-5 weeks. Keep planting weekly for a continuous supply through the summer. Harvesting: Pull the onions when the tops are about 12" high. The green tops can be used in soups, salads, etc. If the onions become too large, they will be more pungent and can be used in cooking.

DRY COOKING ONIONS: Choose the smallest sets and plant 2-3" apart. Soil should barely cover the top of the sets. Space the rows 12" apart. Harvesting: Onions are ready to be harvested when the tops of the plants begin to fall over (around July to August). Once the tops have dried and fallen, pull the onions and lay out to dry up to three weeks before storing.

STORING: Only the dry cooking onions can be stored. Once they are thoroughly dried, tie or braid the tops and hang in a cool, dry place. Or cut off the tops, leaving up to 1/2" of stem and place bulbs in a mesh bag. Hang the bag in a cool, dry place.

Red

Best for fresh eating. Flat slicer is excellent on sandwiches. May also use as an early green onion. Does not store as well as white onions.

- 89312 1/2 lb\$2.60 ea.
- 89313 1 lb\$3.60 ea.
- 89315 32 lb\$46.60 30

Stuttarter

Our best onion set for storage, slightly flat shape, good for green onions or cooking. Excellent keeper.

ORDER NOW • AVAILABLE AFTER MARCH 2

Seed Potatoes

AMERICA'S FAVORITE VEGETABLE! Potatoes produce more calories per sq. ft. than any other vegetable in our catalog. They are rich in vitamin C, an excellent source of potassium, and not a drop of fat, sodium or cholesterol to be found. Tubers store well and can be prepared in a wide range of recipes. Our Blue Tag certified seed potatoes are field inspected and guaranteed to be disease free. Seed tubers are untreated and can be eaten if not planted.

Huckleberry Gold

Huckleberry Gold is notably high in antioxidants with a lower glycemic index than other potato varieties, making it a smart choice for those monitoring blood sugar levels. The tubers are exceptionally uniform in size, with plants typically setting 5 to 7 potatoes per hill. They have been highly favored by chefs in trials, often preferred over other varieties for their creamy, buttery texture, making them ideal for mashed potatoes or serving as baby potatoes alongside steak.

- 89514 5 lb \$9.50
- 89515 10 lb \$14.00
- 89516 50 lb \$40.90

Kennebec A

One of the most widely grown crop potatoes. Enjoy excellent yields of large, thin-skinned, oval tubers with white flesh that is dry and flavorful. Cooks and bakes wonderfully, and one of the best for winter storage. Good blight resistance. A late mid-season variety.

- 89457 5 lb \$7.90
- 89458 10 lb \$11.20
- 89460 50 lb \$32.10

Kennebec B

B Size potatoes are smaller and do not need to be cut before planting. They have less chance of rotting, especially in heavy soil or early plantings.

- 89467 5 lb \$8.90
- 89468 10 lb \$12.20
- 89470 50 lb \$35.80

Red Norland

Red Norland potatoes have are medium sized, with an oblong shape, shallow eyes, smooth red skin, and white flesh. Early season potato with good storage.

- 89477 5 lb \$7.90
- 89478 10 lb \$11.20
- 89480 50 lb \$32.10

Red Pontiac

A late season variety with round to oblong tubers with a dark red skin that is sometimes netted. Tubers have medium to deep eyes, and white flesh. The variety is widely adapted with high yield potential and does well in heavy soil. A good keeper with lasting quality.

- 89487 5 lb \$7.90
- 89488 10 lb \$11.20
- 89490 50 lb \$32.10

Yukon Gold

Golden-skinned with yellow flesh interior that looks buttery and has amazing flavor. Possibly the best potato on the market. Stores well.

- 89497 5 lb \$7.90
- 89498 10 lb \$11.20
- 89500 50 lb \$32.10

Sweet Potato Plants

SWEET POTATO TIPS: Growing instructions and recipes are included with shipment. If plants are wilted upon arrival, soak (roots only) in 1/2" water overnight to perk them up. If weather is cool, you may delay planting for several days by keeping roots in water at room temperature.

Due to plants becoming "cooked", it is not recommended to use black plastic for sweet potato plantings if you have hot summers. Areas in zone 4 and above it should work, but below zone 4 it is not advisable.

Since sweet potato plants do not withstand frost, they are shipped after danger of frost is past for your area and they will be shipped separately.

Usually Shipped April 20-May 11

Sweet potato plants are
available in store May 18 - June 15.
Call for earlier/later availability.

Beauregard

90 days . Red orange skins with orange flesh. Quick maturing, good shape, widely known.

Its compact 4-inch blooms create a soft and delicate texture, making it perfect for floral arrangements. This dahlia's rounded shape and smooth, velvety petals add a touch of vintage charm to any setting. 'Taffarel' will bring timeless beauty to your garden all summer long.

88566 1 bulb.....\$8.40

Elephant Ear

Elephant Ears

Dramatic, exotic plant with huge heart-shaped leaves. Perfect choice for an accent plant or the focal point in a tropical-themed water garden. In warmer climates (zone 8 and above) their leaves can reach 3' long and 2' wide while in colder climates they will remain smaller but still have impressive leaves. In zones up to 8 the plant can be treated as an annual for one season or dug up and stored indoors for planting the following spring.

88680 1 bulb.....\$7.20

Mojito

Ht. 36" Bold, tropical foliage with striking lime-green leaves and deep veins. It prefers a location in full sun to partial shade with moist, well-drained soil.

88681 1 bulb.....\$13.70

Gladiolus

Louise

Ht. 36-48" Tall spikes adorned with soft pink, ruffled blooms. It requires full sun and moist, well-drained soil.

88629 10 bulbs.....\$6.70

Mix

Ht. 56-60" Start off growing gladiolus with this mix that has it all. As easy as it gets to grow a rainbow of color. Tall plants make a perfect backdrop for gardens or use in bouquets.

88585 30 bulbs\$14.10

Parrot Mixture

Ht. 56- 60". Ruffled multi-colored beauties with contrasting edges and blended shades are spectacular! Plant these in the cutting garden for mix and match bouquets. Pleasing sight when trickled throughout your garden for a foliage-only backdrop for a big summer show in your flower garden. Attractive to butterflies.

88590 10 bulbs..... \$9.00

Pink Lady

Ht. 48-60". This strikingly elegant variety, featuring large, white blooms delicately blushed with soft pink and highlighted by a deeper pink edge. Each flower is delicately ruffled, creating a graceful appearance perfect for adding height and color to your summer garden. This variety blooms in mid to late summer.

88628 10 bulbs..... \$6.70

Polar Bear

Ht. 50-60" Polar Bear Gladiolus blooms with bright white, gently ruffled petals. Long flower spikes will emerge over the sword-shaped foliage, blooming from the bottom up. At the end of the season, cut back the stems, mulch well, and look forward to years of enjoyment as the corms will increase with time.

88595 10 bulbs..... \$6.70

Oriental Lily

Easy Blend

Ht. 14-16" A mix of fragrant, large blooms in pink, white, and lavender shades.

88641 4 bulbs.....\$12.70

Fragrant Blend

Ht. 40-48" Enticing mix of blooms in vibrant shades of pink, deep fuchsia and white. An economical way to liven up perennial borders, containers or plant in a cutting garden for spectacular bouquets. Huge flowers will fill an entire room with their sweet perfume. Mix of vibrant shades of pink, deep fuchsia and white. Hardy plant that can stay in the ground all winter.

88635 5 bulbs.....\$12.70

NEW

Netty's Pride

Ht. 2-4' Large, fragrant white blooms with a touch of green at the center.

88646 2 bulbs.....\$7.20

Peony

Cotton Candy Mix

Ht. 36-48" A perfect choice for peony lovers that can't decide! Impressive 6-8" double flowers which will make a statement in any garden. The sweet aroma will attract gardeners and pollinators. Bring the aroma indoors in bouquets and fresh cut arrangements. A mix of pink, red and white.

88465 3 bulbs..... \$16.60

Sarah Bernhardt

Ht. 24-36" . Rich rose-pink double blooms that can reach an impressive 5-7 inches in diameter. These large, fragrant flowers have soft, ruffled petals that exude elegance and are perfect for cut flower arrangements. Due to their heavy blooms, staking may be necessary. Blooming in late spring to early summer.

88467 1 bulb\$8.20

Shirley Temple

Ht. 32-36" . This peony's ruffled petals create a beautiful flower with a delicate fragrance, making it a standout in any garden. Shirley Temple peonies bloom in late spring to early summer and thrive in full sun to partial shade with well-drained soil.

88469 1 bulb \$8.00

Ranunculus

Peony Pink

6-12" These full, layered blooms in gentle pink shades, bring elegance and charm to beds, borders, or bouquets.

88731 20 bulbs \$14.30

Pastel Mix

10-12" These soft, layered blooms come in a mix of pastel shades including blush, peach, cream, and lavender.

88730 10 bulbs..... \$8.40

Tree Lily

Pretty Woman

Ht. 5-7' . Known for its sturdy stalks and large, fragrant blooms, this lily variety makes an excellent cut flower for arrangements. Each lily bulb can have as many as 20-30 blooms by the third year. Its strong stems provide reliable support, even in windy conditions.

88662 2 bulbs..... \$8.00

Arborvitae

Green Giant

This is a large, vigorous, fast-growing evergreen. Shooting up by as much as 3 feet per year until maturity. Its natural pyramidal to conical form boasts dense, rich green foliage that darkens slightly in the winter. Great for windbreaks and food plots. Avg. mature size 7'-35'. Can be sheared to size.

90815 1-9 10-18", bareroot \$6.90 ea.
90815 10+ 10-18", bareroot \$5.90 ea.

Emerald Green

Hardy upright evergreen with vibrant emerald green foliage, commonly used to create an evergreen screen or as an accent plant. These trees grow at a moderate rate of 8-12" per year and are adaptable to a wide range of conditions. Great for situations where you don't have a lot of space and want a plant that will reach a height of 10-14'. Plant at a spacing of 2-3 feet on center to allow trees to grow into one another and create an evergreen screen. These are one of the densest evergreens you can plant.

90810 1-9 8-12", bareroot \$6.80 ea.
90810 10+ 8-12", bareroot \$5.80 ea.

Dogwood

Cherokee Brave

Flowering tree features showy clusters of crimson red/pink flowers with white centers held atop the branches in mid spring. It has forest green foliage which emerges burgundy in spring. The pointy leaves turn an outstanding brick red in the fall. It produces red berries from early to late fall. Avg. size 12'-15'.

90950 1-9 2-3', bareroot \$11.50 ea.
90950 10+ 2-3', bareroot \$10.00 ea.

Celestial Shadow

Celestial Shadow Dogwood is a spectacular small tree, which has something beautiful to offer all year round. In spring it begins with dramatic creamy-white and green variegated leaves, and in May and early June these are overshadowed by masses of large, pure-white blossoms. The variegation holds well all summer, and in the fall the tree blazes with pink and red fall coloring. This tree can reach 15' tall and wide, and it is ideal on a lawn or along the edges of a wooded area. It makes a colorful backdrop to other shrubs, and it also would look wonderful around your home. Grows best in moist, well-drained soil. Resistant to anthracnose and borers. Zone 5

90960 1-9 2-3', bareroot \$14.50 ea.
90960 10+ 2-3', bareroot \$12.50 ea.

Cherokee Princess

This tree is the most common ornamental small tree among homeowners and gardeners and is great to add as an accent in yards. Blooms in early spring with beautiful delicate white flowers clusters. Full or partial sun recommended. The leaves are dark green and oval and turn spectacular shades of red during the fall. Produces red fruits that are bitter and not for human consumption but are enjoyed by birds. Avg. size 12'-15'.

90955 1-9 2-3', bareroot \$11.50 ea.
90955 10+ 2-3', bareroot \$10.00 ea.

Pine

Eastern White

We are pleased to offer pines with a good root system that is ready to take off. Use for privacy, windbreaks, or to enhance your hunting land. Fast growing. 35'-45' height in 25 years

90840 1-9 10-18", bareroot \$5.10 ea.
90840 10+ 10-18", bareroot \$4.20 ea.

Redbud

Black Pearl

Black Pearl is a dark maroon and purple redbud with deep dark color. What sets it apart from other purple redbuds is the depth of color in the thick glossy leaves. Maintains better deep dark purple than the common Forest Pansy cultivar. This redbud holds its color through the growing season and follows the captivating leaf pattern of aces of hearts with symmetrical orderly leaves. Small bright purple/pink flower clusters in early spring. For those looking to grow a beautiful small tree that doesn't require a lot of maintenance and pruning Black Pearl is an excellent choice.

91000 2-3', bareroot \$24.50 ea.

Hearts A' Fire

This small tree puts on a spectacular show in spring: first, flowering in clusters of charming pes-like dark pink flowers on bare branches; then, bursting into flames as its graceful canopy of large, heart-shaped leaves emerge in a blaze of fiery colors-burgundy-red, rangerine-orange, and gold-before maturing to a reddish green.

91002 2-3', bareroot \$28.50 ea.

Rising Sun

This fabulous new redbud has leaf colors that are spectacular, with new growth starting apricot, graduating to vivid gold, and finally to bright green. And if you water in dry spells, it will keep flushing the tangerine new growth over the entire summer into fall. Small, bright pink flowers. Its tough constitution lets it withstand drought, heat, poor soil and pollution, while the leaves are resistant to sunburn

91005 2-3', bareroot \$24.50 ea.

Spruce

Colorado Blue

A great selection for privacy at property lines or in landscapes. Growth average 12" X 16" per year. 30' X 35' height.

90860 1-9 10-16", bareroot \$5.20 ea.
90860 10+ 10-16", bareroot \$4.20 ea.

Norway

Fast growing evergreens with the same great root system. Will tolerate a wide range of soil types. Also a great cover tree for hunting plots. Grows 2'-3' per year. 45'-60' height.

90865 1-9 8-14", bareroot \$5.10 ea.
90865 10+ 8-14", bareroot \$4.20 ea.

HOME ORCHARD PACKAGES

Package Selections:

Can't make up your mind? Choose a package.

High quality stock, economically priced, covered by our guarantee!

Family Orchard Combo

Hardy, Easy to Grow Varieties

Apple . Liberty (Early October . Shiny, red apple that stores well into mid-winter. Crisp, good flavor)

Apple . Enterprise (Semi Dwarf) (Late October . Red with exceptional flavor and disease resistance, stores well.)

Peach . Encore (Late August . Firm, cold-hardy, and productive, with good eating quality)

Peach . Harmony (Late August . Hardy tree well suited for canning and freezing)

Pear . Seckle (Early September . Small sweet sugar pear. Ideal for the home gardener)

Pear . Bosc (Early October . Russeted winter pear, large, flavorful, high-yielding, and stores well.)

Sweet Cherry . Sandra Rose (Mid-Late July . Large, dark red with sweet, firm flesh and good splitting tolerance.)

Plum . Mt Royal (Late August . A European plum with abundant blue-yellow fruit. Sweet, firm, and exceptionally flavorful.)

91225 \$198.00

Fruit Cocktail Combo

All Hardy Varieties and Self Fertile Type

Peach . Harmony* (Late August . Hardy tree with superior canning and freezing qualities.)

Plum . Mt Royal (Late August . A European plum with abundant blue-yellow fruit. Sweet, firm, and exceptionally flavorful.)

Sweet Cherry . Sandra Rose (Mid-Late July . Large, dark red with sweet, firm flesh and good splitting tolerance.)

Sweet Cherry . Carmine Jewel (Early July . Deep, dark tart cherries – highly productive and excellent for pies and preserves.)

Nectarine . Avalon (Mid August . Rich red, good flavor, high yielding, good cold storage)

*Subject to change

91230 \$165.00

Heritage Apple Combo

Grafted, Dwarf-sized Trees. Perfect for Ciderblends, Fresh Eating, or Storing

Calville Blanc (or Wealthy) (Late October . Cold-hardy yellow French apple prized for cider and desserts.)

Prairie Spy (Late October . Large, tangy red-over-green apples; flavor improves with age—ideal for eating or baking.)

Winesap (Late October . Dull red apple. Tart, juicy yellow flesh. Excellent for baking and cider. Keeps well.)

Smokehouse (Late October . Juicy, crisp, yellowish apples with sweet-tart, caramel and spice flavor—fine cooking apple)

Yellow Transparent (Mid-Late July . Pale yellow, sweet-tart apples with white flesh, often picked slightly green for smooth, flavorful sauces.)

91235 \$138.00

FRUIT TREES QUESTIONS & ANSWERS:

WHAT SIZE WILL MY TREES BE WHEN I RECEIVE THEM?

They are 4 to 6 ft. tall.

HOW SOON DO THEY PRODUCE FRUIT?

Peaches usually produce fruit the first or second year after planting. Apples and pears require 2 to 4 years after planting to start producing fruit. Plums usually produce after 3 years, increasing every year thereafter.

Much of early production is reliant on proper planting in a worked up (tilled) area with fertile soil, versus a "hole in the sod." Deep, well-drained topsoil is desirable. For one or two trees, a mound of topsoil can be created and the tree planted right into the mound. This is especially crucial for stone fruits, when soil is heavy and drainage problems exist. Cultural care right after planting is essential also, proper mulching and watering during dry periods will make a difference in your yields.

HOW OLD ARE THE TREES?

They are 2 and 3 year old grafted bareroot nursery grown stock.

SUGGESTED PLANTING SPACE:

VARIETY	BETWEEN ROW	IN ROWS
APPLES, SEMI-DWARF	.18'	14'
APPLES, DWARF	.14'	8'
PEACHES	.18'	14'-12'
PEARS	.18'	12'
CHERRIES, TART	.14'	8'
CHERRIES, SWEET	.18'	12'-18'
GRAPES	.14'	6'-8'

Apples

HOME ORCHARD AND COMMERCIAL VARIETIES

Apples are the most versatile of all fruits! No homestead should be without apple

trees in a host of different ripening sequences and a variation of eating and culinary tastes. Most apple tree varieties available are Semi-Dwarf on Emla 7 root stock and Dwarf are on Emla 26 or Bud 9. Plant two different varieties for pollination.

Cortland

Mid-Season . A large mostly red apple with crisp pure white flesh. Sweet, yet tangy, flavor. A favorite for eating and cooking. Productive tree. A good pollinator. Zones 4-8 . Harvest : Mid to late September

91107 Dwarf 1-2 trees	\$30.00
91107 Dwarf 3-4 trees	\$27.00
91107 Dwarf 5+ trees	\$24.50
91108 Semi-Dwarf 1-2 trees	\$30.00
91108 Semi-Dwarf 3-4 trees	\$27.00
91108 Semi-Dwarf 5+ trees	\$24.50

Crimson Crisp

Late-Season . Bright red fruit with a firm, crisp texture that stores very well. Pleasing complex flavor. Grower friendly, productive tree. Great for winter eating. Zone 4-8 . Harvest : Late September

91103 Dwarf 1-2 trees	\$30.00
91103 Dwarf 3-4 trees	\$27.00
91103 Dwarf 5+ trees	\$24.50
91104 Semi-Dwarf 1-2 trees	\$30.00
91104 Semi-Dwarf 3-4 trees	\$27.00
91104 Semi-Dwarf 5+ trees	\$24.50

Gala

Mid-Season . Striped red orange skin. Crisp, dense flesh. Fine sweet/tart flavor. Excellent dessert apple. Vigorous tree. Zones 5-8 . Harvest : Early September

- 91105 Dwarf 1-2 trees \$30.00
- 91105 Dwarf 3-4 trees..... \$27.00
- 91105 Dwarf 5+ trees \$24.50
- 91106 Semi-Dwarf 1-2 trees \$30.00
- 91106 Semi-Dwarf 3-4 trees..... \$27.00
- 91106 Semi-Dwarf 5+ trees \$24.50

Ginger Gold

Early-Season . Smooth skinned, yellow green color. Fine flavored. Good for sauce as well as fresh eating. The tree bears consistently and is easily trained. An excellent replacement for the older Yellow Transparent. Zones 5-8 . Harvest : End of July

- 91110 Dwarf 1-2 trees \$30.00
- 91110 Dwarf 3-4 trees..... \$27.00
- 91110 Dwarf 5+ trees \$24.50
- 91111 Semi-Dwarf 1-2 trees \$30.00
- 91111 Semi-Dwarf 3-4 trees..... \$27.00
- 91111 Semi-Dwarf 5+ trees \$24.50

Goldrush

Late-Season . Best keeper! A deep yellow apple with sweet, crisp flesh. Makes a yellow sauce. Slices stay intact when baking! An outstanding apple that stores extremely well - up to 30 weeks! Zones 5-8 . Harvest : Late October

- 91115 Dwarf 1-2 trees \$30.00
- 91115 Dwarf 3-4 trees..... \$27.00
- 91115 Dwarf 5+ trees \$24.50
- 91116 Semi-Dwarf 1-2 trees \$30.00
- 91116 Semi-Dwarf 3-4 trees..... \$27.00
- 91116 Semi-Dwarf 5+ trees \$24.50

Honeycrisp

Mid-Season . Red over yellow fruit is delightfully crisp. Excellent for fresh eating. Stores exceptionally well, up to five months in common storage. Loses some flavor in storage. A very outstanding apple developed by the University of Minnesota. Zones 3-7 . Harvest : Mid September

- 91120 Dwarf 1-2 trees \$30.00
- 91120 Dwarf 3-4 trees..... \$27.00
- 91120 Dwarf 5+ trees \$24.50
- 91121 Semi-Dwarf 1-2 trees \$30.00
- 91121 Semi-Dwarf 3-4 trees..... \$27.00
- 91121 Semi-Dwarf 5+ trees \$24.50

Jonagold

Mid-Season. The large yellow fruit has a series of red streaks and scarlet blushes. The flesh is very crisp, firm and sweet. Excellent for fresh eating. Stores well. Produces heavily especially with a good pollinizer like McIntosh. Zone 4-8 . Harvest : Mid-October

- 91123 Semi-Dwarf 1-2 trees \$30.00
- 91123 Semi-Dwarf 3-4 trees..... \$27.00
- 91123 Semi-Dwarf 5+ trees \$24.50
- 91124 Dwarf 1-2 trees \$30.00
- 91124 Dwarf 3-4 trees..... \$27.00
- 91124 Dwarf 5+ trees \$24.50

Liberty

Late-Season . This shiny red apple stores until midwinter. Crisp, good flavor. Most disease resistant variety developed. Hardy, vigorous, productive. Good all purpose apple. Zones 5-8 . Harvest : Early October

- 91125 Dwarf 1-2 trees \$30.00
- 91125 Dwarf 3-4 trees..... \$27.00
- 91125 Dwarf 5+ trees \$24.50
- 91126 Semi-Dwarf 1-2 trees \$30.00
- 91126 Semi-Dwarf 3-4 trees..... \$27.00
- 91126 Semi-Dwarf 5+ trees \$24.50

McIntosh

Mid-Season . Dark red apple. Sweet white flesh has a spicy flavor. Cooking and fresh eating apple. Hardy tree bears young and abundantly. Zones 4-8 . Harvest : Mid September

- 91130 Dwarf 1-2 trees \$30.00
- 91130 Dwarf 3-4 trees..... \$27.00
- 91130 Dwarf 5+ trees \$24.50
- 91131 Semi-Dwarf 1-2 trees \$30.00
- 91131 Semi-Dwarf 3-4 trees..... \$27.00
- 91131 Semi-Dwarf 5+ trees \$24.50

Novamac

Mid-Season . Red striped, McIntosh type with a flattened shape and sweet, fine textured white flesh. Fruit is medium sized with the a nice tang. Very scab free variety from Nova Scotia. Zones 4-8 . Harvest : Mid September

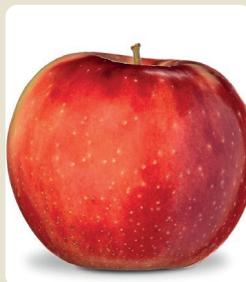

- 91117 Dwarf 1-2 trees \$30.00
- 91117 Dwarf 3-4 trees..... \$27.00
- 91117 Dwarf 5+ trees \$24.50
- 91118 Semi-Dwarf 1-2 trees \$30.00
- 91118 Semi-Dwarf 3-4 trees..... \$27.00
- 91118 Semi-Dwarf 5+ trees \$24.50

Yellow Delicious

Late-Season . Large conical fruit is sweet, fine flavored. A good pie, sauce, and eating apple that keeps well in winter storage. Good pollinator. Zones 4-8 . Harvest : Early October

- 91141 Semi-Dwarf 1-2 trees \$30.00
- 91141 Semi-Dwarf 3-4 trees..... \$27.00
- 91141 Semi-Dwarf 5+ trees \$24.50
- 91140 Dwarf 1-2 trees \$30.00
- 91140 Dwarf 3-4 trees..... \$27.00
- 91140 Dwarf 5+ trees..... \$24.50

Zestar

Early-Season . Reddish-yellow apple that stores well. Sweet and tangy flavor. Good dessert apple. Cold-hardy and easy to grow. Zones 4-7. Harvest: Early August

- 91150 Semi-Dwarf 1-2 trees \$30.00
- 91150 Semi-Dwarf 3-4 trees..... \$27.00
- 91150 Semi-Dwarf 5+ trees \$24.50
- 91151 Dwarf 1-2 trees \$30.00
- 91151 Dwarf 3-4 trees..... \$27.00
- 91151 Dwarf 5+ trees \$24.50

Apricots

Alfred

Small to medium, round, bright orange fruit. Orange, freestone flesh is fine-grained and juicy. Sweet, rich flavor. Vigorous, hardy tree. Reliable cropper. Has some resistance to late frost injury. Regular, heavy bearer. Excellent home use variety. Zone 4-8. Harvest : Late July

- 91160 Semi-Dwarf 1-2 trees \$38.00
- 91160 Semi-Dwarf 3-4 trees \$34.30
- 91160 Semi-Dwarf 5+ trees \$31.10

Patio Peaches

Provide potted peach trees with some chill exposure during the winter. However, they should be moved to an unheated garage, shed or greenhouse kept at 30-40° during extreme cold. Water sparingly, just enough to keep the soil slightly damp, in late winter to mimic dormancy and prevent excessive growth.

Bonanza

Self-Fertile . Perfect for small gardens, patios, or containers, this compact dwarf peach tree reaches a manageable 4-6 feet in height and spread. It yields full-sized, freestone peaches with a mild, sweet flavor and red-blushed skin. This self-pollinating tree thrives in full sun and well-drained soil. Its low-maintenance nature, ornamental appeal, and reliable fruit production make it a favorite for home growers. Zones 5-9.

91290 \$19.90

Bonfire

Self-Fertile . The Bonfire Patio Peach Tree is a stunning ornamental and fruit-bearing wonder, perfect for small spaces, patios, and container gardens. Reaching only 4 to 5 feet tall, this compact beauty dazzles with its vibrant, deep red foliage in spring, followed by a flush of pink blooms that give way to sweet, medium-sized peaches. While these peaches can be enjoyed fresh, their rich, juicy flavor shines when baked into pies or preserved through canning. Self-pollinating and easy to care for, a single tree yields a rewarding harvest, but planting an additional tree can significantly boost your fruit production. Zones 5-8

91295 \$19.90

Peaches

Peaches deserve a place in every home orchard. They often bear the second year after planting. Our peaches are on Lovell rootstock. All peaches listed here are self fertile.

Contender

Mid-Season . Self-Fertile . A superior freestone peach. Has large size and good color. Prized for fresh eating and super delightful for canning. Tree is hardy and productive. Zones 4-8. Harvest : Late August

91255 Semi-Dwarf 1-2 trees\$30.00

91255 Semi-Dwarf 3-4 trees\$27.00

91255 Semi-Dwarf 5+ trees\$24.50

Glo Haven

Mid-Season . Self-Fertile . A wonderful dessert peach that's resistant to browning. Vigorous, productive trees have hardy buds. Large freestone fruit has flavorful yellow flesh and is excellent for canning because of its fuzziness and non-browning nature. Fruit hangs well on the tree and is resistant to bacterial spot. Grows well throughout the Midwestern states. Harvest : Mid-August . Zone 5-8

91260 Semi-Dwarf 1-2 trees\$30.00

91260 Semi-Dwarf 3-4 trees\$27.00

91260 Semi-Dwarf 5+ trees\$24.50

Madison

Late-Season . Self-Fertile . A late summer peach with superior qualities all around. Fruit is freestone with orange-yellow flesh that is mild and rich in flavor. It's frost tolerant buds make it a good choice for homeowners in northern zones.

91265 Semi-Dwarf 1-2 trees\$30.00

91265 Semi-Dwarf 3-4 trees\$27.00

91265 Semi-Dwarf 5+ trees\$24.50

Red Haven

Mid-Season . Self-Fertile . Large freestone fruit. For many years considered one of the best canning and freezing varieties. Resistant to bacterial spot. Trees are vigorous and productive.

Back by request. Zone 5-8. Harvest : Mid-August

91270 Semi-Dwarf 1-2 trees\$30.00

91270 Semi-Dwarf 3-4 trees\$27.00

91270 Semi-Dwarf 5+ trees\$24.50

Reliance

Early-Season . Self-Fertile . Extremely hardy freestone peach. Good for canning and freezing. Well suited to the home fruit grower. Ranks tops in hardiness! Zones 4-8. Harvest : Late July

91275 Semi-Dwarf 1-2 trees\$30.00

91275 Semi-Dwarf 3-4 trees\$27.00

91275 Semi-Dwarf 5+ trees\$24.50

Veteran

Mid-Season . Self-Fertile . Very round medium sized yellow fleshed richly flavored fruit. Above average for canning and freezing, easy to peel. Tree is vigorous, productive, and late blooming. One of the more reliable in cold climates. Zones 5-8. Harvest : Mid August

91280 Semi-Dwarf 1-2 trees\$30.00

91280 Semi-Dwarf 3-4 trees\$27.00

91280 Semi-Dwarf 5+ trees\$24.50

White Lady

Mid-Season . Self-Fertile . Highly colored, outstanding fruit. Among the best of the new, low acid, high sugar, white peaches. The aroma and flavor is sublime. Vigorous and easy to grow. Zone 5-8. Harvest : Mid August

91285 Semi-Dwarf 1-2 trees\$30.00

91285 Semi-Dwarf 3-4 trees\$27.00

91285 Semi-Dwarf 5+ trees\$24.50

Pears

Pears are a great complement to any home orchard. Pears usually require less maintenance than other fruit as far as pruning and spraying. Any two varieties will pollinate each other except Bartlett and Seckle.

Bartlett

Mid-Season . Most popular. Large, golden yellow fruit with brownish red blush. Has the classic pear shape. Best to pick green and ripen off the tree. Good for canning and fresh eating. Zones 4-8. Harvest : Late August

91300 Semi-Dwarf 1-2 trees\$45.00

91300 Semi-Dwarf 3-4 trees\$40.50

91300 Semi-Dwarf 5+ trees\$37.00

Blakes Pride

Mid-Season . Medium to large yellow fruit. Smooth buttery texture with excellent flavor and aroma. Average vigor and good blight resistance. Zone 5-8. Harvest : Early September

91305 Semi-Dwarf 1-2 trees\$30.00

91305 Semi-Dwarf 3-4 trees\$27.00

91305 Semi-Dwarf 5+ trees\$24.50

Bosc

Late-Season . Slightly russeted winter pear. Stores extremely well, good flavor. High yields of large oval shaped fruit. Attractive cinnamon colored skin, rich delicious flavor! Zones 4-8. Harvest : Early October

91310 Semi-Dwarf 1-2 trees\$30.00

91310 Semi-Dwarf 3-4 trees\$27.00

91310 Semi-Dwarf 5+ trees\$24.50

Seckle

Mid-Season . Small sweet Sugar Pear. Ideal for the home gardener. Vigorous, hardy and blight resistant tree that is naturally Semi-Dwarf size. Zones 4-8. Harvest : Mid to late September

- 91315 Semi-Dwarf 1-2 trees\$30.00
- 91315 Semi-Dwarf 3-4 trees..... \$27.00
- 91315 Semi-Dwarf 5+ trees \$24.50

Shenandoah

Late-Season . Large, rich flavored, Bartlett type, good for home or market use. Very blight resistant and hardy tree. Zones 4-8. Harvest : Late September

- 91320 Semi-Dwarf 1-2 trees\$30.00
- 91320 Semi-Dwarf 3-4 trees..... \$27.00
- 91320 Semi-Dwarf 5+ trees \$24.50

Plums

Experience palate pleasure with a delectable tasty, juicy, sweet, tree ripened plum. The best in fresh eating! These plums will thrive wherever peaches are grown.

Methley

Early-Season . Self-Fertile . Medium sized reddish purple plum with juicy red flesh. Unbelievably sweet! Zones 5-8. Harvest : Mid July

- 91350 Semi-Dwarf 1-2 trees\$38.00
- 91350 Semi-Dwarf 3-4 trees.....\$34.50
- 91350 Semi-Dwarf 5+ trees\$31.00

Stanley

Mid-Season . Self-Fertile . Medium to large, dark blue skin with firm fine grained flesh. An old favorite for canning, fresh eating and drying. It is self fertile. Zones 4-8. Harvest : Early September

- 91355 Semi-Dwarf 1-2 trees\$38.00
- 91355 Semi-Dwarf 3-4 trees.....\$34.50
- 91355 Semi-Dwarf 5+ trees\$31.00

Apple Rootstock

Grafting is the art of joining a desired fruit variety (the scion) to a compatible rootstock. The goal is to combine the best qualities of both: the rootstock provides adaptability, anchorage, and growth control, while the scion contributes fruiting habits and variety traits. This age-old practice is both useful and fun – useful because it preserves heirloom varieties, speeds up fruit production, and adapts trees to local conditions; fun because it feels like garden magic. With a careful cut and a bit of tape, you can create a tree that bears several kinds of fruit, rescue an old favorite, or craft a miniature orchard in a small yard. Find more info in version 1.2 of our Gardening Insights booklet.

Bud 9

The Budagovsky 9 (Bud 9) rootstock is highly cold-hardy and disease resistant. Producing a full-dwarf tree at 25-30% of standard size, it is an excellent choice for high-density plantings and is compatible with a wide range of apple varieties. This rootstock is known for its precocity and robust productivity but requires support during the first few years due to its compact stature.

- 91101 ¼" 1-4\$6.80
- 91101 ¼" 5-9.....\$6.00
- 91101 ¼" 10+\$4.80

EMLA 7

The EMLA 7 rootstock is suited for home apple orchards. It creates sturdy, well-anchored semi-dwarf trees, reaching 50-60% of standard size. This rootstock is versatile, adapting well to various soil types and compatible with many different apple varieties. It is fire blight resistant.

- 91102 ¼" 1-4\$6.30
- 91102 ¼" 5-9.....\$5.40
- 91102 ¼" 10+\$4.70

Sweet Cherries

All sweet cherries are self-fertile. No pollinator needed!

Black Gold

- 91195 Semi-Dwarf 5+ trees\$33.50

Order Details

PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

PICK-UP ORDERS

During February, March, and April please allow 3 working days after we get your order, for us to prepare your order to ship or for pick-up. If you would like to pick up at our store please specify a pick-up date at the bottom right corner of the order form and the outside of the envelope. For mailed-in pick-up orders please allow extra lead time and call us to confirm we received your order due to potential mail delivery delays.

BACKORDERS/REFUNDS

If we are **out of stock** on an item you ordered, we will either: send a refund within 30 days OR it will appear in the "backorder" column of your invoice and will ship once it is **back in stock**.

OVER/UNDER PAYMENT

If your total doesn't match ours, we will send refunds if the overpayment is more than \$3. If you have a balance due of more than \$5, we will include a notice with the amount and an explanation.

SALES TAX

Ohio residents and orders for pick-up are subject to Ohio sales tax. Take your order total including shipping and multiply by .07. This amount is your sales tax.

CORRECTIONS

We strive to provide accurate information at all times but reserve the right to correct any misprints or errors. Please verify your shipping address carefully, as postal and delivery services do not forward packages. Delivery is guaranteed to the address provided when the order is placed.

RETURNS

At Berlin Seeds, we want you to be fully satisfied with your purchase. If you are not completely happy with an item, you may return it within 60 days of receipt, provided it is in its original condition, and accompanied by the receipt. Please note that all returns are subject to a 15% restocking fee.

PRICING

Product prices may change without notice. For the most accurate and up-to-date pricing, please refer to www.berlinseeds.life. Online prices are updated regularly and may differ from those listed in our printed catalog.

One Order Form Per Ship Date

Before you start, make sure your Garden-Ready Plants are available to ship on the same date. For different ship dates, use a separate order form to calculate shipping correctly.

Self-Regulating Hot Bed

3 Ft. x 6 Ft. – Automatic Climate Control for Early Growth

Bring your garden to life earlier in the season with this innovative self-regulating hot bed. Crafted for reliability and convenience, it combines durable materials with smart temperature-responsive features – no electricity required.

Key Features:

Automatic Venting System: Opens gradually around 65°F using a heat-sensitive mechanism protecting plants from overheating on sunny days, even when you're away.

Premium Build: Constructed from sturdy tubular aluminum with stainless steel fasteners for exceptional longevity.

Twin-Wall Insulation: 8 mm polycarbonate panels provide excellent light diffusion and heat retention, ensuring optimal growing conditions.

Effortless Operation:

Lid support automatically locks in place when opened.

Self-latching mechanism keeps the cover secure against wind when closed.

Portable & Versatile: Lightweight design allows easy repositioning around your garden or placement atop a raised bed.

Includes: Four anchor stakes for stable setup.

Dimensions: 3 ft x 6 ft

Monty's Green

Analysis: 4-15-12

Promotes early root vigor and assists in developing early resistance in all plants and vegetables

Helps prevent transplant shock

Low nitrogen for moderate top growth

Terrific for starting seeds and transplants

Use early in the season, outdoors

and all year for indoor plants. Use in the fall as a bulb and root dip.

60212 8 oz (concentrate) \$750

60211 2.5 gal (concentrate) ... \$75.40  25

60210 30 gal (concentrate) ... \$847.00  [Call for shipping quote](#)

Plant ID Stakes (Metal)

A favorite for all perennials and of course for recording the name of every rose in the garden. Many growers use this style marker in display fields at blooming time to inform customers and visitors. Nameplate is tilted for easy reading. 10" tall.

61088 8 pk \$5.50

Bauer

53 DAYS

 A new kind of oakleaf lettuce, this plant sets attractive dense, rosette-shaped heads that are approximately 8" when fully mature. The lobed leaves are thick and crunchy and have a unique dark green color and a delicious, sweet flavor. The heads sit a little higher off the ground for improved harvestability and lower risk of bottom rot. AAS Winner 2022.

Organic 

24791 pkt (300 sds) \$8.00

Eazyleaf Mix

48 DAYS

 Extremely easy to slice lettuce varieties. They are also easy to prepare. In just one slice, the plant splits into many small leaves, all equally sized. Our varieties are a versatile mix of red/green ruffled and hi-loft for fast salad prep. Tasty and easy makes this one of those 'gotta try it' varieties.

pelleted 

23861 pkt (100 sds) \$3.70
